Emerging Markets Sustainable Equity Fund

A sub-fund of BlackRock Global Funds

Class I2 USD

ISIN: LU2344726232

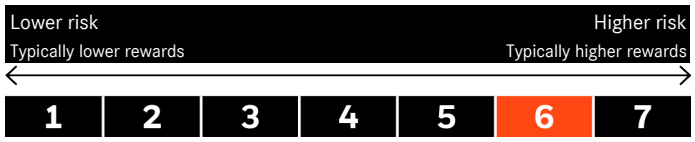

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- The Fund aims to provide a return on your investment, in a sustainable way, through a combination of capital growth and income on the Fund's assets.
- The Fund invests globally at least 70% of its total assets in the equity securities (i.e. shares) of companies domiciled in, or whose main business is in, global emerging markets in a manner consistent with the principles of sustainable investing.
- The Investment Adviser (IA) engages with companies to support improvement in their environmental, social and governance ("ESG") credentials and the Fund will invest in companies with sustainable business models which have a strong consideration for ESG risks and opportunities as described in the prospectus. The investment decisions are based on the IA's fundamental research focusing on bottom up (i.e. company-specific) analysis, inclusive of financial and non-financial metrics. The Fund will take into account ESG criteria when selecting investments and will apply the EuU Paris-Aligned Benchmark Exclusions as disclosed in the prospectus. For further details please refer to the ESG Policy of the Fund prospectus and the BlackRock website at www.blackrock.com/baselinescreens
- The IA may use financial derivative instruments ("FDIs") (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- The Fund is actively managed. The IA has discretion to select the Fund's investments. In doing so, the IA will refer to the MSCI Emerging Markets Index (Index) for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The Index should be used by investors to compare the performance of the Fund.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your shares will be non-distributing (i.e. dividend income will be included in their value).
- Your shares will be denominated in US Dollar, the Fund's base currency.
- You can buy and sell your shares daily. The minimum initial investment for this share class is US$10,000,000 or other currency equivalent.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
  - The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2025. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest
