iShares Emerging Market Screened Equity Index Fund (IE)

A sub-fund of BlackRock Index Selection Fund

Class Flexible Accumulating EUR

ISIN: IE00BKPTWY98

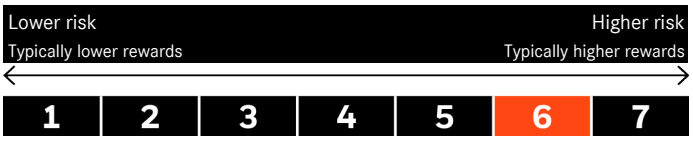

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the global emerging equity markets, excluding companies which do not meet certain environmental, social and governance ("ESG") related criteria.
- The Fund is passively managed and aims to invest, so far as possible and practicable, in equity securities (e.g. shares) of companies in global emerging markets that make up the MSCI Emerging Markets ex Select Controversies Index, the Fund's benchmark index.
- The benchmark index measures the performance of a subset of equity securities within the MSCI Emerging Markets Index (Parent Index). The benchmark index excludes companies from the Parent Index which are identified by the index provider as being involved in controversies that have a negative ESG impact on their operations and/or products and services based on an MSCI ESG controversy score (as determined by the index provider) including companies that have certain levels of exposure to, or ties with controversial weapons, nuclear weapons, tobacco, civilian firearms, thermal coal, oil sands, and/or that are deemed to have breached one or more of the UN Global Compact Principles.
- The benchmark index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.
- The Fund may indirectly invest in emerging markets by investing in American Depository Receipts (ADRs) and Global Depositary Receipts (GDRs), which are listed or traded on stock exchanges and regulated markets outside emerging markets. ADRs and GDRs are investments issued by financial institutions which give exposure to underlying equity securities.
- The Fund intends to replicate the benchmark index by holding the equity securities, which make up the benchmark index, in similar proportions to it.
- The investment manager may also use FDIs (i.e. investments the prices of which are based on one or more underlying assets), to help achieve the Fund's investment objective.
- The Fund will take into account ESG criteria only when selecting the securities to be held directly by the Fund. The Fund may gain indirect exposure (through, including but not limited to, FDIs and units in collective investment schemes) to securities considered not to satisfy these ESG criteria.
- The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your units will be accumulating units (i.e. dividend income will be included in their value).
- The Fund's base currency is US Dollar. Units for this class are bought and sold in Euro. The performance of your units may be affected by this currency difference.
- You can buy and sell your units daily. The minimum initial investment for this unit class is €1,000,000.

Risk and Reward Profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
  - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
  - The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

The ongoing charges figure is based on expenses for the twelve month period ending 31 August 2026. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** (i) To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges. (ii) Holders in this unit class may be subject to additional periodic charges outside of the Fund by way of separate agreement with BlackRock.
