**A flexible approach aiming to achieve high yield through exposure to complementary income sources**

### Important Information

- The Fund follows a dynamic asset allocation strategy and may incur greater transaction costs when rebalanced periodically. The Fund may invest in debt securities that are subject to actual or perceived ratings downgrade. An increase in interest rates may adversely affect the value of the bonds held by the Fund. The Fund may invest in non-investment grade and unrated bonds that may be subject to higher default, volatility and liquidity risks. The Fund invests in bonds issued or guaranteed by governments or authorities, which may involve political, economic, default or other risks. The Fund's investments in equities could incur significant losses due to higher fluctuation of equity values. The Fund invests in asset/mortgage backed securities that may be subject to greater credit, liquidity, and interest rate risks and are often exposed to extension and prepayment risks. The Fund's income-generating investment strategy may reduce the potential for capital growth and future income of the Fund.
- The Fund is subject to risks associated with preference shares, currency risk, emerging market risk, securities lending counterparty risk, currency conversion risk including Renminbi denominated Classes, foreign investments restrictions risk and contingent convertible bonds risk.
- Class 5(G) Shares** pay dividends gross of expenses. **Class 6 Shares** pay dividends gross of expenses and/or from capital at the Directors' discretion. **Class 8 Shares** pay dividends gross of expenses and/or from capital at the Directors' discretion and include interest rate differentials arising from share class currency hedging. Negative interest rate differentials may decrease the dividends paid. Paying dividends gross of expenses may result in more income being available for distribution; however these shares may effectively pay dividends from capital – may amount to a partial return or withdrawal of an investor's original investment or capital gains. All declared dividends result in an immediate reduction in the NAV price of the share class on the ex-dividend date.
- The Fund may use derivatives for hedging and for investment purposes. However, usage for investment purposes will not be extensive. The Fund may suffer losses from its derivatives usage.
- The value of the Fund can be volatile and can go down substantially within a short period of time. It is possible that a certain amount of your investment could be lost.
- Investors should not make investment decisions based on this document alone. Investors should refer to the Prospectus and Key Facts Statement for details including risk factors.

## Investment Objective

The Dynamic High Income Fund follows a flexible asset allocation policy that seeks to provide a high level of income. In order to generate high levels of income the Fund will seek diversified income sources across a variety of asset classes, investing significantly in income producing assets such as fixed income transferable securities, including corporate and government issues which may be fixed and floating and may be investment grade, sub-investment grade or unrated, covered call options and preference shares. The Fund will use a variety of investment strategies and may invest globally in the full spectrum of permitted investments including equities, equity-related securities, fixed income transferable securities, units of undertakings for collective investment, cash, deposits and money market instruments. Currency exposure is flexibly managed.
