- For the same period, the Russell 1000® Index returned 24.51% and the Russell 1000® Growth Index returned 33.36%.

What contributed to performance?

Stock selection in the information technology, communication services, and consumer discretionary sectors contributed to absolute performance. In all three sectors, the leading individual contributors were mega-cap, technology-related stocks that led the broader market higher in 2024.

What detracted from performance?

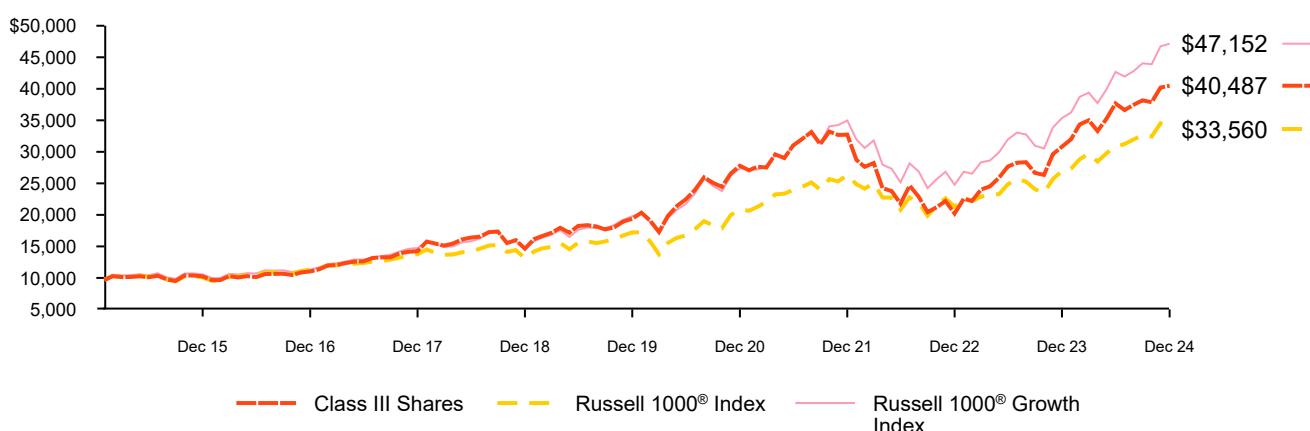

Stock selection in the real estate and energy sectors detracted from performance. While no other sectors detracted from absolute performance, the Fund lagged in the IT services industry largely due to a position in a provider of a cloud-based, software-as-a-service platform for global enterprises.
