Coutts Global Credit Bond Index Fund

A sub-fund of BlackRock Solutions Funds ICAV

Class NC GBP Dist

ISIN: IE000UWKTQM0

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the total return of the Bloomberg Global Aggregate Credit 100% GBP Hedged Index (the "Benchmark Index").
- The Fund is passively managed and the investment policy of the Fund is to invest in a portfolio of fixed income (FI) securities (such as bonds) or fixed income related securities that as far as possible and practicable consists of the component securities of the Benchmark Index. The Fund intends to use optimisation techniques in order to achieve a similar return to the Benchmark Index and it is therefore not expected that the Fund will hold each and every underlying constituent of the Benchmark Index at all times or hold them in the same proportion as their weightings in the Benchmark Index. The Benchmark Index measures the performance of the global investment grade local currency corporate and government- related (foreign agencies, sovereign, supranational and local authority, including taxable municipals) bond market.
- The IM may use FDIs to help achieve the Fund's investment objective and to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund is expected, via FDIs, to generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- The Fund may engage in short term secured lending of its investments to third parties as a means of generating additional income.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your shares will be distributing shares (i.e. dividend income will be paid on the shares quarterly based on the income received on the Fund's assets).
- Your shares will be denominated in Sterling, the Fund's base currency.
- You can buy and sell your units daily. The minimum initial investment for this unit class is £50,000.

Risk and Reward Profile

- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
