FUND OVERVIEW

The fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the MSCI World Equal Weighted Country and Sector Neutral Index, the Fund's benchmark index (Index).

KEY BENEFITS

1. Exposure to the equity markets in developed countries. Companies are included in the Parent Index based on the proportion of their shares in issue that are available for purchase by international investors.
2. The Index includes constituents of the Parent Index but, at each rebalance date, all Index constituents are weighted equally, removing the influence of the size of each constituent's market capitalization. The weights are then updated to implement the Global Industry Classification Standard (GICS) sector and country neutrality, meaning the weight of each sector and country in the Index is equated with the weight of that sector and country in the Parent Index.
3. This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

GEOGRAPHIC BREAKDOWN (%)

Fund

Geographic exposure relates principally to the domicile of the issuers of the securities held in the product, added together and then expressed as a percentage of the product's total holdings. However, in some instances it can reflect the location where the issuer of the securities carries out much of their business. Bonds are included in US bond indices when the securities are denominated in U.S. dollars regardless of the domicile of the issuer.
