MyMap Moderate Fund

A sub-fund of BlackRock Global Funds

Class A2 USD

ISIN: LU2368540436

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- The Fund aims to provide a return on your investment, with a moderate level of risk, through a combination of capital growth and income on the Fund's assets.
- The Fund will seek to achieve its investment objective by obtaining indirect exposure to a broad range of asset classes, which may include equity and equity-related securities, fixed income and fixed income-related securities, alternative assets, cash and near-cash instruments. Exposure to these asset classes will be achieved through investment in shares or units of a concentrated portfolio of Collective investment schemes (CIS) (which themselves invest in a diversified portfolio of assets), including but not limited to exchange traded funds and index funds managed by an affiliate of the BlackRock Group and where determined appropriate, the Fund may invest directly in derivatives and near-cash instruments.
- The Fund will seek to maintain a moderate risk profile of the Fund's portfolio and will vary its underlying asset exposure in different market conditions. Given the moderate risk profile of the Fund, under normal market conditions the Fund will seek a higher exposure to equity securities, compared to a fund with a lower risk profile which would normally seek to have a higher exposure to fixed income securities.
- There can be no guarantee that the Fund will maintain a moderatelevel of risk, especially during periods of unusually high or low volatility in the equity and fixed income markets
- The Fund is actively managed. The Investment Adviser (IA) has discretion to select the Fund's investments and is not constrained by any benchmark in this process.
- The IA may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your shares will be non-distributing (i.e. dividend income will be included in their value).
- The Fund's base currency is Euro. Shares for this class are bought and sold in US Dollar. The performance of your shares may be affected by this currency difference.
- Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the base currency of the Fund. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- You can buy and sell your shares daily. The minimum initial investment for this share class is US$5,000 or other currency equivalent.

Risk and Reward Profile

- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
  - The value of equities and equity-related securities can be affected by daily stock market movements, political factors, economic news, company earnings and significant corporate events.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2025. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	0.47%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

Past Performance

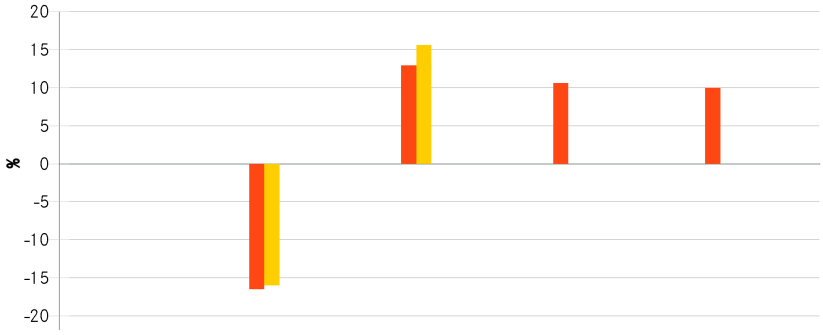

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in USD for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2021. The share class was launched in 2021.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.
