Coutts Actively Managed Global Investment Grade Credit Fund

A sub-fund of BlackRock Solutions Funds ICAV

Class C Distributing GBP Hedged

ISIN: IE00BMYCBC46

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- The Fund aims to achieve a total return on your investment through a combination of capital growth and income on the Fund's assets.
- The Fund invests at least 80% of its total assets in fixed income (FI) securities (such as bonds) issued in global developed markets and emerging markets by corporate issuers or government-related issuers (including governments, foreign agencies, supranational bodies (e.g. the International Bank for Reconstruction and Development) and local authorities) which are investment grade (i.e. meet a specified level of credit worthiness) and instruments related to such FI securities, including financial derivative instruments (FDI) (i.e. investments the prices of which are based on one or more underlying assets). The Fund may invest up to 25% of its total assets in emerging markets and up to 10% in asset backed and mortgage backed securities (i.e. financial securities backed by cash flows from debt). The Fund may also invest in FI securities which are high yield (i.e. non-investment grade) and instruments related to such FI securities, money market) instruments (i.e. debt securities with short term maturities), deposits and cash.
- The Fund is actively managed. The investment manager (IM) has discretion to select the Fund's investments. In doing so, the IM will refer to the Bloomberg Global Aggregate Credit Index (USD Hedged) (the Index) when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The Index measures the performance of the global investment grade local currency corporate and government-related (foreign agencies, sovereign, supranational and local authority, including taxable municipals) bond markets.
- The IM is not bound to the components or weighting of the Index when selecting investments. The IM may also use its discretion to invest in securities not included in the Index to take advantage of specific investment opportunities. The Fund is designed to provide investors with a relative gross return in excess of the Index by typically taking a conservative level of active risk in order to seek a commensurate return with respect to management fees over the medium term (i.e. 3 years or more). The Index should be used by investors to compare the performance of the Fund. The IM may use FDIs to help achieve the Fund's investment. The IM may use FDIs to help achieve the Fund's investment objective and to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund is may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your shares will be distributing shares (i.e. dividend income will be paid on the shares quarterly based on the income received on the Fund's assets).
- The Fund's base currency is US Dollar. Shares for this class are bought and sold in Sterling. The performance of your shares may be affected by this currency difference.
- Your shares will be hedged with the aim of reducing the effect of exchange rate fluctuations between the denominated currency of the shares and the Fund's underlying portfolio currencies or the Fund's base currency. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares. Please see the prospectus for further details.
- You can buy and sell your shares daily. The minimum initial investment for this share class is £200,000,000.

Risk and Reward Profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
  - Asset backed securities and mortgage backed securities are subject to the same risks described for fixed income securities. These instruments may be subject to 'Liquidity Risk', have high levels of borrowing and may not fully reflect the value of underlying assets.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
  - Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 30 September 2026. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).
