iShares Emerging Markets Equity Index Fund (UK)

A sub-fund of BlackRock Collective Investment Funds

Class L Income GBP

ISIN: GB00BLBNVK18

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) by tracking closely the performance of the FTSE Emerging Index, the Fund's benchmark index.
- The Fund is passively managed and will invest in a portfolio of equity securities (e.g. shares) that as far as possible and practicable consist of the component securities of the Fund's benchmark index in similar proportions to their weightings in the Fund's benchmark Index.
- The Fund aims to replicate the composition of the Fund's benchmark index; however it may not always be possible or practicable to replicate every security in their exact weighting as in the Fund's benchmark index.
- The benchmark index measures the performance of equity securities of leading companies listed in the emerging markets. The benchmark index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.
- The Fund may indirectly invest in emerging markets by investing in American Depository Receipts (ADRs) and Global Depositary Receipts (GDRs), which are listed or traded on stock exchanges and regulated markets outside emerging markets. ADRs and GDRs are investments issued by financial institutions which give exposure to underlying equity securities.
- The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your units will be income units (i.e. dividend income will be paid semi-annually on the units).
- Your units will be denominated in Sterling, the Fund's base currency.
- You can buy and sell your units daily. The minimum initial investment for this unit class is £1,000,000.

Risk and Reward Profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
  - Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2025. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
