Emerging Markets Impact Bond Fund

A sub-fund of BlackRock Global Funds

Class I3 Hedged EUR Dist

ISIN: LU2860231856

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- The Fund aims to provide a return on your investment through a combination of capital growth and income on the Fund's assets over the long term (at least five consecutive years).
- The Fund invests at least 80% of its total assets in a concentrated global portfolio of "Green, Social and Sustainability" (GSS) bonds issued by governments and agencies of, and companies domiciled or exercising the predominant part of their economic activity in, emerging markets, where the proceeds of such GSS bonds are tied to green and socially responsible projects.
- The Fund's total assets will be invested in accordance with its Environmental, Social and Governance ("ESG") Policy as disclosed in the prospectus.
- For the selection of GSS bonds, the Investment Adviser (IA) will analyse the use of proceeds of the issues and the issuer framework for alignment of the bonds with the Green Bond Principles (GBP), Social Bond Principles (SBP), and Sustainability Bond Guidelines (SBG) of the International Capital Markets Association to determine suitability within the investment universe. For the selection of non-GSS bonds, including emerging market corporate bonds and sovereign bonds, the Investment Adviser will only invest in highly rated ESG bonds.
- The Fund may invest in the full spectrum of available fixed income securities, including non-investment grade. Currency exposure is flexibly managed. The Fund may invest more than 50% (but not more than 70%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments rated non-investment grade. The exposure to any one non-investment grade country will not exceed 10% of the Fund's Net Asset Value.
- The IA may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective and to reduce risk within the Fund's portfolio. The Fund may, via FDIs, generate market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- The Fund is actively managed and the IA has discretion to select the Fund's investments. The Fund has an unconstrained investment style (i.e. it will not take a benchmark index into account when selecting the Fund's investments). The JP Morgan Screened Tilted and Reweighted Green Bond Emerging Markets Index (USD Hedged)(the "Index") should be used by investors to compare the performance of the Fund over the long term. The Index measures the performance of green bonds across emerging markets.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your shares will be distributing (i.e. dividend income will be paid monthly and calculated monthly on the shares).
- The Fund's base currency is US Dollar. Shares for this class are bought and sold in Euro. The performance of your shares may be affected by this currency difference.
- Your shares will be hedged with the aim of reducing the effect of exchange rate fluctuations between the denominated currency of the shares and the Fund's underlying portfolio currencies or the Fund's base currency. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares. Please see the prospectus for further details.
- You can buy and sell your shares daily. The minimum initial investment for this share class is US$10,000,000 or other currency equivalent.

Risk and Reward Profile

- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
  - Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
  - The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 July 2026. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
