BlackRock Emerging Markets Fund

Class X Accumulating GBP

ISIN: GB00BFBFW915

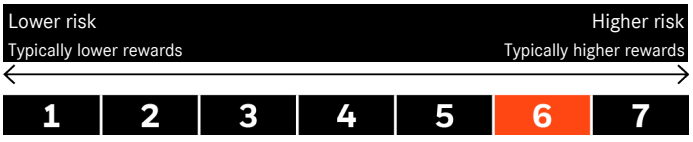

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) over the long term (5 or more consecutive years beginning at the point of investment).
- The Fund invests at least 70% of its total assets in the equity securities (e.g. shares) of companies incorporated or listed on a stock exchange in emerging market countries.
- The Fund may indirectly invest in emerging markets by investing in American Depository Receipts (ADRs) and Global Depositary Receipts (GDRs), which are listed or traded on stock exchanges and regulated markets outside emerging markets. ADRs and GDRs are investments issued by financial institutions which give exposure to underlying equity securities.
- The Fund has the flexibility to invest outside of the asset class and sector set out above.
- The Fund is actively managed and the IA has discretion to select the Fund's investments. In doing so, the IA will refer to the MSCI Emerging Markets Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The IA may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by unitholders to compare the performance of the Fund.
- The investment adviser (IA) may use derivatives (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective.
- The Fund may, via derivatives, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your units will be accumulating units (i.e. dividend income will be included in their value).
- Your units will be denominated in Sterling, the Fund's base currency.
- You can buy and sell your units daily. The minimum initial investment for this unit class is £10,000,000.

Risk and Reward Profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
  - Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2025. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** (i) To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges. (ii) Holders in this unit class may be subject to additional periodic charges outside of the Fund by way of separate agreement with BlackRock.
