iShares USD Sukuk Index Fund (IE)

A sub-fund of BlackRock Fixed Income Dublin Funds plc

Class S USD Dist

ISIN: IE000WUZ32I5

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- The Fund aims to achieve a total return on your investment, through a combination of capital growth and income, which reflects the return of the J.P. Morgan EM Aggregate Sukuk Index (12pm UK), the Fund's benchmark index (Index).
- The Fund is passively managed and invests, in a manner consistent with the rules, principles and parameters of Islamic law (Shari'ah), in a portfolio of Sukuk (defined below) that, as far as possible and practicable, consists of the component securities of the Index.
- The Index measures the performance of US Dollar denominated emerging market investment certificates commercially similar to fixed income securities that are commonly used by investors wishing to comply with Shari'ah (Sukuk). The Index may consist of investment grade, non-investment grade and unrated Sukuk issued by sovereign, quasi-sovereign, corporate and supranational entities that comply with the minimum issue size and remaining maturity requirements of the Index.
- The Fund intends to use optimisation techniques in order to achieve a similar return to the Index and it is therefore not expected that the Fund will hold each and every underlying constituent of the Index at all times or hold them in the same proportion as their weightings in the Index.
- The Fund may invest in Shari'ah-compliant financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets), including Wa'd currency futures, for efficient portfolio management purposes.
- The Fund's investments will normally be listed or traded on Regulated Markets.
- The Fund may hold some securities which are not underlying constituents of the Index where such securities provide similar performance (with matching risk profile) to certain securities that make up the Index, provided that such action is undertaken in compliance with Shari'ah principles.
- The Fund may hold small amounts of cash. The Fund shall keep its cash holdings in a non-interest-bearing account subject to the limits set out in the prospectus.
- This Fund is designed for investors wishing to comply with Shari'ah. However, subscription is open to any other investor who is interested in investing in the Fund. It is intended that all the investments made by this Fund take place in conformity with Shari'ah. It is possible that the application of Shari'ah may result in different outcomes for the Fund than in the case of funds with similar objectives that are not compliant with Shari'ah.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your shares will be distributing shares (i.e. dividend income will be paid out quarterly on the shares). The dividends may include a portion of 'impure income' (i.e. income prohibited under Shari'ah principles) and such 'impure income' will then need to be "purified" by way of a donation to approved charities for purification purposes.
- Your shares will be denominated in US Dollar, the Fund's base currency.
- You can buy and sell your shares daily. The minimum initial investment for this share class is $200,000,000.

Risk and Reward Profile

- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated three due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
  - Shari'ah funds do not pay interest and are prohibited from investing in businesses that are considered unlawful under Islamic principles. As a result, they may perform differently from other funds that do not follow Islamic principles.
  - Fixed income securities issued or guaranteed by government entities in emerging markets generally experience higher 'Credit Risk' than developed economies.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
