Coutts Emerging Markets Equity Index Fund

A sub-fund of BlackRock Solutions Funds ICAV

Class C Hedged GBP Dist

ISIN: IE0001BWR475

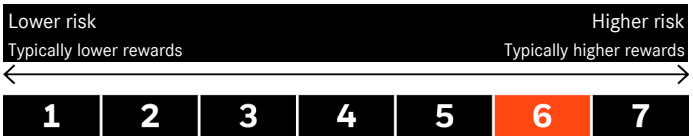

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the MSCI Emerging Markets Index, the Fund's benchmark index (the "Benchmark Index").
- The Fund is passively managed and the investment policy of the Fund is to follow a replicating strategy and to invest in a portfolio of equity securities that as far as possible and practicable consists of the component securities of the Benchmark Index. The Fund intends to replicate the constituents of the Benchmark Index by holding all the securities comprising the Benchmark Index in a similar proportion to their weightings in the Benchmark Index. The Benchmark Index measures the performance of large and mid-capitalisation stocks of a number of companies across emerging market countries which comply with the index provider's size, liquidity and free-float criteria, and is free float-adjusted market capitalisation weighted.
- The Fund may engage in short-term secured lending of its investments to certain eligible third parties to generate additional income and to off-set the costs of the Fund.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your shares will be distributing shares (i.e. dividend income will be paid on the shares quarterly based on the income received on the Fund's assets).
- The Fund's base currency is US Dollar. Shares for this class are bought and sold in Sterling. The performance of your shares may be affected by this currency difference.
- Your shares will be hedged with the aim of reducing the effect of exchange rate fluctuations between the denominated currency of the shares and the Fund's underlying portfolio currencies or the Fund's base currency. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares. Please see the prospectus for further details.
- You can buy and sell your shares daily. The minimum initial investment for this share class is £200,000,000.

Risk and Reward Profile

- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
