KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

BlackRock European Absolute Alpha Fund

Class X Accumulating GBP

ISIN: GB00BFK3LQ65

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- The investment strategy of the Fund is deemed by the Manager to be capacity constrained and therefore, when the net asset value of the Fund reaches £900,000,000, units in the Fund will not be available to buy until further notice except at the discretion of the Manager (you will still be able to sell your units daily).
- The Fund aims to achieve positive absolute returns on your investment (i.e. an increase in the overall value of the Fund) over a period of 12 months regardless of market conditions. As such, the Fund will not be managed against any European equity index.
- The Fund will be managed with the aim of delivering absolute (more than zero) returns on a 12 month basis in any market conditions. However, an absolute return is not guaranteed over a 12 month or any period and the Fund may experience periods of negative return. The Fund's capital is at risk.
- The Fund aims to gain investment exposure to equity securities (e.g. shares) and equity-related securities of, or giving exposure to, companies incorporated or listed in the European Economic Area and Switzerland.
- In order to achieve its objective the Fund invests at least 70% of its total assets in derivatives, equity securities and other equity-related securities and when determined appropriate fixed income (FI) securities (such as bonds), money-market instruments (MMIs), deposits and cash.
- Equity-related securities include derivatives. Derivatives are investments the prices of which are based on one or more underlying assets. MMIs are debt instruments with short-term maturities.
- The FI securities and MMIs may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) and may be investment grade (i.e. meet a specified level of credit worthiness), non-investment grade or unrated at the time of purchase.
- At any one time, a substantial amount, or even all of the Fund's assets may be held as cash to provide cover for the exposure created by the use of derivatives or to assist in achieving its investment objective.
- The investment adviser (IA) will use derivatives to achieve the Fund's investment objective. These will include synthetic short positions where the Fund uses a derivative to benefit from the sale of an asset which the Fund does not physically own with the aim of buying it later at a lower price to secure a profit.
- The Fund may, via derivatives, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- The Fund is actively managed and the IA has discretion to select the Fund's investments and is not constrained by any benchmark in this process. 3 Month Sterling Overnight Index Average Rate (SONIA) compounded in arrears plus 11.9 basis points spread should be used by unitholders to compare the performance of the Fund. Compounding in arrears is a methodology that compounds daily values of the overnight rate throughout the relevant term period (i.e.3 Months).
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your units will be accumulating units (i.e. dividend income will be included in their value).
- Your units will be denominated in Sterling, the Fund's base currency.
- You can sell your units daily. Units, whilst available for purchase, can be bought daily. The minimum initial investment for this unit class is £10,000,000.

Risk and Reward Profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
  - Due to its investment strategy an 'Absolute Return' fund may not move in line with market trends or fully benefit from a positive market environment.
  - Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2025. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** (i) To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges. (ii) Holders in this unit class may be subject to additional periodic charges outside of the Fund by way of separate agreement with BlackRock.
