BlackRock Global Event Driven Fund

A sub-fund of BlackRock Strategic Funds

Class I A2 USD

ISIN: LU1921562119

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- The Fund aims to achieve a positive absolute return through a combination of capital growth and income on your investment regardless of market conditions.
- Under normal market conditions, the Fund will seek to gain at least 70% of its investment exposure through global equity securities (e.g. shares) and equity related securities. The Fund may also invest in fixed income (FI) securities (such as bonds), FI related securities, funds, money market instruments (MMIs) (i.e. debt securities with short-term maturities), deposits and cash.
- In order to achieve its investment objective and policy, the Fund will utilise a variety of investment strategies and instruments. In particular, the Fund will employ a fundamentals-based investment process focussed on identifying investments that are undergoing a sufficiently defined catalyst event. Catalyst events range across a broad spectrum and include, but are not limited to, announced mergers and acquisitions, company offers, spinoffs and split-offs, financial and strategic restructuring and management changes.
- The FI securities and MMIs may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development). These may include securities which have a relatively low credit rating or which are unrated.
- The investment adviser (IA) will use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective and the Fund may, via FDIs, generate market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets). A significant portion of the Fund's assets may be invested in total return swaps and contracts for difference that aim to achieve a specified return based on underlying assets such as equity securities.
- The Fund is actively managed and the IA has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The ICE BofAML 3-MO US Treasury Bill should be used by shareholders to compare the performance of the Fund.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your shares will be non-distributing (i.e. dividend income will be included in their value).
- Your shares will be denominated in US Dollar, the Fund's base currency.
- You can buy and sell your shares daily. The minimum initial investment for this share class is US$10,000,000 or other currency equivalent.

Risk and Reward Profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
  - Due to its investment strategy an 'Absolute Return' fund may not move in line with market trends or fully benefit from a positive market environment.
  - Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2025. This figure may vary from year to year. It excludes:

- Performance fees, where relevant.
- Portfolio trade-related costs, except costs paid to a custodian and any entry/exit charge paid by the Fund to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
