**A dynamic, high-quality bond portfolio aiming to generate competitive risk-adjusted income across market cycles**

### Important Information

1. The Fund may invest in debt securities that are subject to actual or perceived ratings downgrade. An increase in interest rates may adversely affect the value of the bonds held by the Fund. The Fund may invest in non-investment grade and unrated bonds that may be subject to higher default, volatility and liquidity risks. The Fund invests in bonds issued or guaranteed by governments or authorities, which may involve political, economic, default or other risks. Use of environmental, social and governance (“ESG”) criteria as the investing principles may impact the Fund’s performance. Reliance on third party data may lead to incorrect evaluation of a security or issuer based on ESG criteria. There may also be a risk of incorrectly applying the relevant ESG criteria on the Fund. The Fund invests in asset/mortgage backed securities that may be subject to greater credit, liquidity, and interest rate risks and are often exposed to extension and prepayment risks. The Fund’s income-generating investment strategy may reduce the potential for capital growth and future income of the Fund.
2. The Fund is subject to currency risk, emerging market risk, currency conversion risk including Renminbi denominated Classes, foreign investments restrictions risk, securities lending counterparty risk and contingent convertible bonds risk.
3. **Class 3(G) Shares** pay dividends gross of expenses. **Class 6 Shares** and **Class 10 Shares** pay dividends gross of expenses and/or from capital at the Directors’ discretion. **Class 8 Shares** pay dividends gross of expenses and/or from capital at the Directors’ discretion and include interest rate differentials arising from share class currency hedging. Negative interest rate differentials may decrease the dividends paid. Paying dividends gross of expenses may result in more income being available for distribution; however these shares may effectively pay dividends from capital – may amount to a partial return or withdrawal of an investor’s original investment or capital gains. All declared dividends result in an immediate reduction in the NAV price of the share class on the ex-dividend date.
4. The Fund may use derivatives for hedging and for investment purposes. However, usage for investment purposes will not be extensive. The Fund may suffer losses from its derivatives usage.
5. The value of the Fund can be volatile and can go down substantially within a short period of time. It is possible that a certain amount of your investment could be lost.
6. Investors should not make investment decisions based on this document alone. Investors should refer to the Prospectus and Key Facts Statement for details including risk factors.

### Why invest?

#### 1 Maximize risk-adjusted income

The Fund generates competitive yield with lower volatility through a high quality, diversified portfolio.

Source: Morningstar as at end January 2025. Yield per unit volatility = Trailing 12-month yield/12-month volatility. The trailing 12-month yield is calculated by summing the income distributions over the trailing 12 months and dividing that by the sum of the last month’s ending NAV plus any capital gains distributed over the 12-month period. A10 share class aims to pay dividends on a monthly basis. Dividend Payment is not guaranteed and is not indicative of the return of the Fund. The Fund may effectively pay dividend from capital. <sup>See Important Information 3</sup>. Peer group refers to all surviving funds in Global flexible bond USD hedged categorized by Morningstar.
