

**Purpose**

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

**Product**

**BlackRock Global Unconstrained Equity Fund** (the "Fund"), **Class D Accu GBP** (the "Share Class"), ISIN: **IE000403NHH9**, is authorised in Ireland and manufactured by BlackRock Asset Management Ireland Limited (the "Manager") which is part of the BlackRock, Inc group.

The Manager is authorised in Ireland and regulated by the Central Bank of Ireland (the "CBI") and the CBI is responsible for supervising the Manager in relation to this Key Information Document.

More information is available at [www.blackrock.com](http://www.blackrock.com) or by calling **+353 1 612 3394**. This document is dated 15 April 2026.

**What is this product?**

**Type:** The Fund is a sub-fund of BlackRock Funds I ICAV, an Irish collective asset-management vehicle constituted as an umbrella fund in Ireland, authorised by the Central Bank of Ireland as a Undertaking for Collective Investment in Transferable Securities ("UCITS").

**Term:** The Fund does not have a fixed term of existence or maturity period but in certain circumstances, as described in the Fund prospectus, the Fund may be unilaterally terminated following written notice to unitholders subject to compliance with the Fund prospectus and applicable regulation.

**Objectives**

- The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) over the long-term (5 years or more).
- The Fund invests at least 80% of its assets in equity securities (e.g. shares) and equity-related securities of companies domiciled in, or whose main business is in, global developed markets. The Fund may also invest in other equity securities and equity-related securities and other asset classes.
- The Investment Manager (IM) uses fundamental, company specific research to identify and select securities that, in its opinion, have the potential to produce attractive long-term growth. The Fund's portfolio is expected to be concentrated (i.e. a less diverse portfolio).
- The IM takes into account certain environmental, social and governance (ESG) related characteristics when determining whether an investment is appropriate for the Fund, as detailed in the Prospectus. The Fund's total assets will be invested in accordance with its ESG Policy as disclosed in the prospectus. For further details, please refer to the prospectus and the BlackRock website at <https://www.blackrock.com/baselinescreens>. The Fund may have indirect exposure (e.g. through financial derivative instruments (FDIs) and other funds) to issuers with exposures that are inconsistent with the IM's ESG analysis. The IM may use FDIs to reduce risk within the Fund's portfolio and may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- The Fund has an unconstrained investment style (i.e. it will not take a benchmark index into account when selecting the Fund's investments). However, the IM will refer to the MSCI World Index (the Index) for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy (including, in particular, its unconstrained investment style). The IM is not bound by the components or weighting of the Index and may use its discretion to invest in securities not included in the Index. The Fund's portfolio holdings are expected to deviate materially from the Index. The Index should be used by investors to compare the performance of the Fund.
- The price of equity securities fluctuates daily and may be influenced by factors affecting the performance of the individual companies issuing the equities, as well as by daily stock market movements, and broader economic and political developments which in turn may affect the value of your investment.
- The return on your investment in the Fund is directly related to the value of the underlying assets of the Fund, less costs (see "What are the costs?" below).
- The relationship between the return on your investment, how it is impacted and the period for which you hold your investment is considered below (see "How long should I hold it and can I take my money out early?").
- The depositary of the Fund is J.P. Morgan SE – Dublin Branch.
- Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the BlackRock Funds I ICAV. These documents are available free of charge in English and certain other languages. These can be found, along with other (practical) information, including prices of units, on the BlackRock website at: [www.blackrock.com](http://www.blackrock.com) or the iShares website at: [www.ishares.com](http://www.ishares.com) or by calling the International Investor Servicing team on +353 1 612 3394.
- Your shares will be accumulating shares (i.e. dividend income will be included in their value).
- The Fund's base currency is US Dollar. Shares for this class are bought and sold in Sterling. The performance of your shares may be affected by this currency difference.
- You can buy and sell your shares daily. The minimum initial investment for this share class is US\$5,000 or other currency equivalent.

**Intended retail investor:** This Fund is intended for retail investors (i) with knowledge and/or experience of these types of products, (ii) that have obtained appropriate investment advice and (iii) that have the ability to bear losses up to the amount they have invested in the Fund (see "How long should I hold it and can I take my money out early?").

**Insurance benefits:** The Fund does not offer any insurance benefits.

## What are the risks and what could I get in return?

### Risk Indicator

- The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
- We have classified this product as 4 out of 7, which is a medium risk class. This classification rates the potential losses from future performance at a medium level, and poor market conditions could affect the value of your investment. This classification is not guaranteed and may change over time and may not be a reliable indication of the future risk profile of the Fund. The lowest category does not mean risk free.
- **Be aware of currency risk.** If you receive payments in a currency that is different to the product's base currency, the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
- Please refer to the product's Prospectus for details of other materially relevant risks that may apply to this product.
- This product does not include any protection from future market performance so you could lose some or all of your investment.
- If the product is not able to pay you what is owed, you could lose your entire investment.

### Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product, which may include input from benchmark(s) / proxy, over the last ten years. Markets could develop very differently in the future.

Recommended holding period : 5 years		Example Investment : GBP 10,000	
Scenarios		If you exit after 1 year	If you exit after 5 years
<b>Minimum</b>	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>		
<b>Stress*</b>	<b>What you might get back after costs</b>	5,260 GBP	3,960 GBP
	Average return each year	-47.4%	-16.9%
<b>Unfavourable**</b>	<b>What you might get back after costs</b>	8,370 GBP	9,940 GBP
	Average return each year	-16.3%	-0.1%
<b>Moderate**</b>	<b>What you might get back after costs</b>	11,080 GBP	16,280 GBP
	Average return each year	10.8%	10.2%
<b>Favourable**</b>	<b>What you might get back after costs</b>	13,700 GBP	19,390 GBP
	Average return each year	37.0%	14.2%

\* The stress scenario shows what you might get back in extreme market circumstances.

\*\* This type of scenario occurred for an investment in the product and/or benchmark(s) or proxy between :

Scenarios	1 year	5 years
<b>Unfavourable</b>	December 2021 - December 2022	January 2025 - January 2026
<b>Moderate</b>	March 2018 - March 2019	June 2020 - June 2025
<b>Favourable</b>	March 2020 - March 2021	April 2016 - April 2021

## What happens if BlackRock Asset Management Ireland Limited is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary, J.P. Morgan SE – Dublin Branch (the "Depositary"). In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations). As a shareholder of the Fund you would not be able to make a claim to the UK Financial Services Compensation Scheme or any other scheme about the Fund in the event that the Fund is unable to pay out.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

**Costs over time:** The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

### We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return).
- For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- GBP 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	132 GBP	1,106 GBP
<b>Annual cost Impact (*)</b>	1.3%	1.5%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.7% before costs and 10.2% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

### Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	-
Exit costs	We do not charge an exit fee.	-

Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.95% of the value of your investment per year. This is based on a combination of estimated and actual costs data over the last year. Any underlying product costs are included here with the exception of transaction costs which would be included below under 'Transaction costs'.	95 GBP
Transaction costs	0.37% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	37 GBP

Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	-
