BlackRock Tactical Opportunities Plus Fund

A sub-fund of BlackRock Strategic Funds

Class A2 Hedged SGD Accu

ISIN: LU3489998008

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- The Fund seeks to achieve a positive absolute return through a combination of capital growth and income regardless of market conditions, and to invest in a manner consistent with the principles of environmental, social, and governance "ESG" focused investing.
- The Fund seeks to achieve its objective with a tactical, macro investment approach by investing globally in equity securities, fixed income securities (FIS) (which may include up to 50% of high yield FIS), instruments relating to such securities (including total return swaps, credit default swaps, interest rate swaps, currency swaps, options, futures, options on futures and forwards), shares or units of CIS (including exchange-traded funds), Money Market Instruments, deposits, foreign currencies and cash, along with any other securities.
- The Fund's total assets will be invested in accordance with its ESG policy. For further details, please refer to the prospectus and the BlackRock website at www.blackrock.com/baselinescreens.
- The Fund will not have a geographical or sector focus but may have a high allocation to particular countries or sectors at any one time. The Fund may have exposure to both developed markets and emerging markets. The Fund will use a combination of systematic (i.e. rule based) models and discretionary investment techniques to allocate assets.
- The Fund may invest up to 10% of its Net Asset Value in asset-backed securities and mortgage-backed securities (whether investment grade or not).
- The Investment Adviser (IA) may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, for efficient portfolio management and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- The Fund is actively managed, and the IA has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The ICE BofA 3 Month Treasury Bill Index (the "Benchmark") should be used by shareholders to compare the performance of the Fund. Investors may also use a composite benchmark comprising 60% of the MSCI World Index and 40% of Bloomberg Global Aggregate Index to compare the performance of the Fund (the "Composite Benchmark"). The components of the Composite Benchmark may be quoted separately in marketing materials related to the Fund.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your shares will be non-distributing (i.e. dividend income will be included in their value).
- The Fund's base currency is US Dollar. Shares for this class are bought and sold in Singapore Dollar. The performance of your shares may be affected by this currency difference.
- Your shares will be hedged with the aim of reducing the effect of exchange rate fluctuations between the denominated currency of the shares and the Fund's underlying portfolio currencies or the Fund's base currency. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares. Please see the prospectus for further details.
- You can buy and sell your shares daily. The minimum initial investment for this share class is US$5,000 or other currency equivalent.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Asset backed securities and mortgage backed securities are subject to the same risks described for fixed income securities. These instruments may be subject to 'Liquidity Risk', have high levels of borrowing and may not fully reflect the value of underlying assets.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
  - Due to its investment strategy an 'Absolute Return' fund may not move in line with market trends or fully benefit from a positive market environment.
  - Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
  - The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure shown here is an estimate of the annualised charges. An estimate is being used because the Fund (or share class) was newly launched or it has been launched within the reported period. The Fund's annual report for each financial year will include detail on the exact charges made.

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest
