The Markets in Review

Dear Shareholder,

The combination of continued economic growth and cooling inflation provided a supportive backdrop for investors during the 12-month reporting period ended December 31, 2023. Significantly tighter monetary policy helped to rein in inflation, and the Consumer Price Index decelerated substantially in the first half of the year before stalling between 3% and 4% in the second half. A moderating labor market helped ease inflationary pressure, although wages continued to grow. Wage and job growth powered robust consumer spending, backstopping the economy. On October 7, 2023, Hamas launched a horrific attack on Israel. The ensuing war will have a significant humanitarian impact and could lead to heightened economic and market volatility. We see geopolitics as a structural market risk going forward. See our geopolitical risk dashboard at blackrock.com for more details.

Equity returns were robust during the period, as interest rates stabilized and the economy proved to be more resilient than many investors expected. The U.S. economy continued to show strength, and growth further accelerated in the third quarter of 2023. Large-capitalization U.S. stocks posted particularly substantial gains, supported by the performance of a few notable technology companies and small-capitalization U.S. stocks also advanced. Meanwhile, international developed market equities and emerging market stocks posted solid gains.

The 10-year U.S. Treasury yield ended 2023 where it began despite an eventful year that saw significant moves in bond markets. Overall, U.S. Treasuries gained as investors began to anticipate looser financial conditions. The corporate bond market benefited from improving economic sentiment, although high-yield corporate bond prices fared significantly better than investment-grade bonds as demand from yield-seeking investors remained strong.

The U.S. Federal Reserve (the "Fed"), attempting to manage persistent inflation, raised interest rates four times during the 12-month period, but paused its tightening in the second half of the period. The Fed also wound down its bond-buying programs and incrementally reduced its balance sheet by not replacing securities that reach maturity.

Supply constraints appear to have become an embedded feature of the new macroeconomic environment, making it difficult for developed economies to increase production without sparking higher inflation. Geopolitical fragmentation and an aging population risk further exacerbating these constraints, keeping the labor market tight and wage growth high. Although the Fed has stopped tightening for now, we believe that the new economic regime means that the Fed will need to maintain high rates for an extended period despite the market's hopes for interest rate cuts, as reflected in the recent rally. In this new regime, we anticipate greater volatility and dispersion of returns, creating more opportunities for selective portfolio management.

We believe developed market equities have priced in an optimistic scenario for rate cuts, which we view as premature, so we prefer an underweight stance in the near term. Nevertheless, we are overweight on Japanese stocks as shareholder-friendly policies generate increased investor interest. We also believe that stocks with an AI tilt should benefit from an investment cycle that is set to support revenues and margins. In credit, there are selective opportunities in the near term despite tighter credit and financial conditions. For fixed income investing with a six- to twelve-month horizon, we see the most attractive investments in short-term U.S. Treasuries, U.S. mortgage-backed securities, and hard-currency emerging market bonds.

Overall, our view is that investors need to think globally, position themselves to be prepared for a decarbonizing economy, and be nimble as market conditions change. We encourage you to talk with your financial advisor and visit blackrock.com for further insight about investing in today's markets.

Sincerely,

Rob Kapito

Investment Objective

BlackRock Advantage Large Cap Core Portfolio's (the "Fund") investment objective is to seek long-term capital appreciation.

Portfolio Management Commentary

How did the Fund perform?

For the 12-month period ended December 31, 2023, the Fund underperformed its benchmark, the Russell 1000® Index.

What factors influenced performance?

Sentiment- and macro-related measures were the largest detractors during the reporting period. Positioning in the healthcare sector hurt performance in the second quarter of 2023 by incorrectly assessing merger and acquisition activity and drug trial outcomes. Text-based measures that gather sentiment from conference calls struggled in life sciences and pharmaceutical companies. Additionally, trend measures that gauge sentiment from mobile app usage detracted in industrials. Measures capturing bond market sentiment and evaluating default expectations also detracted by unsuccessfully positioning the portfolio for volatility in the fixed-income markets.

Macro-related insights also detracted, as they struggled to capture evolving market dynamics. An insight capturing investor interest at the industry level led to an unsuccessful overweight in consumer discretionary stocks.

Although the Fund underperformed, certain stock selection measures provided ballast. Fundamental valuation measures benefited from an uptrend in interest rates that broadly rewarded value styles. Insights looking at company sales, cash flows, and external financing levels also worked well throughout the period. Insights favoring companies that invest in research and development drove successful positioning in communication services companies, contributing to performance.

Macro-related insights also contributed positively by correctly positioning the portfolio to capitalize on changing market themes. In particular, text-based measures driving top-down industry positioning from news stories, as well as an insight identifying companies likely to benefit from the emerging artificial intelligence ("AI") theme, helped results. These measures drove a successful overweight to information technology stocks that benefitted from the AI-led market rally.

Describe recent portfolio activity.

The Fund maintained a balanced allocation of risk across all major performance drivers, while adding several new signals to the existing set of stock selection insights. The Fund built upon its alternative data capabilities with enhanced data sets to capture informed investor positioning and identify emerging trends. Further, the Fund expanded its employee-related measures by adding an insight that identifies organizations at risk for emerging labor disputes. During the banking crisis in March 2023, the Fund added a new bank quality insight to identify firms with less exposure to uninsured deposits and commercial real estate. The Fund developed a signal to identify firms exposed to the AI ecosystem, and it added a new version of the broker sentiment signal to capture sentiment by using a large language model. The Fund developed new insights related to company managements that evaluate language complexity and potential misdirection used by management in company calls, as well as looking at the turnover and overall instability of executive teams.

Describe portfolio positioning at period end.

The Fund maintained a largely sector-neutral positioning. It had slight overweights in the consumer discretionary and healthcare sectors and small underweights in financials and materials.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

GROWTH OF \$10,000 INVESTMENT

(a) Assuming transaction costs and other operating expenses, including investment advisory fees, if any. Does not include insurance-related fees and expenses. Under normal circumstances, the Fund seeks to invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in large cap equity securities and derivatives that have similar economic characteristics to such securities. The Fund's total returns prior to June 12, 2017 are the returns of the Fund when it followed different investment strategies under the name "BlackRock Large Cap Core Portfolio."

(b) An index that measures the performance of the large-cap segment of the U.S. equity universe. It is a subset of the Russell 3000® Index and includes approximately 1,000 of the largest securities based on a combination of their market capitalization and current index membership. The Russell 1000® Index represents approximately 93% of the U.S. market.

Performance

	Average Annual Total Returns ^(a)		
	1 Year	5 Years	10 Years
BlackRock Advantage Large Cap Core Portfolio	25.41%	14.85%	11.28%
Russell 1000® Index	26.53	15.52	11.80

(a) Average annual total returns are based on changes in net asset value for the periods shown and assume reinvestment of all distributions at net asset value on the ex-dividend date. Insurance-related fees and expenses are not reflected in these returns. The Fund's total returns prior to June 12, 2017 are the returns of the Fund when it followed different investment strategies under the name "BlackRock Large Cap Core Portfolio."

Past performance is not an indication of future results. Performance results do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles.

Expense Example

Actual			Hypothetical 5% Return			Annualized Expense Ratio
Beginning Account Value (07/01/23)	Ending Account Value (12/31/23)	Expenses Paid During the Period ^(a)	Beginning Account Value (07/01/23)	Ending Account Value (12/31/23)	Expenses Paid During the Period ^(a)	
\$ 1,000.00	\$ 1,084.60	\$ 2.63	\$ 1,000.00	\$ 1,022.68	\$ 2.55	0.50%

^(a) Expenses are equal to the annualized expense ratio for the class, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period shown).

See "Disclosure of Expenses" for further information on how expenses were calculated.

Investment Objective

BlackRock Capital Appreciation Portfolio's (the "Fund") investment objective is to seek long term growth of capital.

Portfolio Management Commentary

How did the Fund perform?

For the 12-month period ended December 31, 2023, the Fund outperformed its benchmark, the Russell 1000[®] Growth Index and the broad-market S&P 500[®] Index. The following discussion of relative performance pertains to the Russell 1000[®] Growth Index.

What factors influenced performance?

The largest contributors to the Fund's relative performance over the period included security selection in the information technology ("IT") sector along with positioning in consumer staples and industrials. In IT, an overweight position in Nvidia Corporation in the semiconductors & semiconductor equipment industry proved beneficial. In consumer staples a lack of exposure to the beverages sub-sector was additive. Lastly, in industrials, an overweight to the aerospace and defense industry contributed to performance, most notably holdings of TransDigm Group, Inc.

The largest detractors from relative performance included stock selection in the communication services sector along with positioning in the financials sector and the textiles, apparel and luxury goods sub-sector within consumer discretionary. In communication services, security selection in interactive media & services, specifically an underweight position in Meta Platforms, Inc., detracted from relative performance. In the financials sector an overweight position in Visa, Inc. detracted from relative performance. Lastly, an overweight position in Nike, Inc. within textiles, apparel & luxury goods weighed on relative performance.

Describe recent portfolio activity.

During the period, the most notable increase in the Fund's sector weightings was to IT, particularly within the semiconductors and semiconductor equipment industry. Exposure to communication services increased as well. Conversely, the Fund's exposure to the healthcare sector decreased the most, due to a reduced allocation to the life sciences tools and services industry. Exposure to the consumer discretionary sector decreased as well.

Describe portfolio positioning at period end.

Relative to its benchmark, the Fund ended the period with its largest overweight positions relative to the benchmark in the financials sector, followed by healthcare and information technology. The Fund's largest underweight position was in consumer staples, followed by consumer discretionary and communication services.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

GROWTH OF \$10,000 INVESTMENT

^(a) Assuming transaction costs and other operating expenses, including investment advisory fees, if any. Does not include insurance-related fees and expenses. The Fund will seek to achieve its investment objective by investing primarily in a diversified portfolio consisting primarily of common stock of U.S. companies that Fund management believes have exhibited above-average growth rates in earnings over the long term.

^(b) An unmanaged index that covers 500 leading companies and captures approximately 80% coverage of available market capitalization.

^(c) An index that measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values.

Performance

	Average Annual Total Returns ^(a)		
	1 Year	5 Years	10 Years
BlackRock Capital Appreciation Portfolio	49.60%	16.07%	12.96%
S&P 500 [®] Index	26.29	15.69	12.03
Russell 1000 [®] Growth Index	42.68	19.50	14.86

^(a) Average annual total returns are based on changes in net asset value for the periods shown and assume reinvestment of all distributions at net asset value on the ex-dividend date. Insurance-related fees and expenses are not reflected in these returns.

Past performance is not an indication of future results. Performance results do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles.

Expense Example

Actual			Hypothetical 5% Return			Annualized Expense Ratio
Beginning Account Value (07/01/23)	Ending Account Value (12/31/23)	Expenses Paid During the Period ^(a)	Beginning Account Value (07/01/23)	Ending Account Value (12/31/23)	Expenses Paid During the Period ^(a)	
\$ 1,000.00	\$ 1,116.90	\$ 2.72	\$ 1,000.00	\$ 1,022.63	\$ 2.60	0.51%

^(a) Expenses are equal to the annualized expense ratio for the class, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period shown).

BlackRock Global Allocation Portfolio's (the "Fund") investment objective is to seek high total investment return.

Portfolio Management Commentary

How did the Fund perform?

For the 12-month period ended December 31, 2023, the Fund underperformed its reference benchmark, which is comprised of the S&P 500[®] Index (36%), FTSE World (ex U.S.) Index (24%), ICE BofA Current 5-Year U.S. Treasury Index (24%) and FTSE Non-U.S. Dollar World Government Bond Index (16%) (the "Reference Benchmark"), as well as the broad-based all-equity benchmark, the FTSE World Index. The Fund invests in both equities and bonds; therefore, Fund management believes that the Reference Benchmark provides a more accurate representation of the Fund's composition and a more comparable means for measurement. The following discussion of relative performance pertains to the Reference Benchmark. The following commentary (including referenced allocation percentages) is based on the economic exposures of the Fund, which reflect adjustments for futures, swaps and options (except with respect to fixed income securities) and convertible bonds and may vary relative to the market value.

What factors influenced performance?

Within equities, security selection within information technology, industrials, consumer discretionary, communication services and materials weighed on relative performance, as did tactical short positioning within U.S. index futures implemented to help manage the overall beta (market sensitivity) of the portfolio. An overweight to the energy sector also detracted. Within fixed income, exposure to agency mortgage-backed securities negatively impacted performance. Exposure to gold-related securities and exposure to cash and cash equivalents detracted as well.

The largest contributor to performance was the Fund's management of duration (and corresponding interest rate sensitivity) via tactical positioning along the U.S. yield curve and exposure to short-term European interest rates. Credit exposure, most notably an allocation to high yield corporate bonds, was additive as well. Within equities, security selection within healthcare positively impacted performance, although this contribution was partially offset by an overweight to the sector. Underweight allocations to the consumer staples and real estate sectors also contributed to performance over the period.

The Fund used derivatives, which may include options, futures, swaps and forward contracts both to seek to enhance returns of the Fund and to hedge (or protect) against adverse movements in currency exchange rates, interest rates and movements in the securities markets. During the period, the Fund's use of derivatives, in aggregate, contributed to performance. The Fund's cash position had no material impact on performance.

Describe recent portfolio activity.

Over the 12-month period, the Fund's overall equity exposure increased from 53% to 68% of net assets. The Fund increased its equity exposure broadly across regions, with the largest additions in the United States and Japan, although exposure to Germany was trimmed. From a sector perspective, the Fund increased exposure to information technology, financials, industrials, consumer discretionary, consumer staples and communication services, and reduced exposure to energy and materials.

The Fund's allocation to fixed income decreased from 32% to 29% of net assets. Within fixed income, the Fund increased exposure to both developed non-U.S. and emerging market sovereign debt, as well as to high yield corporate bonds. The Fund decreased exposure to investment grade corporate bonds, securitized assets and U.S. interest rates. The Fund's total portfolio duration was tactically managed over the period and ended the period at 2.0 years, slightly above where it began the year. The Fund's allocation to commodity-related securities increased to slightly less than 1% of net assets.

Describe portfolio positioning at period end.

Relative to its Reference Benchmark, the Fund was overweight equities and underweight fixed income, with modest exposure to commodity-related assets and cash equivalents. Within equities, the Fund was overweight information technology, consumer discretionary, healthcare, industrials, energy, communication services and financials, and underweight real estate and materials. The Fund's largest regional overweights were to the United States and, to a lesser extent, Japan. The largest regional underweights were to Australia and, to a lesser extent, select emerging market countries. Within fixed income, the Fund was underweight developed market government bonds and overweight corporate bonds, securitized debt and bank loans. The total portfolio duration was 2.0 vs. the Reference Benchmark duration of 2.4 (total portfolio duration assumes equity duration of 0). From a currency perspective, the Fund was overweight the Japanese yen and Swiss franc and underweight the euro and U.S. dollar.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

GROWTH OF \$10,000 INVESTMENT

- ^(a) Assuming transaction costs, if any, and other operating expenses, including investment advisory fees. Does not include insurance-related fees and expenses.
- ^(b) The Fund invests in a portfolio of equity, debt and money market securities. Generally, the Fund's portfolio will include both equity and debt securities. The Fund generally seeks diversification across markets, industries and issuers as one of its strategies to reduce volatility. The Fund has no geographic limits on where it may invest.
- ^(c) A market cap weighted index representing the performance of the large- and mid-cap stocks from the developed and advanced emerging segments of the FTSE Global Equity Index Series and covers approximately 90-95% of the investable market capitalization.
- ^(d) An unmanaged weighted index comprised as follows: 36% S&P 500[®] Index; 24% FTSE World (ex U.S.) Index; 24% ICE BofA Current 5-Year U.S. Treasury Index; and 16% FTSE Non-U.S. Dollar World Government Bond Index.

Performance

	Average Annual Total Returns ^(a)

Money Market Overview For the 12-Month Period Ended December 31, 2023

Market Review

During the period ended December 31, 2023, economic conditions in the United States remained tight throughout most of the year. 2023 began with a heightened sense of uncertainty surrounding the health of regional banks, worries about the U.S. debt ceiling and sustained concerns regarding geopolitical risks. Several key barometers indicated that the Fed needed to continue their path of tightening monetary policy: unemployment started the year at 3.4% (and loosened slightly but remained strong, ending the year at 3.7%) and the consumer price index (“CPI”) started the year at 6.4% but decreased to 3.4% by the end of December 2023. This was largely due to Fed intervention. Recession fears began to fade as growth and labor remained supportive of a “soft-landing” narrative. At the end of the second and third quarters of 2023, real gross domestic product (“GDP”) increased at an annual rate of 2.4% and 2.9%, respectively.

The strength of the labor market and inflation in the U.S. prompted the Fed to begin a series of aggressive rate hikes starting in 2022. These rate hikes continued throughout the first half of 2023, with the Fed delivering another 100 basis points (or 1.00%) of hikes by July 2023 in an effort to stem spiraling price pressures, with that month’s CPI print coming in at 3.5%. After hiking rates in July 2023, the Fed left rates unchanged as inflation showed signs of moderating.

In a statement released in conjunction with the December 2023 Federal Open Market Committee (the “FOMC” or “Committee”) meeting, the Committee reiterated that inflation “remains elevated” while adding that it has “eased over the past year.” The statement was also modified to acknowledge that “growth of economic activity has slowed from its strong pace in the third quarter.” The Summary of Economic Projections (“SEP”) for December 2023 also reflected a slightly lower core inflation forecast for 2025, relative to the September 2023 forecasts. Core inflation is projected to return to the FOMC’s 2.00% target by year-end 2026. Additionally, the Committee again noted it will continue reducing its holdings of Treasury securities, agency debt and agency mortgage-backed securities as delineated in its Plans for Reducing the Size of the Federal Reserve’s Balance Sheet released in conjunction with the May 4, 2022 FOMC meeting.

Since reaching the U.S. debt ceiling resolution in June 2023, over \$2.2 trillion of T-bill supply came to market, with issuance skewed towards the shortest maturities. T-bill valuations remain contained while Treasury note yields have widened relative to overnight index swaps as markets react to supply expectations. While eligible funds continued to utilize the Fed’s reverse repurchase agreement (“RRP”) throughout the period, average daily utilization of the Fed’s RRP facility decreased in 2023 to \$1.75 trillion per day and to only \$989 billion per day for the last quarter. However, on December 29, 2023, RRP balances jumped by \$300 billion to \$1.0 trillion.

The secured overnight financing rate (“SOFR”)—a broad measure of the cost of borrowing cash overnight collateralized by Treasury securities— started the year at 4.31% and rose in line with rate hikes delivered by the FOMC. SOFR closed 2023 at 5.38% and averaged 5.00% for the year. The Top 90-Day US Commercial Paper Placed index, which started the year at 4.60%, trended upward in 2023, ending the year at 5.37%. The index peaked at 5.56% in October 2023. Industry-wide, institutional money market mutual funds (“MMFs”) experienced net inflows of approximately \$1.1 trillion during the year. Of this, assets of institutional government, prime and municipal MMFs experienced \$856 billion, \$281 billion and \$11 billion of inflows, respectively.

Portfolio Review

The prevailing investment themes in 2023 included the tightening of monetary policy by the FOMC and other central banks, concerns around the regional banking sector, rising inflation and geopolitical concerns. Yields across the balance of the Treasury curve rose as the Fed delivered rate hikes in an effort to quell inflation. Since the beginning of this rate hiking cycle, we have preferred a below-neutral duration profile across our government funds. With respect to adding duration, we are now targeting a slightly above neutral stance and view fixed rate extensions as providing fairly attractive valuation points now that a more stable macro-economic environment has developed.

Despite economic developments indicating that the U.S. economy remains resilient, which underpinned market expectations of a soft landing, markets pulled forward the probability of interest rate cuts in 2024 with more than a 60% chance of 25bps cut in March 2024 and approximately 140bps of cuts in total by the end of the year.

Outlook

FOMC rate policy bias has shifted toward a more balanced approach by remaining restrictive enough to put continued downward pressure on inflation while providing support to the economy should it be required to maintain positive economic growth. Fed RRP balances are expected to drain through 2024, as investors who favored overnight repo as an alternative to short-dated government securities continue to rotate into new Treasury supply and dealer repo as their rates remain more attractive, in our opinion. Net new T-Bill supply is expected to pick-up in the first quarter of 2024. Demand, in our view, will be driven by investor’s assessment of future monetary policy actions and prevailing valuations.

Past performance is not an indication of future results. Index performance is shown for illustrative purposes only. You cannot invest directly in an index.

Investment Objective

BlackRock Government Money Market Portfolio's (the "Fund") investment objective is to seek to preserve capital, to maintain liquidity and achieve the highest possible current income consistent with the foregoing.

Portfolio Information**CURRENT SEVEN-DAY YIELDS**

Investment Objective

BlackRock High Yield Portfolio's (the "Fund") investment objective is to seek to maximize total return, consistent with income generation and prudent investment management.

Portfolio Management Commentary

How did the Fund perform?

During the 12-month period ended December 31, 2023, the Fund underperformed its benchmark, the Bloomberg U.S. Corporate High Yield 2% Issuer Capped Index.

What factors influenced performance?

In sector terms, an underweight allocation to retailers and security selection within both telecommunications-wireless and finance companies detracted from relative performance. The Fund's cash position also weighed on performance in a strong market for high yield.

On the upside, high-yield corporate bonds experienced strong positive returns during the period, as credit sentiment was supported by continued declines in inflation and resilient economic data.

In sector terms, security selection within technology, metals and mining and chemicals contributed positively to performance relative to the benchmark. By credit quality, the Fund's underweight allocation to BB-rated issuers and security selection within B-rated issuers was additive.

Describe recent portfolio activity.

While key positioning themes have remained broadly consistent, the Fund tactically navigated sector- and issuer-level positioning to take advantage of market opportunities. In this vein, the Fund reduced exposure to investment grade corporate bonds throughout the period as more interesting relative value opportunities developed within the high yield market. The Fund also increased its position in B-rated credits and decreased its position in BB-rated credits.

Describe portfolio positioning at period end.

Within the Fund's core allocation to high yield corporate bonds, the Fund was underweight BB-rated credits and overweight B-rated credits. The Fund also held a slight overweight to CCC-rated issues while maintaining an underweight to the highest yielding, most stressed issuers within that ratings segment. The Fund continued to hold a tactical allocation to investment grade corporate bonds.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

GROWTH OF \$10,000 INVESTMENT

(a) Assuming transaction costs and other operating expenses, including investment advisory fees, if any. Does not include insurance-related fees and expenses. The Fund invests primarily in non-investment grade bonds with maturities of ten years or less. The Fund normally invests at least 80% of its assets in high yield bonds. On September 17, 2018, the Fund acquired all of the assets, subject to the liabilities, of BlackRock High Yield Portfolio (the "Predecessor Fund"), a series of BlackRock Series Fund, Inc., through a tax-free reorganization (the "Reorganization"). The Predecessor Fund is the performance and accounting survivor of the Reorganization.

(b) An unmanaged index comprised of issuers that meet the following criteria: at least \$150 million par value outstanding; maximum credit rating of Ba1; at least one year to maturity; and no issuer represents more than 2% of the index.

Performance

	Standardized 30-Day Yield ^(b)	Unsubsidized 30-Day Yield ^(b)	Average Annual Total Returns ^(a)		
			1 Year	5 Years	10 Years
BlackRock High Yield Portfolio	7.09%	6.02%	12.80%	5.77%	4.49%
Bloomberg U.S. Corporate High Yield 2% Issuer Capped Index	—	—	13.44	5.35	4.59

(a) Average annual total returns are based on changes in net asset value for the periods shown and assume reinvestment of all distributions at net asset value on the ex-dividend/payable date. Insurance-related fees and expenses are not reflected in these returns. On September 17, 2018, the Fund acquired all of the assets, subject to the liabilities, of the Predecessor Fund, a series of BlackRock Series Fund, Inc., through the Reorganization. The Predecessor Fund is the performance and accounting survivor of the Reorganization.

(b) The standardized 30-day yield includes the effects of any waivers and/or reimbursements. The unsubsidized 30-day yield excludes the effects of any waivers and/or reimbursements.

Past performance is not an indication of future results. Performance results do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

Performance results may include adjustments made for financial reporting purposes in accordance with U.S. generally accepted accounting principles.

Expense Example

^(a) Expenses are equal to the annualized expense ratio for the class, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period shown).

See "Disclosure of Expenses" for further information on how expenses were calculated.

Portfolio Information

CREDIT QUALITY ALLOCATION

Credit Rating ^(a)	Percent of Total Investments ^(b)
A	1.0%
BBB/Baa	4.8
BB/Ba	41.8
B	40.9
CCC/Caa	8.8
NR	2.7

^(a) For financial reporting purposes, credit quality ratings shown above reflect the highest rating assigned by either S&P Global Ratings or Moody's Investors Service if ratings differ. These rating agencies are independent, nationally recognized statistical rating organizations and are widely used. Investment grade ratings are credit ratings of BBB/Baa or higher. Below investment grade ratings are credit ratings of BB/Ba or lower. Investments designated NR are not rated by either rating agency. Unrated investments do not necessarily indicate low credit quality. Credit quality ratings are subject to change.

^(b) Excludes short-term securities, options purchased and options written.

Investment Objective

BlackRock Sustainable Balanced Portfolio's (the "Fund") investment objective is to seek high total investment return.

Portfolio Management Commentary

How did the Fund perform?

For the 12-month period ended December 31, 2023, the Fund outperformed its blended reference benchmark (60% MSCI All Country World Index/ 40% Bloomberg U.S. Aggregate Bond Index).

What factors influenced performance?

The Fund's tactical asset allocation positioning contributed to performance. An overweight in U.S. equities was a large contributor, as the market rallied on indications of an end to the Fed's hiking cycle and continued strength in U.S. economic growth. An overweight in Japanese stocks contributed, as well. Currency positioning also helped performance, primarily as a result of a short position in the U.S. dollar against a basket of developed market currencies. Security selection strategies further contributed to the Fund's return in 2023. In equities, performance was driven by thematic insights that evaluate enthusiasm about artificial intelligence, as well as sentiment measures that assess broker sentiment and informed investor positioning. Selection in mortgage-backed securities was the largest contributor in fixed income. Overweights in select technology issuers also helped results.

On the other hand, an underweight to duration (interest rate sensitivity) detracted. While this aspect of the Fund's positioning was a positive when bonds were selling off in the first ten months of the period, the benefit was offset by the adverse effect of being underweight once the market began to rally in November and December 2023. Fundamental measures detracted from performance in equities, as valuation insights ran against the market's preference for growth stocks. Environmental, social and governance ("ESG") insights, particularly those related to green patent issuance, input efficiency, and human capital measures, also detracted. In fixed income, an underweight in the communication services sector pressured results. An underweight in electric utility companies (which screen poorly on ESG metrics due to carbon emissions) also detracted at a time in which these defensive issuers outperformed.

The Fund held derivatives as a part of its investment strategy. The portfolio management team uses derivatives as a means to manage risk and/or take outright views on equities and interest rates. The use of derivatives was a modest contributor to performance.

Describe recent portfolio activity.

The Fund entered 2023 with an overweight in equities (achieved through an overweight in the United States), as well as an underweight in U.S. duration. It maintained this broad positioning over the remainder of the period. The investment adviser increased the extent of the Fund's duration underweight in July 2023, largely by expanding its underweight at the long end of the U.S. yield curve. This shift reflected the possibility that fiscal concerns would prompt investors to demand higher yields on long-dated bonds. The Fund added the duration underweight again in December 2023 once the market began to price in a greater number of interest rate cuts for 2024 than the investment adviser believed was warranted.

The investment adviser added to the Fund's underweight in the U.S. dollar versus a basket of developed market currencies. The Fed indicated a preference for supporting nominal growth and fiscal spending over raising rates to achieve consistent price stability, which the investment adviser believed would be a negative for the U.S. dollar.

In equities, the Fund maintained a preference for technology stocks due in part to the increasing enthusiasm surrounding artificial intelligence. The investment adviser also had a positive view on the consumer discretionary and industrials sectors. The investment adviser employed a defensive approach in fixed income, with a tilt toward higher-quality sectors such as technology, banking, insurance, and consumer staples.

Describe portfolio positioning at period end.

The Fund had a pro-cyclical posture, with an overweight in equities and an underweight in bonds. This positioning reflected the investment adviser's belief that global growth would remain resilient and financial conditions had further to tighten. U.S. inflation had fallen since its peak in 2022 but, in the investment adviser's view, the market was not appropriately factoring in the possibility that inflation could remain elevated.

The Fund was overweight in the euro, Canadian dollar, and Australian dollar versus the U.S. dollar on the view that the Fed would have to support the government's increased financing needs. In equities, the Fund was overweight in the technology, consumer discretionary, and industrials sectors. In fixed income, the investment adviser maintained overweight positions in investment-grade and high yield corporate bonds.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

GROWTH OF \$10,000 INVESTMENT

^(a) Assuming transaction costs and other operating expenses, including investment advisory fees, if any. Does not include insurance-related fees and expenses. The Fund invests in a combination of equity securities, fixed-income securities and derivatives. The Fund's total returns prior to April 8, 2022 are the returns of the Fund when it followed a different investment objective and different investment strategies and investment process under the name "BlackRock Balanced Capital Portfolio".

^(b) A broad-based flagship benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market.

^(c) A customized weighted index comprised of the returns of the MSCI All Country World Index (60%) and Bloomberg U.S. Aggregate Bond Index (40%).

^(d) An index that captures large- and mid-cap representation across certain developed and emerging markets.

The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance returns and net asset value (“NAV”). However, there is no guarantee that these objectives can be achieved in all interest rate environments.

The Funds may utilize leverage by entering into reverse repurchase agreements.

In general, the concept of leveraging is based on the premise that the financing cost of leverage, which is based on short-term interest rates, is normally lower than the income earned by each Fund on its longer-term portfolio investments purchased with the proceeds from leverage. To the extent that the total assets of each Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Fund’s shareholders benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is distributed to each Fund’s shareholders, and the value of these portfolio holdings is reflected in each Fund’s per share NAV. However, in order to benefit shareholders, the return on assets purchased with leverage proceeds must exceed the ongoing costs associated with the leverage. If interest and other ongoing costs of leverage exceed a Fund’s return on assets purchased with leverage proceeds, income to shareholders is lower than if the Funds had not used leverage.

Furthermore, the value of each Fund’s portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can also influence the value of portfolio investments. As a result, changes in interest rates can influence each Fund’s NAV positively or negatively in addition to the impact on each Fund’s performance from leverage. Changes in the direction of interest rates are difficult to predict accurately, and there is no assurance that a Fund’s leveraging strategy will be successful.

The use of leverage also generally causes greater changes in each Fund’s NAV and dividend rates than comparable portfolios without leverage. In a declining market, leverage is likely to cause a greater decline in the NAV of a Fund’s shares than if the Fund were not leveraged. In addition, each Fund may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of the leverage instruments, which may cause the Fund to incur losses. The use of leverage may limit a Fund’s ability to invest in certain types of securities or use certain types of hedging strategies. Each Fund incurs expenses in connection with the use of leverage, all of which are borne by each Fund’s shareholders and may reduce income.

Disclosure of Expenses

Shareholders of each Fund may incur the following charges: (a) transactional expenses; and (b) operating expenses, including investment advisory fees and other fund expenses. The expense examples shown (which are based on a hypothetical investment of \$1,000 invested at the beginning of the period and held through the end of the period) are intended to assist shareholders both in calculating expenses based on an investment in each Fund and in comparing these expenses with similar costs of investing in other mutual funds.

The expense examples provide information about actual account values and actual expenses. Annualized expense ratios reflect contractual and voluntary fee waivers, if any. In order to estimate the expenses a shareholder paid during the period covered by this report, shareholders can divide their account value by \$1,000 and then multiply the result by the number corresponding to their Fund and share class under the heading entitled “Expenses Paid During the Period.”

The expense examples also provide information about hypothetical account values and hypothetical expenses based on a Fund’s actual expense ratio and an assumed rate of return of 5% per year before expenses. In order to assist shareholders in comparing the ongoing expenses of investing in these Funds and other funds, compare the 5% hypothetical examples with the 5% hypothetical examples that appear in shareholder reports of other funds.

The expenses shown in the expense examples are intended to highlight shareholders’ ongoing costs only and do not reflect transactional expenses, such as sales charges, if any. Therefore, the hypothetical examples are useful in comparing ongoing expenses only and will not help shareholders determine the relative total expenses of owning different funds. If these transactional expenses were included, shareholder expenses would have been higher.

Derivative Financial Instruments

The Funds may invest in various derivative financial instruments. These instruments are used to obtain exposure to a security, commodity, index, market, and/or other assets without owning or taking physical custody of securities, commodities and/or other referenced assets or to manage market, equity, credit, interest rate, foreign currency exchange rate, commodity and/or other risks. Derivative financial instruments may give rise to a form of economic leverage and involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the instrument. Pursuant to Rule 18f-4 under the 1940 Act, among other things, the Funds must either use derivative financial instruments with embedded leverage in a limited manner or comply with an outer limit on fund leverage risk based on value-at-risk. The Funds’ successful use of a derivative financial instrument depends on the investment adviser’s ability to predict pertinent market movements accurately, which cannot be assured. The use of these instruments may result in losses greater than if they had not been used, may limit the amount of appreciation a Fund can realize on an investment and/or may result in lower distributions paid to shareholders. The Funds’ investments in these instruments, if any, are discussed in detail in the Notes to Financial Statements.

				\$ 2,230	\$ (43)	\$ 4,965,096	\$ 110,441	\$ —	\$ —

- (a) Represents net amount purchased (sold).
(b) All or a portion represents securities lending income earned from the reinvestment of cash collateral from loaned securities, net of fees and collateral investment expenses, and other payments to and from borrowers of securities.

For Fund compliance purposes, the Fund's industry classifications refer to one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by the investment adviser. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

December 31, 2023

Derivative Financial Instruments Outstanding as of Period End**Futures Contracts**

Description	Number of Contracts	Expiration Date	Notional Amount (000)	Value/Unrealized Appreciation (Depreciation)
Long Contracts				
S&P 500 E-Mini Index	8	03/15/24	\$ 1,928	\$ 43,504

Derivative Financial Instruments Categorized by Risk Exposure

As of period end, the fair values of derivative financial instruments located in the Statements of Assets and Liabilities were as follows:

	Commodity Contracts	Credit Contracts	Equity Contracts	Foreign Currency Exchange Contracts	Interest Rate Contracts	Other Contracts	Total
Assets — Derivative Financial Instruments							
Futures contracts							
Unrealized appreciation on futures contracts ^(a)	\$ —	\$ —	\$ 43,504	\$ —	\$ —	\$ —	\$ 43,504

^(a) Net cumulative unrealized appreciation (depreciation) on futures contracts, if any, are reported in the Schedule of Investments. In the Statements of Assets and Liabilities, only current day's variation margin is reported in receivables or payables and the net cumulative unrealized appreciation (depreciation) is included in accumulated earnings (loss).

For the period ended December 31, 2023, the effect of derivative financial instruments in the Statements of Operations was as follows:

	Commodity Contracts	Credit Contracts	Equity Contracts	Foreign Currency Exchange Contracts	Interest Rate Contracts	Other Contracts	Total
Net Realized Gain (Loss) from							
Futures contracts	\$ —	\$ —	\$ 214,054	\$ —	\$ —	\$ —	\$ 214,054

- (a) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (b) Variable rate security. Interest rate resets periodically. The rate shown is the effective interest rate as of period end. Security description also includes the reference rate and spread if published and available.
- (c) This security may be resold to qualified foreign investors and foreign institutional buyers under Regulation S of the Securities Act of 1933.
- (d) Security is valued using significant unobservable inputs and is classified as Level 3 in the fair value hierarchy.
- (e) All or a portion of this security is on loan.
- (f) Non-income producing security.
- (g) Restricted security as to resale, excluding 144A securities. The Fund held restricted securities with a current value of \$3,382,677, representing 2.29% of its net assets as of period end, and an original cost of \$3,474,331.
- (h) All or a portion of the security has been pledged and/or segregated as collateral in connection with outstanding exchange-traded options written.
- (i) All or a portion of the security is held by a wholly-owned subsidiary. See Note 1 of the Notes to Consolidated Financial Statements for details on the wholly-owned subsidiary.
- (j) Investment does not issue shares.
- (k) Payment-in-kind security which may pay interest/dividends in additional par/shares and/or in cash. Rates shown are the current rate and possible payment rates.
- (l) Convertible security.
- (m) Issuer filed for bankruptcy and/or is in default.
- (n) Perpetual security with no stated maturity date.
- (o) Zero-coupon bond.
- (p) Step coupon security. Coupon rate will either increase (step-up bond) or decrease (step-down bond) at regular intervals until maturity. Interest rate shown reflects the rate currently in effect.
- (q) Represents an unsettled loan commitment at period end. Certain details associated with this purchase are not known prior to the settlement date, including coupon rate.
- (r) Affiliate of the Fund.
- (s) Other interests represent beneficial interests in liquidation trusts and other reorganization or private entities.
- (t) Represents or includes a TBA transaction.
- (u) All or a portion of the security has been pledged as collateral in connection with outstanding OTC derivatives.
- (v) Rates are discount rates or a range of discount rates as of period end.
- (w) Annualized 7-day yield as of period end.
- (x) All or a portion of this security was purchased with the cash collateral from loaned securities.

^(a) The Fund receives the total return on a portfolio of long positions underlying the total return swap. The Fund pays the total return on a portfolio of short positions underlying the total return swap. In addition, the Fund pays or receives a variable rate of interest, based on a specified benchmark. The benchmark and spread are determined based upon the country and/or currency of the individual underlying positions.

The following are the specified benchmarks (plus or minus a range) used in determining the variable rate of interest:

	(b)	(d)
Range:	100 basis points	15-700 basis points
Benchmarks:	USD - 1D Overnight Bank Funding Rate (OBFR01)	USD - 1D Overnight Bank Funding Rate (OBFR01)

^(c) Amount includes \$8,289 of net dividends and financing fees.

^(e) Amount includes \$14,300 of net dividends and financing fees.

Derivative Financial Instruments Categorized by Risk Exposure

As of period end, the fair values of derivative financial instruments located in the Statements of Assets and Liabilities were as follows:

	Commodity Contracts	Credit Contracts	Equity Contracts	Foreign Currency Exchange Contracts	Interest Rate Contracts	Other Contracts	Total
Assets — Derivative Financial Instruments							
Futures contracts							
Unrealized appreciation on futures contracts ^(a)	\$ —	\$ —	\$ 118,965	\$ —	\$ 1,080,700	\$ —	\$ 1,199,665
Forward foreign currency exchange contracts							
Unrealized appreciation on forward foreign currency exchange contracts	—	—	—	291,855	—	—	291,855
Options purchased ^(b)							
Investments at value — unaffiliated ^(c)	—	190	614,251	20,120	364,862	3,246 ^(d)	1,002,669
Swaps — centrally cleared							
Unrealized appreciation on centrally cleared swaps ^(a)	—	61,639	—	—	1,619,071	1,754	1,682,464
Swaps — OTC							
Unrealized appreciation on OTC swaps; Swap premiums paid	—	11,909	24,405	—	73,945	—	110,259
	<u>\$ —</u>	<u>\$ 73,738</u>	<u>\$ 757,621</u>	<u>\$ 311,975</u>	<u>\$ 3,138,578</u>	<u>\$ 5,000</u>	<u>\$ 4,286,912</u>
Liabilities — Derivative Financial Instruments							
Futures contracts							
Unrealized depreciation on futures contracts ^(a)	\$ —	\$ —	\$ 152,056	\$ —	\$ 1,244,156	\$ —	\$ 1,396,212
Forward foreign currency exchange contracts							
Unrealized depreciation on forward foreign currency exchange contracts	—	—	—	133,640	—	—	133,640
Options written ^(b)							
Options written at value	—	—	106,043	3,443	145,946	—	255,432
Swaps — centrally cleared							
Unrealized depreciation on centrally cleared swaps ^(a)	—	887	—	—	904,675	—	905,562
Swaps — OTC							
Unrealized depreciation on OTC swaps; Swap premiums received	—	7,722	169,742	—	69,057	—	246,521
	<u>\$ —</u>	<u>\$ 8,609</u>	<u>\$ 427,841</u>	<u>\$ 137,083</u>	<u>\$ 2,363,834</u>	<u>\$ —</u>	<u>\$ 2,937,367</u>

^(a) Net cumulative unrealized appreciation (depreciation) on futures contracts and centrally cleared swaps, if any, are reported in the Consolidated Schedule of Investments. In the Statements of Assets and Liabilities, only current day's variation margin is reported in receivables or payables and the net cumulative unrealized appreciation (depreciation) is included in accumulated earnings (loss).

^(b) Includes forward settling swaptions.

^(c) Includes options purchased at value as reported in the Consolidated Schedule of Investments.

^(d) Includes dual binary options at value.

For the period ended December 31, 2023, the effect of derivative financial instruments in the Statements of Operations was as follows:

	Commodity Contracts	Credit Contracts	Equity Contracts	Foreign Currency Exchange Contracts	Interest Rate Contracts	Other Contracts	Total
Net Realized Gain (Loss) from							
Futures contracts	\$ —	\$ —	\$ (819,379)	\$ —	\$ 988,078	\$ —	\$ 168,699
Forward foreign currency exchange contracts	—	—	—	(501,874)	—	—	(501,874)
Options purchased ^(a)	—	(22,018)	(485,312)	(48,533)	(285,846)	—	(841,709)

	<u>\$ 529,550</u>	<u>\$ (427,623)</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 101,927</u>

^(a) The amount of derivatives available for offset is limited to the amount of derivative assets and/or liabilities that are subject to an MNA.

^(b) Net amount may also include forward foreign currency exchange contracts that are not required to be collateralized.

^(c) Net amount represents the net amount receivable from the counterparty in the event of default.

^(d) Net amount represents the net amount payable due to the counterparty in the event of default. Net amount may be offset further by the options receivable/payable on the Statements of Assets and Liabilities.

Fair Value Hierarchy as of Period End

Various inputs are used in determining the fair value of financial instruments. For a description of the input levels and information about the Fund's policy regarding valuation of financial instruments, refer to the Notes to Financial Statements.

The following table summarizes the Fund's financial instruments categorized in the fair value hierarchy. The breakdown of the Fund's financial instruments into major categories is disclosed in the Consolidated Schedule of Investments above.

	\$ (346,230)	\$ 681,254	\$ —	\$ 335,024

^(a) Unfunded floating rate loan interests are valued at the unrealized appreciation (depreciation) on the commitment.

^(b) Certain investments of the Fund were fair valued using NAV as a practical expedient as no quoted market value is available and therefore have been excluded from the fair value hierarchy.

^(c) Derivative financial instruments are swaps, futures contracts, forward foreign currency exchange contracts and options written. Swaps, futures contracts and forward foreign currency exchange contracts are valued at the unrealized appreciation (depreciation) on the instrument and options written are shown at value.

Consolidated Schedule of Investments (continued)

BlackRock Global Allocation Portfolio

December 31, 2023

A reconciliation of Level 3 financial instruments is presented when the Fund had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the year in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset- Backed Securities	Common Stocks	Corporate Bonds	Fixed Rate Loan Interests	Floating Rate Loan Interests	Options Purchased	Other Interests	Preferred Securities	Unfunded Floating Rate Loan Interests	Warrants	Total
Investments											
Assets/Liabilities											
Opening balance, as of December 31,											
2022	\$ —	\$ 893,762	\$ 1,227,700	\$ —	\$ 1,367,048	\$ 12,408	\$ 216,702	\$ 3,228,781	\$ —	\$ 18,896	\$ 6,965,297
Transfers into Level 3	—	20,289	—	—	29,720	—	—	—	—	—	50,009
Transfers out of Level 3	—	—	—	—	(15,479)	—	—	—	—	—	(15,479)
Other ^(a)	170,699	—	(28,135)	194,173	(336,737)	—	—	—	—	—	—
Accrued discounts/premiums	—	—	(9,509)	1,061	4,945	—	—	—	—	—	(3,503)
Net realized gain (loss)	—	(1)	4,413	891	(44,095)	(15,063)	—	—	—	—	(53,855)
Net change in unrealized appreciation (depreciation) ^{(b)(c)}	6,061	(304,690)	(244,293)	6,280	52,243	2,655	(71,549)	(208,152)	22	6,750	(754,673)
Purchases	—	291,215	1,085,523	—	138,793	—	—	162,935	—	12,874	1,691,340
Sales	—	(16,647)	(159,073)	(83,157)	(439,980)	—	—	(180,859)	—	(2,017)	(881,733)
Closing balance, as of December 31, 2023	\$ 176,760	\$ 883,928	\$ 1,876,626	\$ 119,248	\$ 756,458	\$ —	\$ 145,153	\$ 3,002,705	\$ 22	\$ 36,503	\$ 6,997,403
Net change in unrealized appreciation (depreciation) on investments still held at December 31, 2023 ^(c)	\$ 6,061	\$ (315,107)	\$ (247,444)	\$ 6,280	\$ 8,285	\$ —	\$ (71,549)	\$ (166,964)	\$ 22	\$ 13,980	\$ (766,436)

^(a) Certain Level 3 investments were re-classified between Asset-Backed Securities, Corporate Bonds, Fixed Rate Loan Interests and Floating Rate Loan Interests.

^(b) Included in the related net change in unrealized appreciation (depreciation) in the Statements of Operations.

^(c) Any difference between net change in unrealized appreciation (depreciation) and net change in unrealized appreciation (depreciation) on investments still held at December 31, 2023 is generally due to investments no longer held or categorized as Level 3 at period end.

Consolidated Schedule of Investments (continued)

BlackRock Global Allocation Portfolio

December 31, 2023

The following table summarizes the valuation approaches used and unobservable inputs utilized by the Valuation Committee to determine the value of certain of the Fund's Level 3 financial instruments as of period end. The table does not include Level 3 financial instruments with values based upon unadjusted third-party pricing information in the amount of \$96,318. A significant change in the third-party information could result in a significantly lower or higher value of such Level 3 investments.

	Value	Valuation Approach	Unobservable Inputs	Range of Unobservable Inputs Utilized ^(a)	Weighted Average of Unobservable Inputs Based on Fair Value
Assets					
Asset Backed Securities	\$ 176,760	Income	Discount Rate	9%	—
Common Stocks	871,987	Market	Revenue Multiple	1.00x – 22.00x	5.63x
			Volatility	30% – 80%	76%
			Time to Exit	0.3 – 3.0 years	2.8 years
			EBITDA Multiple	10.72x	—
			Gross Profit Multiple	15.00x	—
		Income	Discount Rate	18%	—
Corporate Bonds	1,876,626	Income	Discount Rate	12% – 56%	18%
			Estimated Recovery Value	40%	—
Fixed Rate Loan Interests	119,248	Income	Discount Rate	13%	—
Floating Rate Loan Interests	682,960	Income	Discount Rate	7% – 15%	11%
Other Interests	145,153	Income	Discount Rate	8% – 10%	9%
Preferred Stocks ^(b)	3,002,705	Market	Revenue Multiple	1.00x – 31.00x	15.05x
			EBIDTAR Multiple	8.75x	—
			Volatility	30% – 88%	62%
			Time to Exit	0.1 – 5.0 years	2.4 years
			Market Adjustment Multiple	1.20x	—
			Gross Profit Multiple	28.25x	—
			Direct Profit Multiple	4.50x	—
		Income	Discount Rate	11%	—
Warrants	25,646	Market	Revenue Multiple	4.22x – 31.00x	12.04x
			Volatility	36% – 88%	72%
			Time to Exit	0.1 – 3.0 years	2.8 years
		Income	Discount Rate	26%	—
	<u>\$ 6,901,085</u>				

^(a) A significant change in unobservable input would have resulted in a correlated (inverse) significant change to value.

^(b) For the period end December 31, 2023, the valuation technique for certain investments classified as Preferred Stocks used recent prior transaction prices as inputs within the model used for the approximation of fair value.

See notes to financial statements.

- (a) Non-income producing security.
- (b) Restricted security as to resale, excluding 144A securities. The Fund held restricted securities with a current value of \$9,964, representing less than 0.05% of its net assets as of period end, and an original cost of \$25,124.
- (c) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (d) Issuer filed for bankruptcy and/or is in default.
- (e) This security may be resold to qualified foreign investors and foreign institutional buyers under Regulation S of the Securities Act of 1933.
- (f) Variable rate security. Interest rate resets periodically. The rate shown is the effective interest rate as of period end. Security description also includes the reference rate and spread if published and available.
- (g) Perpetual security with no stated maturity date.
- (h) Payment-in-kind security which may pay interest/dividends in additional par/shares and/or in cash. Rates shown are the current rate and possible payment rates.
- (i) When-issued security.
- (j) Convertible security.
- (k) Zero-coupon bond.
- (l) Step coupon security. Coupon rate will either increase (step-up bond) or decrease (step-down bond) at regular intervals until maturity. Interest rate shown reflects the rate currently in effect.
- (m) Affiliate of the Fund.
- (n) Other interests represent beneficial interests in liquidation trusts and other reorganization or private entities.
- (o) Annualized 7-day yield as of period end.

Affiliates

Investments in issuers considered to be affiliate(s) of the Fund during the year ended December 31, 2023 for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

Affiliated Issuer	Value at 12/31/22	Purchases at Cost	Proceeds from Sale	Net Realized Gain (Loss)	Change in Unrealized Appreciation (Depreciation)	Value at 12/31/23	Shares Held at 12/31/23	Income	Capital Gain Distributions from Underlying Funds
BlackRock Liquidity Funds, T-Fund, Institutional Class. \$	378,880	\$ —	\$ (119,963) ^(a)	\$ —	\$ —	258,917	258,917	\$ 16,616	\$ —

				\$ —	\$ 19,166	\$ 700,040		\$ 25,572	\$ —

(a) Represents net amount purchased (sold).

For Fund compliance purposes, the Fund's industry classifications refer to one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by the investment adviser. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

^(b) The maximum potential amount the Fund may pay should a negative credit event take place as defined under the terms of the agreement.

December 31, 2023

Balances Reported in the Statements of Assets and Liabilities for Centrally Cleared Swaps and Options Written

Description	Swap Premiums Paid	Swap Premiums Received	Unrealized Appreciation	Unrealized Depreciation	Value
Centrally Cleared Swaps ^(a)	\$ 2,200	\$ —	\$ 9,625	\$ —	\$ —
Options Written	N/A	N/A	597	—	(583)

^(a) Includes cumulative appreciation (depreciation) on centrally cleared swaps, as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statements of Assets and Liabilities and is net of any previously paid (received) swap premium amounts.

Derivative Financial Instruments Categorized by Risk Exposure

As of period end, the fair values of derivative financial instruments located in the Statements of Assets and Liabilities were as follows:

	Commodity Contracts	Credit Contracts	Equity Contracts	Foreign Currency Exchange Contracts	Interest Rate Contracts	Other Contracts	Total
Assets — Derivative Financial Instruments							
Futures contracts							
Unrealized appreciation on futures contracts ^(a)	\$ —	\$ —	\$ —	\$ —	\$ 2,467	\$ —	\$ 2,467
Forward foreign currency exchange contracts							
Unrealized appreciation on forward foreign currency exchange contracts	—	—	—	5,758	—	—	5,758
Options purchased							
Investments at value — unaffiliated ^(b)	—	—	2,195	—	—	—	2,195
Swaps — centrally cleared							
Unrealized appreciation on centrally cleared swaps ^(a)	—	9,625	—	—	—	—	9,625
	<u>\$ —</u>	<u>\$ 9,625</u>	<u>\$ 2,195</u>	<u>\$ 5,758</u>	<u>\$ 2,467</u>	<u>\$ —</u>	<u>\$ 20,045</u>

Liabilities — Derivative Financial Instruments

Futures contracts							
Unrealized depreciation on futures contracts ^(a)	\$ —	\$ —	\$ —	\$ —	\$ 12,001	\$ —	\$ 12,001
Options written							
Options written at value	—	—	583	—	—	—	583
	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 583</u>	<u>\$ —</u>	<u>\$ 12,001</u>	<u>\$ —</u>	<u>\$ 12,584</u>

^(a) Net cumulative unrealized appreciation (depreciation) on futures contracts and centrally cleared swaps, if any, are reported in the Schedule of Investments. In the Statements of Assets and Liabilities, only current day's variation margin is reported in receivables or payables and the net cumulative unrealized appreciation (depreciation) is included in accumulated earnings (loss).

^(b) Includes options purchased at value as reported in the Schedule of Investments.

For the period ended December 31, 2023, the effect of derivative financial instruments in the Statements of Operations was as follows:

	Commodity Contracts	Credit Contracts	Equity Contracts	Foreign Currency Exchange Contracts	Interest Rate Contracts	Other Contracts	Total
Net Realized Gain (Loss) from							
Futures contracts							
	\$ —	\$ —	\$ (16,270)	\$ —	\$ 11,631	\$ —	\$ (4,639)
Forward foreign currency exchange contracts							
	—	—	—	15,735	—	—	15,735
Options purchased ^(a)							
	—	—	(29,501)	—	—	—	(29,501)
Options written							
	—	—	14,780	—	—	—	14,780
Swaps							
	—	6,639	—	—	—	—	6,639
	<u>\$ —</u>	<u>\$ 6,639</u>	<u>\$ (30,991)</u>	<u>\$ 15,735</u>	<u>\$ 11,631</u>	<u>\$ —</u>	<u>\$ 3,014</u>
Net Change in Unrealized Appreciation (Depreciation) on							
Futures contracts							
	\$ —	\$ —	\$ —	\$ —	\$ (14,869)	\$ —	\$ (14,869)
Forward foreign currency exchange contracts							
	—	—	—	5,758	—	—	5,758
Options purchased ^(b)							
	—	—	(1,995)	—	—	—	(1,995)
Options written							
	—	—	(980)	—	—	—	(980)
Swaps							
	—	9,596	—	—	—	—	9,596
	<u>\$ —</u>	<u>\$ 9,596</u>	<u>\$ (2,975)</u>	<u>\$ 5,758</u>	<u>\$ (14,869)</u>	<u>\$ —</u>	<u>\$ (2,490)</u>

^(a) Options purchased are included in net realized gain (loss) from investments — unaffiliated.

^(b) Options purchased are included in net change in unrealized appreciation (depreciation) on investments — unaffiliated.

December 31, 2023

Average Quarterly Balances of Outstanding Derivative Financial Instruments

Futures contracts	
Average notional value of contracts — long	\$ 53,525
Average notional value of contracts — short	\$ 388,333
Forward foreign currency exchange contracts	
Average amounts sold — in USD	\$ 328,446
Options	
Average value of option contracts purchased	\$ 2,269
Average value of option contracts written	\$ 599
Credit default swaps	
Average notional value — sell protection	\$ 149,239

For more information about the Fund's investment risks regarding derivative financial instruments, refer to the Notes to Financial Statements.

Derivative Financial Instruments — Offsetting as of Period End

The Fund's derivative assets and liabilities (by type) were as follows:

	Assets	Liabilities
Derivative Financial Instruments		
Futures contracts	\$ 617	\$ 5
Forward foreign currency exchange contracts	5,758	—
Options ^(a)	2,195	583
Swaps — centrally cleared	—	285
Total derivative assets and liabilities in the Statements of Assets and Liabilities	\$ 8,570	\$ 873
Derivatives not subject to a Master Netting Agreement or similar agreement ("MNA")	(2,812)	(873)
Total derivative assets and liabilities subject to an MNA	\$ 5,758	\$ —

^(a) Includes options purchased at value which is included in Investments at value – unaffiliated in the Statements of Assets and Liabilities and reported in the Schedule of Investments.

The following table presents the Fund's derivative assets and liabilities by counterparty net of amounts available for offset under an MNA and net of the related collateral received by the Fund:

Counterparty	Derivative Assets Subject to an MNA by Counterparty	Derivatives Available for Offset	Non-cash Collateral Received	Cash Collateral Received	Net Amount of Derivative Assets ^{(a)(b)}
Toronto Dominion Bank	\$ 5,758	\$ —	\$ —	\$ —	\$ 5,758

^(a) Net amount may also include forward foreign currency exchange contracts that are not required to be collateralized.

^(b) Net amount represents the net amount receivable from the counterparty in the event of default.

Fair Value Hierarchy as of Period End

Various inputs are used in determining the fair value of financial instruments. For a description of the input levels and information about the Fund's policy regarding valuation of financial instruments, refer to the Notes to Financial Statements.

The following table summarizes the Fund's financial instruments categorized in the fair value hierarchy. The breakdown of the Fund's financial instruments into major categories is disclosed in the Schedule of Investments above.

	Level 1	Level 2	Level 3	Total
Assets				
Investments				
Long-Term Investments				
Common Stocks				
Capital Markets	\$ —	\$ 9,964	\$ —	\$ 9,964
Chemicals	14,555	—	—	14,555

(a) Variable rate security. Interest rate resets periodically. The rate shown is the effective interest rate as of period end. Security description also includes the reference rate and spread if published and available.

(b) Rounds to less than 1,000.

(c) Step coupon security. Coupon rate will either increase (step-up bond) or decrease (step-down bond) at regular intervals until maturity. Interest rate shown reflects the rate currently in effect.

(d) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.

(e) Non-income producing security.

(f) All or a portion of this security is on loan.

(g) This security may be resold to qualified foreign investors and foreign institutional buyers under Regulation S of the Securities Act of 1933.

(h) A security contractually bound to one or more other securities to form a single saleable unit which cannot be sold separately.

(i) Perpetual security with no stated maturity date.

(j) Issuer filed for bankruptcy and/or is in default.

(k) Security is valued using significant unobservable inputs and is classified as Level 3 in the fair value hierarchy.

(l) When-issued security.

(m) Affiliate of the Fund.

(n) Zero-coupon bond.

(o) Other interests represent beneficial interests in liquidation trusts and other reorganization or private entities.

(p) Represents or includes a TBA transaction.

(q) Annualized 7-day yield as of period end.

Schedule of Investments (continued)

December 31, 2023

^(f) All or a portion of this security was purchased with the cash collateral from loaned securities.

^(s) Rates are discount rates or a range of discount rates as of period end.

Affiliates

Investments in issuers considered to be affiliate(s) of the Fund during the year ended December 31, 2023 for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

^(a) Represents net amount purchased (sold).

^(b) All or a portion represents securities lending income earned from the reinvestment of cash collateral from loaned securities, net of fees and collateral investment expenses, and other payments to and from borrowers of securities.

^(c) As of period end, the entity is no longer held.

For Fund compliance purposes, the Fund's industry classifications refer to one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by the investment adviser. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

	\$ —	\$ 220,919	\$ 512,751	\$ 320,197	\$ (1,233,637)	\$ —	\$ (179,770)

Average Quarterly Balances of Outstanding Derivative Financial Instruments

Futures contracts							
Average notional value of contracts — long						\$	27,122,510
Average notional value of contracts — short						\$	53,357,532
Forward foreign currency exchange contracts							
Average amounts purchased — in USD						\$	1,449,082
Average amounts sold — in USD						\$	15,822,970
Credit default swaps							
Average notional value — buy protection						\$	17,325,000
Average notional value — sell protection						\$	1,392,188
Total return swaps							
Average notional value						\$	23,893,540

For more information about the Fund's investment risks regarding derivative financial instruments, refer to the Notes to Financial Statements.

Derivative Financial Instruments — Offsetting as of Period End

The Fund's derivative assets and liabilities (by type) were as follows:

	Assets	Liabilities
Derivative Financial Instruments		
Futures contracts	\$ 84,031	\$ 18,899
Forward foreign currency exchange contracts	336,367	44,328
Swaps — centrally cleared	5,367	—
Swaps — OTC ^(a)	2,931,371	—
Total derivative assets and liabilities in the Statements of Assets and Liabilities	\$ 3,357,136	\$ 63,227
Derivatives not subject to a Master Netting Agreement or similar agreement ("MNA")	(89,398)	(18,899)
Total derivative assets and liabilities subject to an MNA	\$ 3,267,738	\$ 44,328

^(a) Includes unrealized appreciation (depreciation) on OTC swaps and swap premiums (paid/received) in the Statements of Assets and Liabilities.

December 31, 2023

The following tables present the Fund's derivative assets and liabilities by counterparty net of amounts available for offset under an MNA and net of the related collateral received and pledged by the Fund:

Counterparty	Derivative Assets Subject to an MNA by Counterparty	Derivatives Available for Offset ^(a)	Non-cash Collateral Received	Cash Collateral Received ^(b)	Net Amount of Derivative Assets ^{(c)(d)}
BNP Paribas SA	\$ 3,072,062	\$ (42,434)	\$ —	\$ (2,730,000)	\$ 299,628
Canadian Imperial Bank of Commerce	90,104	—	—	—	90,104
Citibank NA	105,572	—	—	—	105,572
	<u>\$ 3,267,738</u>	<u>\$ (42,434)</u>	<u>\$ —</u>	<u>\$ (2,730,000)</u>	<u>\$ 495,304</u>

Counterparty	Derivative Liabilities Subject to an MNA by Counterparty	Derivatives Available for Offset ^(a)	Non-cash Collateral Pledged	Cash Collateral Pledged	Net Amount of Derivative Liabilities ^{(c)(e)}
BNP Paribas SA	\$ 42,434	\$ (42,434)	\$ —	\$ —	\$ —
Deutsche Bank AG	1,894	—	—	—	1,894
	<u>\$ 44,328</u>	<u>\$ (42,434)</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 1,894</u>

^(a) The amount of derivatives available for offset is limited to the amount of derivative assets and/or liabilities that are subject to an MNA.

^(b) Excess of collateral received/pledged, if any, from the individual counterparty is not shown for financial reporting purposes.

^(c) Net amount may also include forward foreign currency exchange contracts that are not required to be collateralized.

^(d) Net amount represents the net amount receivable from the counterparty in the event of default.

^(e) Net amount represents the net amount payable due to the counterparty in the event of default.

Fair Value Hierarchy as of Period End

Various inputs are used in determining the fair value of financial instruments. For a description of the input levels and information about the Fund's policy regarding valuation of financial instruments, refer to the Notes to Financial Statements.

The following table summarizes the Fund's financial instruments categorized in the fair value hierarchy. The breakdown of the Fund's financial instruments into major categories is disclosed in the Schedule of Investments above.

	Level 1	Level 2	Level 3	Total

Fair Value Hierarchy as of Period End (continued)

- ^(a) Certain investments of the Fund were fair valued using NAV as a practical expedient as no quoted market value is available and therefore have been excluded from the fair value hierarchy.
- ^(b) Derivative financial instruments are swaps, futures contracts and forward foreign currency exchange contracts. Swaps, futures contracts and forward foreign currency exchange contracts are valued at the unrealized appreciation (depreciation) on the instrument.

See notes to financial statements.

Notes to Financial Statements

1. ORGANIZATION

BlackRock Series Fund, Inc. ("Series Fund") and BlackRock Series Fund II, Inc. ("Series Fund II" and together with Series Fund, the "Companies" and each, a "Company") are each registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as open-end management investment companies. Each Company is organized as a Maryland corporation and is comprised of the separate portfolios indicated below. Series Fund is comprised of 5 separate portfolios and Series Fund II is comprised of 1 portfolio. The following are referred to herein collectively as the "Funds" or individually as a "Fund":

<i>Fund Name</i>	<i>Company</i>	<i>Herein Referred To As</i>	<i>Diversification Classification</i>
BlackRock Advantage Large Cap Core Portfolio	Series Fund	Advantage Large Cap Core	Diversified
BlackRock Capital Appreciation Portfolio	Series Fund	Capital Appreciation	Diversified
BlackRock Global Allocation Portfolio	Series Fund	Global Allocation	Diversified
BlackRock Government Money Market Portfolio	Series Fund	Government Money Market	Diversified
BlackRock High Yield Portfolio	Series Fund II	High Yield	Diversified
BlackRock Sustainable Balanced Portfolio	Series Fund	Sustainable Balanced	Diversified

The Funds offer shares to insurance companies for their separate accounts to fund benefits under certain variable annuity and variable life insurance contracts.

Advantage Large Cap Core, Capital Appreciation, Global Allocation, Government Money Market and Sustainable Balanced, together with certain other registered investment companies advised by BlackRock Advisors, LLC (the "Manager") or its affiliates, are included in a complex of funds referred to as the BlackRock Multi-Asset Complex.

High Yield, together with certain other registered investment companies advised by the Manager or its affiliates, is included in a complex of funds referred to as the BlackRock Fixed-Income Complex.

Government Money Market operates as a "government money market fund" under Rule 2a-7 under the 1940 Act. The Fund is not subject to discretionary liquidity fees.

Basis of Consolidation: The accompanying consolidated financial statements of Global Allocation include the accounts of BlackRock Cayman Global Allocation Portfolio I, Ltd. (the "Cayman Subsidiary"), which is a wholly-owned subsidiary of Global Allocation and primarily invests in commodity-related instruments and other derivatives. The Cayman Subsidiary enables Global Allocation to hold these commodity-related instruments and satisfy regulated investment company tax requirements. Global Allocation may invest up to 25% of its total assets in the Cayman Subsidiary. The net assets of the Cayman Subsidiary as of period end were \$4,896,152, which is 3.3% of Global Allocation's consolidated net assets. Intercompany accounts and transactions, if any, have been eliminated. The Cayman Subsidiary is subject to the same investment policies and restrictions that apply to Global Allocation, except that the Cayman Subsidiary may invest without limitation in commodity-related instruments.

2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements are prepared in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"), which may require management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates. Each Fund is considered an investment company under U.S. GAAP and follows the accounting and reporting guidance applicable to investment companies. Below is a summary of significant accounting policies:

Investment Transactions and Income Recognition: For financial reporting purposes, investment transactions are recorded on the dates the transactions are executed (the "trade dates"). Realized gains and losses on investment transactions are determined using the specific identification method. Dividend income and capital gain distributions, if any, are recorded on the ex-dividend dates. Non-cash dividends, if any, are recorded on the ex-dividend dates at fair value. Dividends from foreign securities where the ex-dividend dates may have passed are subsequently recorded when the Funds are informed of the ex-dividend dates. Under the applicable foreign tax laws, a withholding tax at various rates may be imposed on capital gains, dividends and interest. Upon notification from issuers, a portion of the dividend income received from a real estate investment trust may be redesignated as a reduction of cost of the related investment and/or realized gain. Interest income, including amortization and accretion of premiums and discounts on debt securities and payment-in-kind interest, are recognized daily on an accrual basis. For convertible securities, premiums attributable to the debt instrument are amortized, but premiums attributable to the conversion feature are not amortized.

Foreign Currency Translation: Each Fund's books and records are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars using exchange rates determined as of the close of trading on the New York Stock Exchange ("NYSE"). Purchases and sales of investments are recorded at the rates of exchange prevailing on the respective dates of such transactions. Generally, when the U.S. dollar rises in value against a foreign currency, the investments denominated in that currency will lose value; the opposite effect occurs if the U.S. dollar falls in relative value.

Each Fund does not isolate the effect of fluctuations in foreign exchange rates from the effect of fluctuations in the market prices of investments for financial reporting purposes. Accordingly, the effects of changes in exchange rates on investments are not segregated in the Statements of Operations from the effects of changes in market prices of those investments, but are included as a component of net realized and unrealized gain (loss) from investments. Each Fund reports realized currency gains (losses) on foreign currency related transactions as components of net realized gain (loss) for financial reporting purposes, whereas such components are generally treated as ordinary income for U.S. federal income tax purposes.

Foreign Taxes: The Funds may be subject to foreign taxes (a portion of which may be reclaimable) on income, stock dividends, capital gains on investments, or certain foreign currency transactions. All foreign taxes are recorded in accordance with the applicable foreign tax regulations and rates that exist in the foreign jurisdictions in which each Fund invests. These foreign taxes, if any, are paid by each Fund and are reflected in its Statements of Operations as follows: foreign taxes withheld at source are presented as a reduction of income, foreign taxes on securities lending income are presented as a reduction of securities lending income, foreign taxes on stock dividends are presented as "Foreign taxes withheld", and foreign taxes on capital gains from sales of investments and foreign taxes on foreign currency transactions are included in their respective net realized gain (loss) categories. Foreign taxes payable or deferred as of December 31, 2023, if any, are disclosed in the Statements of Assets and Liabilities.

Notes to Financial Statements (continued)

The Funds file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. The Funds may record a reclaim receivable based on collectability, which includes factors such as the jurisdiction's applicable laws, payment history and market convention. The Statements of Operations include tax reclaims recorded as well as professional and other fees, if any, associated with recovery of foreign withholding taxes.

Bank Overdraft: Certain Funds had outstanding cash disbursements exceeding deposited cash amounts at the custodian during the reporting period. The Funds are obligated to repay the custodian for any overdraft, including any related costs or expenses, where applicable. For financial reporting purposes, overdraft fees, if any, are included in interest expense in the Statements of Operations.

Collateralization: If required by an exchange or counterparty agreement, the Funds may be required to deliver/deposit cash and/or securities to/with an exchange, or broker-dealer or custodian as collateral for certain investments.

Distributions: For Government Money Market and High Yield, distributions from net investment income are declared daily and paid monthly. For Advantage Large Cap Core, Capital Appreciation, Global Allocation and Sustainable Balanced, distributions from net investment income are declared and paid at least annually. For each Fund, distributions of capital gains are recorded on the ex-dividend dates and made at least annually. The portion of distributions, if any, that exceeds a fund's current and accumulated earnings and profits, as measured on a tax basis, constitute a non-taxable return of capital. The character and timing of distributions are determined in accordance with U.S. federal income tax regulations, which may differ from U.S. GAAP.

Net income and realized gains from investments held by the Cayman Subsidiary are treated as ordinary income for tax purposes. If a net loss is realized by the Cayman Subsidiary in any taxable year, the loss will generally not be available to offset the Fund's ordinary income and/or capital gains for that year.

Deferred Compensation Plan: Under the Deferred Compensation Plan (the "Plan") approved by the Board of Directors of Series Fund II, the directors who are not "interested persons" of High Yield, as defined in the 1940 Act ("Independent Directors"), may defer a portion of their annual complex-wide compensation. Deferred amounts earn an approximate return as though equivalent dollar amounts had been invested in common shares of certain funds in the BlackRock Fixed-Income Complex selected by the Independent Directors. This has the same economic effect for the Independent Directors as if the Independent Directors had invested the deferred amounts directly in certain funds in the BlackRock Fixed-Income Complex.

The Plan is not funded and obligations thereunder represent general unsecured claims against the general assets of High Yield, as applicable. Deferred compensation liabilities, if any, are included in the Directors' and Officer's fees payable in the Statements of Assets and Liabilities and will remain as a liability of the Funds until such amounts are distributed in accordance with the Plan. Net appreciation (depreciation) in the value of participants' deferral accounts is allocated among the participating funds in the BlackRock Fixed-Income Complex and reflected as Directors and Officer expense on the Statements of Operations. The Trustee and Officer expense may be negative as a result of a decrease in value of the deferred accounts.

Indemnifications: In the normal course of business, a Fund enters into contracts that contain a variety of representations that provide general indemnification. A Fund's maximum exposure under these arrangements is unknown because it involves future potential claims against a Fund, which cannot be predicted with any certainty.

Other: Expenses directly related to a Fund are charged to that Fund. Other operating expenses shared by several funds, including other funds managed by the Manager, are prorated among those funds on the basis of relative net assets or other appropriate methods.

Global Allocation has an arrangement with its custodian whereby credits are earned on uninvested cash balances, which could be used to reduce custody fees and/or overdraft charges. Global Allocation may incur charges on overdrafts, subject to certain conditions.

3. INVESTMENT VALUATION AND FAIR VALUE MEASUREMENTS

Investment Valuation Policies: Each Fund's (except Government Money Market's) investments are valued at fair value (also referred to as "market value" within the financial statements) each day that the Fund is open for business and, for financial reporting purposes, as of the report date. U.S. GAAP defines fair value as the price a fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. The Boards of Directors of the Companies (each a "Board" and together the "Boards") have approved the designation of each Fund's Manager as the valuation designee for each Fund. Each Fund determines the fair values of its financial instruments using various independent dealers or pricing services under the Manager's policies. If a security's market price is not readily available or does not otherwise accurately represent the fair value of the security, the security will be valued in accordance with the Manager's policies and procedures as reflecting fair value. The Manager has formed a committee (the "Valuation Committee") to develop pricing policies and procedures and to oversee the pricing function for all financial instruments, with assistance from other BlackRock pricing committees. U.S. GAAP defines fair value as the price Government Money Market would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. Government Money Market's investments are valued under the amortized cost method which approximates current market value in accordance with Rule 2a-7 under the 1940 Act. Under this method, investments are valued at cost when purchased and, thereafter, a constant proportionate accretion of discounts and amortization of premiums are recorded until the maturity of the security. Government Money Market seeks to maintain its net asset value ("NAV") per share at \$1.00, although there is no assurance that it will be able to do so on a continuing basis.

Fair Value Inputs and Methodologies: The following methods and inputs are used to establish the fair value of each Fund's (except Government Money Market's) assets and liabilities:

- Equity investments traded on a recognized securities exchange are valued at that day's official closing price, as applicable, on the exchange where the stock is primarily traded. Equity investments traded on a recognized exchange for which there were no sales on that day may be valued at the last available bid (long positions) or ask (short positions) price.
- Fixed-income investments for which market quotations are readily available are generally valued using the last available bid price or current market quotations provided by independent dealers or third-party pricing services. Floating rate loan interests are valued at the mean of the bid prices from one or more independent brokers or dealers as obtained from a third-party pricing service. Pricing services generally value fixed-income securities assuming orderly transactions of an institutional round

Notes to Financial Statements (continued)

lot size, but a fund may hold or transact in such securities in smaller, odd lot sizes. Odd lots may trade at lower prices than institutional round lots. The pricing services may use matrix pricing or valuation models that utilize certain inputs and assumptions to derive values, including transaction data (e.g., recent representative bids and offers), market data, credit quality information, perceived market movements, news, and other relevant information. Certain fixed-income securities, including asset-backed and mortgage related securities may be valued based on valuation models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. The amortized cost method of valuation may be used with respect to debt obligations with sixty days or less remaining to maturity unless the Manager determines such method does not represent fair value.

- Exchange-traded funds (“ETFs”) and closed-end funds traded on a recognized securities exchange are valued at that day’s official closing price, as applicable, on the exchange where the stock is primarily traded. ETFs and closed-end funds traded on a recognized exchange for which there were no sales on that day may be valued at the last available bid (long positions) or ask (short positions) price.
- Investments in open-end U.S. mutual funds (including money market funds) are valued at that day’s published NAV.
- The Funds value their investment in SL Liquidity Series, LLC, Money Market Series (the “Money Market Series”) at fair value, which is ordinarily based upon their pro rata ownership in the underlying fund’s net assets.
- Futures contracts are valued based on that day’s last reported settlement or trade price on the exchange where the contract is traded.
- Forward foreign currency exchange contracts are valued at the mean between the bid and ask prices and are determined as of the close of trading on the NYSE based on that day’s prevailing forward exchange rate for the underlying currencies.
- Exchange-traded options are valued at the mean between the last bid and ask prices at the close of the options market in which the options trade. An exchange-traded option for which there is no mean price is valued at the last bid (long positions) or ask (short positions) price. If no bid or ask price is available, the prior day’s price will be used, unless it is determined that the prior day’s price no longer reflects the fair value of the option. Over-the-counter (“OTC”) options and options on swaps (“swaptions”) are valued by an independent pricing service using a mathematical model, which incorporates a number of market data factors, such as the trades and prices of the underlying instruments.
- Swap agreements are valued utilizing quotes received daily by independent pricing services or through brokers, which are derived using daily swap curves and models that incorporate a number of market data factors, such as discounted cash flows, trades and values of the underlying reference instruments.
- Repurchase agreements are valued at amortized cost, which approximates market value.

Generally, trading in foreign instruments is substantially completed each day at various times prior to the close of trading on the NYSE. Each business day, the Funds use current market factors supplied by independent pricing services to value certain foreign instruments (“Systematic Fair Value Price”). The Systematic Fair Value Price is designed to value such foreign securities at fair value as of the close of trading on the NYSE, which follows the close of the local markets.

If events (e.g., market volatility, company announcement or a natural disaster) occur that are expected to materially affect the value of such investment, or in the event that application of these methods of valuation results in a price for an investment that is deemed not to be representative of the market value of such investment, or if a price is not available, the investment will be valued by the Valuation Committee in accordance with the Manager’s policies and procedures as reflecting fair value (“Fair Valued Investments”). The fair valuation approaches that may be used by the Valuation Committee include market approach, income approach and cost approach. Valuation techniques such as discounted cash flow, use of market comparables and matrix pricing are types of valuation approaches and are typically used in determining fair value. When determining the price for Fair Valued Investments, the Valuation Committee seeks to determine the price that each Fund might reasonably expect to receive or pay from the current sale or purchase of that asset or liability in an arm’s-length transaction. Fair value determinations shall be based upon all available factors that the Valuation Committee deems relevant and consistent with the principles of fair value measurement.

For investments in equity or debt issued by privately held companies or funds (“Private Company” or collectively, the “Private Companies”) and other Fair Valued Investments, the fair valuation approaches that are used by the Valuation Committee and third-party pricing services utilized by the Valuation Committee include one or a combination of, but not limited to, the following inputs.

	<i>Standard Inputs Generally Considered By The Valuation Committee And Third-Party Pricing Services</i>
Market approach	(i) recent market transactions, including subsequent rounds of financing, in the underlying investment or comparable issuers; (ii) recapitalizations and other transactions across the capital structure; and (iii) market multiples of comparable issuers.
Income approach	(i) future cash flows discounted to present and adjusted as appropriate for liquidity, credit, and/or market risks; (ii) quoted prices for similar investments or assets in active markets; and (iii) other risk factors, such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks, recovery rates, liquidation amounts and/or default rates.
Cost approach	(i) audited or unaudited financial statements, investor communications and financial or operational metrics issued by the Private Company; (ii) changes in the valuation of relevant indices or publicly traded companies comparable to the Private Company; (iii) relevant news and other public sources; and (iv) known secondary market transactions in the Private Company’s interests and merger or acquisition activity in companies comparable to the Private Company.

Investments in series of preferred stock issued by Private Companies are typically valued utilizing market approach in determining the enterprise value of the company. Such investments often contain rights and preferences that differ from other series of preferred and common stock of the same issuer. Enterprise valuation techniques such as an option pricing model (“OPM”), a probability weighted expected return model (“PWERM”), current value method or a hybrid of those techniques are used as deemed

Notes to Financial Statements (continued)

appropriate under the circumstances. The use of these valuation techniques involves a determination of the exit scenarios of the investment in order to appropriately allocate the enterprise value of the company among the various parts of its capital structure.

The Private Companies are not subject to the public company disclosure, timing, and reporting standards applicable to other investments held by a Fund. Typically, the most recently available information by a Private Company is as of a date that is earlier than the date a Fund is calculating its NAV. This factor may result in a difference between the value of the investment and the price a Fund could receive upon the sale of the investment.

Fair Value Hierarchy: Various inputs are used in determining the fair value of financial instruments. These inputs to valuation techniques are categorized into a fair value hierarchy consisting of three broad levels for financial reporting purposes as follows:

- Level 1 — Unadjusted price quotations in active markets/exchanges for identical assets or liabilities that each Fund has the ability to access;
- Level 2 — Other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs); and
- Level 3 — Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Valuation Committee's assumptions used in determining the fair value of financial instruments).

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the fair value hierarchy classification is determined based on the lowest level input that is significant to the fair value measurement in its entirety. Investments classified within Level 3 have significant unobservable inputs used by the Valuation Committee in determining the price for Fair Valued Investments. Level 3 investments include equity or debt issued by Private Companies that may not have a secondary market and/or may have a limited number of investors. The categorization of a value determined for financial instruments is based on the pricing transparency of the financial instruments and is not necessarily an indication of the risks associated with investing in those securities.

As of December 31, 2023, certain investments of the Funds were fair valued using NAV as a practical expedient as no quoted market value is available and therefore have been excluded from the fair value hierarchy.

4. SECURITIES AND OTHER INVESTMENTS

Asset-Backed and Mortgage-Backed Securities: Asset-backed securities are generally issued as pass-through certificates or as debt instruments. Asset-backed securities issued as pass-through certificates represent undivided fractional ownership interests in an underlying pool of assets. Asset-backed securities issued as debt instruments, which are also known as collateralized obligations, are typically issued as the debt of a special purpose entity organized solely for the purpose of owning such assets and issuing such debt. Asset-backed securities are often backed by a pool of assets representing the obligations of a number of different parties. The yield characteristics of certain asset-backed securities may differ from traditional debt securities. One such major difference is that all or a principal part of the obligations may be prepaid at any time because the underlying assets (i.e., loans) may be prepaid at any time. As a result, a decrease in interest rates in the market may result in increases in the level of prepayments as borrowers, particularly mortgagors, refinance and repay their loans. An increased prepayment rate with respect to an asset-backed security will have the effect of shortening the maturity of the security. In addition, a fund may subsequently have to reinvest the proceeds at lower interest rates. If a fund has purchased such an asset-backed security at a premium, a faster than anticipated prepayment rate could result in a loss of principal to the extent of the premium paid.

For mortgage pass-through securities (the "Mortgage Assets") there are a number of important differences among the agencies and instrumentalities of the U.S. Government that issue mortgage-related securities and among the securities that they issue. For example, mortgage-related securities guaranteed by Ginnie Mae are guaranteed as to the timely payment of principal and interest by Ginnie Mae and such guarantee is backed by the full faith and credit of the United States. However, mortgage-related securities issued by Freddie Mac and Fannie Mae, including Freddie Mac and Fannie Mae guaranteed mortgage pass-through certificates, which are solely the obligations of Freddie Mac and Fannie Mae, are not backed by or entitled to the full faith and credit of the United States, but are supported by the right of the issuer to borrow from the U.S. Treasury.

Non-agency mortgage-backed securities are securities issued by non-governmental issuers and have no direct or indirect government guarantees of payment and are subject to various risks. Non-agency mortgage loans are obligations of the borrowers thereunder only and are not typically insured or guaranteed by any other person or entity. The ability of a borrower to repay a loan is dependent upon the income or assets of the borrower. A number of factors, including a general economic downturn, acts of God, terrorism, social unrest and civil disturbances, may impair a borrower's ability to repay its loans.

Collateralized Debt Obligations: Collateralized debt obligations ("CDOs"), including collateralized bond obligations ("CBOs") and collateralized loan obligations ("CLOs"), are types of asset-backed securities. A CDO is an entity that is backed by a diversified pool of debt securities (CBOs) or syndicated bank loans (CLOs). The cash flows of the CDO can be split into multiple segments, called "tranches," which will vary in risk profile and yield. The riskiest segment is the subordinated or "equity" tranche. This tranche bears the greatest risk of defaults from the underlying assets in the CDO and serves to protect the other, more senior, tranches from default in all but the most severe circumstances. Since it is shielded from defaults by the more junior tranches, a "senior" tranche will typically have higher credit ratings and lower yields than their underlying securities, and often receive investment grade ratings from one or more of the nationally recognized rating agencies. Despite the protection from the more junior tranches, senior tranches can experience substantial losses due to actual defaults, increased sensitivity to future defaults and the disappearance of one or more protecting tranches as a result of changes in the credit profile of the underlying pool of assets.

Inflation-Indexed Bonds: Inflation-indexed bonds (other than municipal inflation-indexed and certain corporate inflation-indexed bonds) are fixed-income securities whose principal value is periodically adjusted according to the rate of inflation. If the index measuring inflation rises or falls, the principal value of inflation-indexed bonds (other than municipal inflation-indexed and certain corporate inflation-indexed bonds) will be adjusted upward or downward, and consequently the interest payable on these securities (calculated with respect to a larger or smaller principal amount) will be increased or reduced, respectively. Any upward or downward adjustment in the principal amount of

Notes to Financial Statements (continued)

an inflation-indexed bond is included as interest income in the Statements of Operations, even though investors do not receive their principal until maturity. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds. For bonds that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal. With regard to municipal inflation-indexed bonds and certain corporate inflation-indexed bonds, the inflation adjustment is typically reflected in the semi-annual coupon payment. As a result, the principal value of municipal inflation-indexed bonds and such corporate inflation-indexed bonds does not adjust according to the rate of inflation.

Multiple Class Pass-Through Securities: Multiple class pass-through securities, including collateralized mortgage obligations (“CMOs”) and commercial mortgage-backed securities, may be issued by Ginnie Mae, U.S. Government agencies or instrumentalities or by trusts formed by private originators of, or investors in, mortgage loans. In general, CMOs are debt obligations of a legal entity that are collateralized by a pool of residential or commercial mortgage loans or Mortgage Assets. The payments on these are used to make payments on the CMOs or multiple pass-through securities. Multiple class pass-through securities represent direct ownership interests in the Mortgage Assets. Classes of CMOs include interest only (“IOs”), principal only (“POs”), planned amortization classes and targeted amortization classes. IOs and POs are stripped mortgage-backed securities representing interests in a pool of mortgages, the cash flow from which has been separated into interest and principal components. IOs receive the interest portion of the cash flow while POs receive the principal portion. IOs and POs can be extremely volatile in response to changes in interest rates. As interest rates rise and fall, the value of IOs tends to move in the same direction as interest rates. POs perform best when prepayments on the underlying mortgages rise since this increases the rate at which the principal is returned and the yield to maturity on the PO. When payments on mortgages underlying a PO are slower than anticipated, the life of the PO is lengthened and the yield to maturity is reduced. If the underlying Mortgage Assets experience greater than anticipated prepayments of principal, a fund’s initial investment in the IOs may not fully recoup.

Stripped Mortgage-Backed Securities: Stripped mortgage-backed securities are typically issued by the U.S. Government, its agencies and instrumentalities. Stripped mortgage-backed securities are usually structured with two classes that receive different proportions of the interest (IOs) and principal (POs) distributions on a pool of Mortgage Assets. Stripped mortgage-backed securities may be privately issued.

Zero-Coupon Bonds: Zero-coupon bonds are normally issued at a significant discount from face value and do not provide for periodic interest payments. These bonds may experience greater volatility in market value than other debt obligations of similar maturity which provide for regular interest payments.

Capital Securities and Trust Preferred Securities: Capital securities, including trust preferred securities, are typically issued by corporations, generally in the form of interest-bearing notes with preferred securities characteristics. In the case of trust preferred securities, an affiliated business trust of a corporation issues these securities, generally in the form of beneficial interests in subordinated debentures or similarly structured securities. The securities can be structured with either a fixed or adjustable coupon that can have either a perpetual or stated maturity date. For trust preferred securities, the issuing bank or corporation pays interest to the trust, which is then distributed to holders of these securities as a dividend. Dividends can be deferred without creating an event of default or acceleration, although maturity cannot take place unless all cumulative payment obligations have been met. The deferral of payments does not affect the purchase or sale of these securities in the open market. These securities generally are rated below that of the issuing company’s senior debt securities and are freely callable at the issuer’s option.

Preferred Stocks: Preferred stock has a preference over common stock in liquidation (and generally in receiving dividends as well), but is subordinated to the liabilities of the issuer in all respects. As a general rule, the market value of preferred stock with a fixed dividend rate and no conversion element varies inversely with interest rates and perceived credit risk, while the market price of convertible preferred stock generally also reflects some element of conversion value. Because preferred stock is junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar stated yield characteristics. Unlike interest payments on debt securities, preferred stock dividends are payable only if declared by the issuer’s board of directors. Preferred stock also may be subject to optional or mandatory redemption provisions.

Warrants: Warrants entitle a fund to purchase a specified number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date of the warrants, if any. If the price of the underlying stock does not rise above the strike price before the warrant expires, the warrant generally expires without any value and a fund will lose any amount it paid for the warrant. Thus, investments in warrants may involve more risk than investments in common stock. Warrants may trade in the same markets as their underlying stock; however, the price of the warrant does not necessarily move with the price of the underlying stock.

Floating Rate Loan Interests: Floating rate loan interests are typically issued to companies (the “borrower”) by banks, other financial institutions, or privately and publicly offered corporations (the “lender”). Floating rate loan interests are generally non-investment grade, often involve borrowers whose financial condition is troubled or uncertain and companies that are highly leveraged or in bankruptcy proceedings. In addition, transactions in floating rate loan interests may settle on a delayed basis, which may result in proceeds from the sale not being readily available for a fund to make additional investments or meet its redemption obligations. Floating rate loan interests may include fully funded term loans or revolving lines of credit. Floating rate loan interests are typically senior in the corporate capital structure of the borrower. Floating rate loan interests generally pay interest at rates that are periodically determined by reference to a base lending rate plus a premium. Since the rates reset only periodically, changes in prevailing interest rates (and particularly sudden and significant changes) can be expected to cause some fluctuations in the NAV of a fund to the extent that it invests in floating rate loan interests. The base lending rates are generally the lending rate offered by one or more European banks, such as the Secured Overnight Financing Rate (“SOFR”), the prime rate offered by one or more U.S. banks or the certificate of deposit rate. Floating rate loan interests may involve foreign borrowers, and investments may be denominated in foreign currencies. These investments are treated as investments in debt securities for purposes of a fund’s investment policies.

When a fund purchases a floating rate loan interest, it may receive a facility fee and when it sells a floating rate loan interest, it may pay a facility fee. On an ongoing basis, a fund may receive a commitment fee based on the undrawn portion of the underlying line of credit amount of a floating rate loan interest. Facility and commitment fees are typically amortized to income over the term of the loan or term of the commitment, respectively. Consent and amendment fees are recorded to income as earned. Prepayment penalty fees, which may be received by a fund upon the prepayment of a floating rate loan interest by a borrower, are recorded as realized gains. A fund may invest in multiple series or tranches of a loan. A different series or tranche may have varying terms and carry different associated risks.

Floating rate loan interests are usually freely callable at the borrower’s option. A fund may invest in such loans in the form of participations in loans (“Participations”) or assignments (“Assignments”) of all or a portion of loans from third parties. Participations typically will result in a fund having a contractual relationship only with the lender,

Notes to Financial Statements (continued)

not with the borrower. A fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the Participation and only upon receipt by the lender of the payments from the borrower. In connection with purchasing Participations, a fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement, nor any rights of offset against the borrower. A fund may not benefit directly from any collateral supporting the loan in which it has purchased the Participation. As a result, a fund assumes the credit risk of both the borrower and the lender that is selling the Participation. A fund's investment in loan participation interests involves the risk of insolvency of the financial intermediaries who are parties to the transactions. In the event of the insolvency of the lender selling the Participation, a fund may be treated as a general creditor of the lender and may not benefit from any offset between the lender and the borrower. Assignments typically result in a fund having a direct contractual relationship with the borrower, and a fund may enforce compliance by the borrower with the terms of the loan agreement.

In connection with floating rate loan interests, the Funds may also enter into unfunded floating rate loan interests ("commitments"). In connection with these commitments, a fund earns a commitment fee, typically set as a percentage of the commitment amount. Such fee income, which is included in interest income in the Statements of Operations, is recognized ratably over the commitment period. Unfunded floating rate loan interests are marked-to-market daily, and any unrealized appreciation (depreciation) is included in the Statements of Assets and Liabilities and Statements of Operations. As of period end, Global Allocation had the following unfunded floating rate loan interests:

<i>Fund Name</i>	<i>Borrower</i>	<i>Par</i>	<i>Commitment Amount</i>	<i>Value</i>	<i>Unrealized Appreciation (Depreciation)</i>
Global Allocation	Helios Service Partners LLC, Term Loan	\$ 16,983	\$ 16,856	\$ 16,878	\$ 22
					<u>\$ 22</u>

Forward Commitments, When-Issued and Delayed Delivery Securities: The Funds may purchase securities on a when-issued basis and may purchase or sell securities on a forward commitment basis. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Funds may purchase securities under such conditions with the intention of actually acquiring them but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Funds may be required to pay more at settlement than the security is worth. In addition, a fund is not entitled to any of the interest earned prior to settlement. When purchasing a security on a delayed delivery basis, the Funds assume the rights and risks of ownership of the security, including the risk of price and yield fluctuations. In the event of default by the counterparty, the Funds' maximum amount of loss is the unrealized appreciation of unsettled when-issued transactions. These types of securities may be considered unfunded and may obligate the Funds to make future cash payments. An unfunded commitment is marked-to-market and any unrealized appreciation (depreciation) is separately presented in the Statements of Assets and Liabilities and Statements of Operations.

TBA Commitments: TBA commitments are forward agreements for the purchase or sale of securities, including mortgage-backed securities for a fixed price, with payment and delivery on an agreed upon future settlement date. The specific securities to be delivered are not identified at the trade date. However, delivered securities must meet specified terms, including issuer, rate and mortgage terms. When entering into TBA commitments, a fund may take possession of or deliver the underlying mortgage-backed securities but can extend the settlement or roll the transaction. TBA commitments involve a risk of loss if the value of the security to be purchased or sold declines or increases, respectively, prior to settlement date, if there are expenses or delays in connection with the TBA transactions, or if the counterparty fails to complete the transaction.

In order to better define contractual rights and to secure rights that will help a fund mitigate its counterparty risk, TBA commitments may be entered into by a fund under Master Securities Forward Transaction Agreements (each, an "MSFTA"). An MSFTA typically contains, among other things, collateral posting terms and netting provisions in the event of default and/or termination event. The collateral requirements are typically calculated by netting the mark-to-market amount for each transaction under such agreement and comparing that amount to the value of the collateral currently pledged by a fund and the counterparty. Cash collateral that has been pledged to cover the obligations of a fund and cash collateral received from the counterparty, if any, is reported separately in the Statements of Assets and Liabilities as cash pledged as collateral for TBA commitments or cash received as collateral for TBA commitments, respectively. Non-cash collateral pledged by a fund, if any, is noted in the Schedules of Investments. Typically, a fund is permitted to sell, re-pledge or use the collateral it receives; however, the counterparty is not permitted to do so. To the extent amounts due to a fund are not fully collateralized, contractually or otherwise, a fund bears the risk of loss from counterparty non-performance.

Mortgage Dollar Roll Transactions: The Funds may sell TBA mortgage-backed securities and simultaneously contract to repurchase substantially similar (i.e., same type, coupon and maturity) securities on a specific future date at an agreed upon price. During the period between the sale and repurchase, a fund is not entitled to receive interest and principal payments on the securities sold. Mortgage dollar roll transactions are treated as purchases and sales and a fund realizes gains and losses on these transactions. Mortgage dollar rolls involve the risk that the market value of the securities that a fund is required to purchase may decline below the agreed upon repurchase price of those securities.

Commitments: Commitments are agreements to acquire an investment at a future date (subject to conditions) in connection with a potential public or non-public offering. Such agreements may obligate a fund to make future cash payments. As of December 31, 2023, Global Allocation had outstanding commitments of \$220,287. These commitments are not included in the net assets of Global Allocation as of December 31, 2023.

Repurchase Agreements: Repurchase agreements are commitments to purchase a security from a counterparty who agrees to repurchase the same security at a mutually agreed upon date and price. On a daily basis, the counterparty is required to maintain collateral subject to the agreement and in value no less than the agreed upon repurchase amount. Repurchase agreements may be traded bilaterally, in a tri-party arrangement or may be centrally cleared through a sponsoring agent. Subject to the custodial undertaking associated with a tri-party repurchase arrangement and for centrally cleared repurchase agreements, a third-party custodian maintains accounts to hold collateral for a fund and its counterparties. Typically, a fund and counterparty are not permitted to sell, re-pledge or use the collateral absent a default by the counterparty or the fund, respectively.

In the event the counterparty defaults and the fair value of the collateral declines, a fund could experience losses, delays and costs in liquidating the collateral.

Repurchase agreements are entered into by a fund under Master Repurchase Agreements (each, an "MRA"). The MRA permits the fund, under certain circumstances including an event of default (such as bankruptcy or insolvency), to offset payables and/or receivables with collateral held by and/or posted to the counterparty. As a result,

Notes to Financial Statements (continued)

one single net payment is created. Bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against such a right of offset in the event of the MRA counterparty's bankruptcy or insolvency. Based on the terms of the MRA, the fund receives collateral with a market value in excess of the repurchase price at maturity. Upon a bankruptcy or insolvency of the MRA counterparty, the fund would recognize a liability with respect to such excess collateral. The liability reflects the fund's obligation under bankruptcy law to return the excess to the counterparty.

Short Sale Transactions: In short sale transactions, a fund sells a security it does not hold in anticipation of a decline in the market price of that security. When a fund makes a short sale, it will borrow the security sold short from a broker/counterparty and deliver the security to the purchaser. To close out a short position, a fund delivers the same security to the broker and records a liability to reflect the obligation to return the security to the broker. The amount of the liability is subsequently marked-to-market to reflect the market value of the short sale. A fund maintains a segregated account of securities or deposits cash with the broker-dealer as collateral for the short sales. Cash deposited with the broker is recorded as an asset in the Statements of Assets and Liabilities. Securities segregated as collateral are denoted in the Schedules of Investments. A fund may pay a financing fee for the difference between the market value of the short position and the cash collateral deposited with the broker which would be recorded as interest expense. A fund is required to repay the counterparty any dividends received on the security sold short, which, if applicable, is shown as dividend expense in the Statements of Operations. A fund may pay a fee on the assets borrowed from the counterparty, which, if applicable, is shown as broker fees and expenses on short sales in the Statements of Operations. A fund is exposed to market risk based on the amount, if any, that the market value of the security increases beyond the market value at which the position was sold. Thus, a short sale of a security involves the risk that instead of declining, the price of the security sold short will rise. The short sale of securities involves the possibility of an unlimited loss since there is an unlimited potential for the market price of the security sold short to increase. A gain is, limited to the price at which a fund sold the security short. A realized gain or loss is recognized upon the termination of a short sale if the market price is either less than or greater than the proceeds originally received. There is no assurance that a fund will be able to close out a short position at a particular time or at an acceptable price.

Securities Lending: The Funds may lend their securities to approved borrowers, such as brokers, dealers and other financial institutions. The borrower pledges and maintains with the Funds collateral consisting of cash, an irrevocable letter of credit issued by a bank, or securities issued or guaranteed by the U.S. Government. The initial collateral received by each Fund is required to have a value of at least 102% of the current value of the loaned securities for securities traded on U.S. exchanges and a value of at least 105% for all other securities. The collateral is maintained thereafter at a value equal to at least 100% of the current market value of the securities on loan. The market value of the loaned securities is determined at the close of each business day of the Fund and any additional required collateral is delivered to the Fund, or excess collateral returned by the Fund, on the next business day. During the term of the loan, the Funds are entitled to all distributions made on or in respect of the loaned securities, but do not receive interest income on securities received as collateral. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions.

As of period end, any securities on loan were collateralized by cash and/or U.S. Government obligations. Cash collateral invested by the securities lending agent, BlackRock Investment Management, LLC ("BIM"), if any, is disclosed in the Schedules of Investments. Any non-cash collateral received cannot be sold, re-invested or pledged by the Fund, except in the event of borrower default. The securities on loan, if any, are disclosed in the Funds' Schedules of Investments. The market value of any securities on loan and the value of related collateral, if any, are shown separately in the Statements of Assets and Liabilities as a component of investments at value – unaffiliated and collateral on securities loaned, respectively.

Securities lending transactions are entered into by the Funds under Master Securities Lending Agreements (each, an "MSLA"), which provide the right, in the event of default (including bankruptcy or insolvency), for the non-defaulting party to liquidate the collateral and calculate a net exposure to the defaulting party or request additional collateral. In the event that a borrower defaults, the Funds, as lender, would offset the market value of the collateral received against the market value of the securities loaned. When the value of the collateral is greater than that of the market value of the securities loaned, the lender is left with a net amount payable to the defaulting party. However, bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against such a right of offset in the event of an MSLA counterparty's bankruptcy or insolvency. Under the MSLA, absent an event of default, the borrower can resell or re-pledge the loaned securities, and the Funds can reinvest cash collateral received in connection with loaned securities. Upon an event of default, the parties' obligations to return the securities or collateral to the other party are extinguished, and the parties can resell or re-pledge the loaned securities or the collateral received in connection with the loaned securities in order to satisfy the defaulting party's net payment obligation for all transactions under the MSLA. The defaulting party remains liable for any deficiency.

Notes to Financial Statements (continued)

As of period end, the following tables are a summary of the Funds' securities on loan by counterparty which are subject to offset under an MSLA:

<i>Fund Name/Counterparty</i>	<i>Securities Loaned at Value</i>	<i>Cash Collateral Received^(a)</i>	<i>Non-Cash Collateral Received, at Fair Value</i>	<i>Net Amount</i>
Advantage Large Cap Core

^(a) Collateral received, if any, in excess of the market value of securities on loan is not presented in these tables. The total cash collateral received by each Fund is disclosed in the Funds' Statements of Assets and Liabilities.

The risks of securities lending include the risk that the borrower may not provide additional collateral when required or may not return the securities when due. To mitigate these risks, the Funds benefit from a borrower default indemnity provided by BIM. BIM's indemnity allows for full replacement of the securities loaned to the extent the collateral received does not cover the value on the securities loaned in the event of borrower default. Each Fund could incur a loss if the value of an investment purchased with cash collateral falls below the market value of loaned securities or if the value of an investment purchased with cash collateral falls below the value of the original cash collateral received. Such losses are borne entirely by the Funds.

5. DERIVATIVE FINANCIAL INSTRUMENTS

The Funds engage in various portfolio investment strategies using derivative contracts both to increase the returns of the Funds and/or to manage their exposure to certain risks such as credit risk, equity risk, interest rate risk, foreign currency exchange rate risk, commodity price risk or other risks (e.g., inflation risk). Derivative financial instruments categorized by risk exposure are included in the Schedules of Investments. These contracts may be transacted on an exchange or OTC.

Futures Contracts: Futures contracts are purchased or sold to gain exposure to, or manage exposure to, changes in interest rates (interest rate risk) and changes in the value of equity securities (equity risk) or foreign currencies (foreign currency exchange rate risk).

Futures contracts are exchange-traded agreements between the Funds and a counterparty to buy or sell a specific quantity of an underlying instrument at a specified price and on a specified date. Depending on the terms of a contract, it is settled either through physical delivery of the underlying instrument on the settlement date or by payment of a cash amount on the settlement date. Upon entering into a futures contract, the Funds are required to deposit initial margin with the broker in the form of cash or securities in an amount that varies depending on a contract's size and risk profile. The initial margin deposit must then be maintained at an established level over the life of the contract. Amounts pledged, which are considered restricted, are included in cash pledged for futures contracts in the Statements of Assets and Liabilities.

Securities deposited as initial margin are designated in the Schedules of Investments and cash deposited, if any, are shown as cash pledged for futures contracts in the Statements of Assets and Liabilities. Pursuant to the contract, the Funds agree to receive from or pay to the broker an amount of cash equal to the daily fluctuation in market value of the contract ("variation margin"). Variation margin is recorded as unrealized appreciation (depreciation) and, if any, shown as variation margin receivable (or payable) on futures contracts in the Statements of Assets and Liabilities. When the contract is closed, a realized gain or loss is recorded in the Statements of Operations equal to the difference between the notional amount of the contract at the time it was opened and the notional amount at the time it was closed. The use of futures contracts involves the risk of an imperfect correlation in the movements in the price of futures contracts and interest rates, foreign currency exchange rates or underlying assets.

Forward Foreign Currency Exchange Contracts: Forward foreign currency exchange contracts are entered into to gain or reduce exposure to foreign currencies (foreign currency exchange rate risk).

Notes to Financial Statements (continued)

A forward foreign currency exchange contract is an agreement between two parties to buy and sell a currency at a set exchange rate on a specified date. These contracts help to manage the overall exposure to the currencies in which some of the investments held by the Funds are denominated and in some cases, may be used to obtain exposure to a particular market. The contracts are traded OTC and not on an organized exchange.

The contract is marked-to-market daily and the change in market value is recorded as unrealized appreciation (depreciation) in the Statements of Assets and Liabilities. When a contract is closed, a realized gain or loss is recorded in the Statements of Operations equal to the difference between the value at the time it was opened and the value at the time it was closed. Non-deliverable forward foreign currency exchange contracts are settled with the counterparty in cash without the delivery of foreign currency. The use of forward foreign currency exchange contracts involves the risk that the value of a forward foreign currency exchange contract changes unfavorably due to movements in the value of the referenced foreign currencies, and such value may exceed the amount(s) reflected in the Statements of Assets and Liabilities. Cash amounts pledged for forward foreign currency exchange contracts are considered restricted and are included in cash pledged as collateral for OTC derivatives in the Statements of Assets and Liabilities. The Fund's risk of loss from counterparty credit risk on OTC derivatives is generally limited to the aggregate unrealized gain netted against any collateral held by the Fund.

Options: The Funds may purchase and write call and put options to increase or decrease their exposure to the risks of underlying instruments, including equity risk, interest rate risk and/or commodity price risk and/or, in the case of options written, to generate gains from options premiums.

A call option gives the purchaser (holder) of the option the right (but not the obligation) to buy, and obligates the seller (writer) to sell (when the option is exercised) the underlying instrument at the exercise or strike price at any time or at a specified time during the option period. A put option gives the holder the right to sell and obligates the writer to buy the underlying instrument at the exercise or strike price at any time or at a specified time during the option period.

Premiums paid on options purchased and premiums received on options written, as well as the daily fluctuation in market value, are included in investments at value – unaffiliated and options written at value, respectively, in the Statements of Assets and Liabilities. When an instrument is purchased or sold through the exercise of an option, the premium is offset against the cost or proceeds of the underlying instrument. When an option expires, a realized gain or loss is recorded in the Statements of Operations to the extent the cost of the closing transaction exceeds the premiums received or paid. When the Funds write a call option, such option is typically “covered,” meaning that they hold the underlying instrument subject to being called by the option counterparty. When the Funds write a put option, cash is segregated in an amount sufficient to cover the obligation. These amounts, which are considered restricted, are included in cash pledged as collateral for options written in the Statements of Assets and Liabilities.

- **Swaptions** – The Funds may purchase and write swaptions primarily to preserve a return or spread on a particular investment or portion of the Funds' holdings, as a duration management technique or to protect against an increase in the price of securities it anticipates purchasing at a later date. The purchaser and writer of a swaption is buying or granting the right to enter into a previously agreed upon interest rate or credit default swap agreement (interest rate risk and/or credit risk) at any time before the expiration of the option.
- **Interest rate caps and floors** — Interest rate caps and floors are entered into to gain or reduce exposure to interest rates (interest rate risk and/or other risk). Caps are agreements whereby one party agrees to make payments to the other, in return for a premium, to the extent that interest rate indexes exceed a specified rate, or “cap.” Floors are agreements whereby one party agrees to make payments to the other, in return for a premium, to the extent that interest rate indexes fall below a specified rate, or “floor.” The maximum potential amount of future payments that a Fund would be required to make under an interest rate cap would be the notional amount times the percentage increase in interest rates determined by the difference between the interest rate index current value and the value at the time the cap was entered into.
- **Foreign currency options** – The Funds may purchase and write foreign currency options, foreign currency futures and options on foreign currency futures to gain or reduce exposure to foreign currencies (foreign currency exchange rate risk). Foreign currency options give the purchaser the right to buy from or sell to the writer a foreign currency at any time before the expiration of the option.
- **Barrier options** – The Funds may purchase and write a variety of options with non-standard payout structures or other features (“barrier options”) that are generally traded OTC.

The Funds may invest in various types of barrier options, including down-and-out options, down-and-in options, double no-touch options, one-touch options, instant one-touch options, up-and-out options and up-and-in options. Down-and-out options expire worthless to the purchaser if the price of the underlying instrument falls below a specific barrier price level prior to the expiration date. Down-and-in options expire worthless to the purchaser unless the price of the underlying instrument falls below a specific barrier price level prior to the expiration date. Double no-touch options provide the purchaser an agreed-upon payout if the price of the underlying instrument does not reach or surpass predetermined barrier price levels prior to the option's expiration date. One-touch options and instant one-touch options provide the purchaser an agreed-upon payout if the price of the underlying instrument reaches or surpasses predetermined barrier price levels prior to the expiration date. Up-and-out options expire worthless to the purchaser if the price of the underlying instrument increases beyond a predetermined barrier price level prior to the expiration date. Up-and-in options can only be exercised when the price of the underlying instrument increases beyond a predetermined barrier price level.

In purchasing and writing options, the Funds bear the risk of an unfavorable change in the value of the underlying instrument or the risk that they may not be able to enter into a closing transaction due to an illiquid market. Exercise of a written option could result in the Funds purchasing or selling a security when they otherwise would not, or at a price different from the current market value.

Swaps: Swap contracts are entered into to manage exposure to issuers, markets and securities. Such contracts are agreements between the Funds and a counterparty to make periodic net payments on a specified notional amount or a net payment upon termination. Swap agreements are privately negotiated in the OTC market and may be entered into as a bilateral contract (“OTC swaps”) or centrally cleared (“centrally cleared swaps”).

For OTC swaps, any upfront premiums paid and any upfront fees received are shown as swap premiums paid and swap premiums received, respectively, in the Statements of Assets and Liabilities and amortized over the term of the contract. The daily fluctuation in market value is recorded as unrealized appreciation (depreciation) on OTC Swaps in the Statements of Assets and Liabilities. Payments received or paid are recorded in the Statements of Operations as realized gains or losses, respectively. When an OTC

Notes to Financial Statements (continued)

swap is terminated, a realized gain or loss is recorded in the Statements of Operations equal to the difference between the proceeds from (or cost of) the closing transaction and the Funds' basis in the contract, if any. Generally, the basis of the contract is the premium received or paid.

In a centrally cleared swap, immediately following execution of the swap contract, the swap contract is novated to a central counterparty (the "CCP") and the CCP becomes the Funds' counterparty on the swap. Each Fund is required to interface with the CCP through the broker. Upon entering into a centrally cleared swap, each Fund is required to deposit initial margin with the broker in the form of cash or securities in an amount that varies depending on the size and risk profile of the particular swap. Securities deposited as initial margin are designated in the Schedules of Investments and cash deposited is shown as cash pledged for centrally cleared swaps in the Statements of Assets and Liabilities. Amounts pledged, which are considered restricted cash, are included in cash pledged for centrally cleared swaps in the Statements of Assets and Liabilities. Pursuant to the contract, each Fund agrees to receive from or pay to the broker variation margin. Variation margin is recorded as unrealized appreciation (depreciation) and shown as variation margin receivable (or payable) on centrally cleared swaps in the Statements of Assets and Liabilities. Payments received from (paid to) the counterparty are amortized over the term of the contract and recorded as realized gains (losses) in the Statements of Operations, including those at termination.

- **Credit default swaps** — Credit default swaps are entered into to manage exposure to the market or certain sectors of the market, to reduce risk exposure to defaults of corporate and/or sovereign issuers or to create exposure to corporate and/or sovereign issuers to which a fund is not otherwise exposed (credit risk).

The Funds may either buy or sell (write) credit default swaps on single-name issuers (corporate or sovereign), a combination or basket of single-name issuers or traded indexes. Credit default swaps are agreements in which the protection buyer pays fixed periodic payments to the seller in consideration for a promise from the protection seller to make a specific payment should a negative credit event take place with respect to the referenced entity (e.g., bankruptcy, failure to pay, obligation acceleration, repudiation, moratorium or restructuring). As a buyer, if an underlying credit event occurs, the Funds will either (i) receive from the seller an amount equal to the notional amount of the swap and deliver the referenced security or underlying securities comprising the index, or (ii) receive a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising the index. As a seller (writer), if an underlying credit event occurs, the Funds will either pay the buyer an amount equal to the notional amount of the swap and take delivery of the referenced security or underlying securities comprising the index or pay a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising the index.

- **Total return swaps** — Total return swaps are entered into to obtain exposure to a security or market without owning such security or investing directly in such market or to exchange the risk/return of one security or market (e.g., fixed-income) with another security or market (e.g., equity or commodity prices) (equity risk, commodity price risk and/or interest rate risk).

Total return swaps are agreements in which there is an exchange of cash flows whereby one party commits to make payments based on the total return (distributions plus capital gains/losses) of an underlying instrument, or basket of underlying instruments, in exchange for fixed or floating rate interest payments. If the total return of the instrument(s) or index underlying the transaction exceeds or falls short of the offsetting fixed or floating interest rate obligation, the Funds receive payment from or make a payment to the counterparty.

Certain total return swaps are designed to function as a portfolio of direct investments in long and short equity positions. This means that each Fund has the ability to trade in and out of these long and short positions within the swap and will receive the economic benefits and risks equivalent to direct investment in these positions, subject to certain adjustments due to events related to the counterparty. Benefits and risks include capital appreciation (depreciation), corporate actions and dividends received and paid, all of which are reflected in the swap's market value. The market value also includes interest charges and credits ("financing fees") related to the notional values of the long and short positions and cash balances within the swap. These interest charges and credits are based on a specified benchmark rate plus or minus a specified spread determined based upon the country and/or currency of the positions in the portfolio.

Positions within the swap and financing fees are reset periodically. During a reset, any unrealized appreciation (depreciation) on positions and accrued financing fees become available for cash settlement between the Funds and the counterparty. The amounts that are available for cash settlement are recorded as realized gains or losses in the Statements of Operations. Cash settlement in and out of the swap may occur at a reset date or any other date, at the discretion of the Funds and the counterparty, over the life of the agreement. Certain swaps have no stated expiration and can be terminated by either party at any time.

- **Interest rate swaps** — Interest rate swaps are entered into to gain or reduce exposure to interest rates or to manage duration, the yield curve or interest rate (interest rate risk).

Interest rate swaps are agreements in which one party pays a stream of interest payments, either fixed or floating, in exchange for another party's stream of interest payments, either fixed or floating, on the same notional amount for a specified period of time. In more complex interest rate swaps, the notional principal amount may decline (or amortize) over time.

- **Forward swaps** — The Funds may enter into forward interest rate swaps and forward total return swaps. In a forward swap, each Fund and the counterparty agree to make periodic net payments beginning on a specified date or a net payment at termination.
- **Inflation swaps** — Inflation swaps are entered into to gain or reduce exposure to inflation (inflation risk). In an inflation swap, one party makes fixed interest payments on a notional principal amount in exchange for another party's variable payments based on an inflation index, such as the Consumer Price Index.

Swap transactions involve, to varying degrees, elements of interest rate, credit and market risks in excess of the amounts recognized in the Statements of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreements, and that there may be unfavorable changes in interest rates and/or market values associated with these transactions.

Master Netting Arrangements: In order to define its contractual rights and to secure rights that will help it mitigate its counterparty risk, a Fund may enter into an International Swaps and Derivatives Association, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement with its derivative contract counterparties. An ISDA Master Agreement is a bilateral agreement between a Fund and a counterparty that governs certain OTC derivatives and typically contains, among other things, collateral posting

Notes to Financial Statements (continued)

terms and netting provisions in the event of a default and/or termination event. Under an ISDA Master Agreement, a Fund may, under certain circumstances, offset with the counterparty certain derivative financial instruments' payables and/or receivables with collateral held and/or posted and create one single net payment. The provisions of the ISDA Master Agreement typically permit a single net payment in the event of default including the bankruptcy or insolvency of the counterparty. However, bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against the right of offset in bankruptcy, insolvency or other events.

Collateral Requirements: For derivatives traded under an ISDA Master Agreement, the collateral requirements are typically calculated by netting the mark-to-market amount for each transaction under such agreement and comparing that amount to the value of any collateral currently pledged by the Fund(s) and the counterparty.

Cash collateral that has been pledged to cover obligations of the Funds and cash collateral received from the counterparty, if any, is reported separately in the Statements of Assets and Liabilities as cash pledged as collateral and cash received as collateral, respectively. Non-cash collateral pledged by the Funds, if any, is noted in the Schedules of Investments. Generally, the amount of collateral due from or to a counterparty is subject to a certain minimum transfer amount threshold before a transfer is required, which is determined at the close of business of the Funds. Any additional required collateral is delivered to/pledged by the Funds on the next business day. Typically, the counterparty is not permitted to sell, re-pledge or use cash and non-cash collateral it receives. A Fund generally agrees not to use non-cash collateral that it receives but may, absent default or certain other circumstances defined in the underlying ISDA Master Agreement, be permitted to use cash collateral received. In such cases, interest may be paid pursuant to the collateral arrangement with the counterparty. To the extent amounts due to the Funds from the counterparties are not fully collateralized, each Fund bears the risk of loss from counterparty non-performance. Likewise, to the extent the Funds have delivered collateral to a counterparty and stand ready to perform under the terms of their agreement with such counterparty, each Fund bears the risk of loss from a counterparty in the amount of the value of the collateral in the event the counterparty fails to return such collateral. Based on the terms of agreements, collateral may not be required for all derivative contracts.

For financial reporting purposes, the Funds do not offset derivative assets and derivative liabilities that are subject to netting arrangements, if any, in the Statements of Assets and Liabilities.

6. INVESTMENT ADVISORY AGREEMENT AND OTHER TRANSACTIONS WITH AFFILIATES

Investment Advisory: Each Company, on behalf of its respective Funds, entered into an Investment Advisory Agreement with the Manager, the Funds' investment adviser and an indirect, wholly-owned subsidiary of BlackRock, Inc. ("BlackRock"), to provide investment advisory and administrative services. The Manager is responsible for the management of each Fund's portfolio and provides the personnel, facilities, equipment and certain other services necessary to the operations of each Fund.

For such services, each Fund pays the Manager a monthly fee based on the percentage of the six combined Funds' average daily net assets at the following annual rates:

<i>Average Daily Net Assets of the Six Combined Funds</i>	<i>Investment Advisory Fees</i>
First \$250 million	0.50%
\$250 million - \$300 million	0.45
\$300 million - \$400 million	0.40
\$400 million - \$800 million	0.35
Greater than \$800 million	0.30

The portion of the assets of a Fund to which the rate at each breakpoint level applies will be determined on a "uniform percentage" basis. The uniform percentage applicable to a breakpoint level is determined by dividing the amount of the aggregate average daily net assets of the six combined Funds that falls within that breakpoint level by the aggregate average daily net assets of the six combined Funds. The amount of the fee for a Fund at each breakpoint level is determined by multiplying the average daily net assets of that Fund by the uniform percentage applicable to that breakpoint level and multiplying the product by the applicable advisory fee rate.

The Manager provides investment management and other services to the Cayman Subsidiary. The Manager does not receive separate compensation from the Cayman Subsidiary for providing investment management or administrative services. However, Global Allocation pays the Manager based on the net assets, which includes the assets of the Cayman Subsidiary.

With respect to High Yield, the Manager entered into a separate sub-advisory agreement with BlackRock International Limited ("BIL"), an affiliate of the Manager. The Manager pays BIL for services it provides for that portion of High Yield for which BIL acts as sub-adviser, a monthly fee that is equal to a percentage of the investment advisory fees paid by High Yield to the Manager.

With respect to Sustainable Balanced, the Manager entered into separate sub-advisory agreements with BIL and BlackRock (Singapore) Limited ("BSL") (collectively, the "Sub-Advisers"), each an affiliate of the Manager. The Manager pays BIL and BSL for services they provide for that portion of Sustainable Balanced for which BIL or BSL, as applicable, acts as sub-adviser, a monthly fee that is equal to a percentage of the investment advisory fees paid by Sustainable Balanced to the Manager.

With respect to Global Allocation, the Manager entered into a sub-advisory agreement with BSL, an affiliate of the Manager. The Manager pays BSL for services it provides for that portion of Global Allocation for which BSL acts as sub-adviser, a monthly fee that is equal to a percentage of the investment advisory fees paid by Global Allocation to the Manager.

Distribution Fees: Each Company, on behalf of its respective Funds, entered into a Distribution Agreement and a Distribution Plan with BlackRock Investments, LLC ("BRIL"), an affiliate of the Manager.

Transfer Agent: On behalf of each Fund, the Manager entered into agreements with insurance companies and other financial intermediaries ("Service Organizations"), some of which may be affiliates. Pursuant to these agreements, the Service Organizations provide the Funds with administrative, networking, recordkeeping, sub-transfer agency and shareholder services to underlying investor accounts. For these services, the Service Organizations receive an annual fee per shareholder account, which will vary depending on share class and/or net assets of Fund shareholders serviced by the Service Organizations. For the year ended December 31, 2023, the Funds did not pay any amounts to affiliates in return for these services.

Notes to Financial Statements (continued)

Expense Limitations, Waivers and Reimbursements: With respect to each Fund (other than Government Money Market), the Manager contractually agreed to waive its investment advisory fees by the amount of investment advisory fees each Fund pays to the Manager indirectly through its investment in affiliated money market funds (the “affiliated money market fund waiver”) through June 30, 2024. The contractual agreement may be terminated upon 90 days’ notice by a majority of the Independent Directors, or by a vote of a majority of the outstanding voting securities of a Fund. The amount of waivers and/or reimbursements of fees and expenses made pursuant to the expense limitation described below will be reduced by the amount of the affiliated money market fund waiver. These amounts are included in fees waived and/or reimbursed by the Manager in the Statements of Operations. For the year ended December 31, 2023, the amounts waived were as follows:

<i>Fund Name</i>	<i>Fees waived and/or reimbursed by the Manager</i>
Advantage Large Cap Core	\$ 1,176
Capital Appreciation	200
Global Allocation	6,154
High Yield	249
Sustainable Balanced	9,213

The Manager has contractually agreed to waive its investment advisory fee with respect to any portion of each Fund’s (other than Government Money Market’s) assets invested in affiliated equity and fixed-income mutual funds and affiliated exchange-traded funds that have a contractual management fee through June 30, 2024. The contractual agreement may be terminated upon 90 days’ notice by a majority of the Independent Directors, or by a vote of a majority of the outstanding voting securities of a Fund. These amounts are included in fees waived and/or reimbursed by the Manager in the Statements of Operations. For the year ended December 31, 2023, the amounts waived in investment advisory fees pursuant to these arrangements were as follows:

<i>Fund Name</i>	<i>Fees waived and/or reimbursed by the Manager</i>
Global Allocation	\$ 6,851
High Yield	344
Sustainable Balanced	25,788

The Manager has contractually agreed to reimburse certain transfer agent fees in order to limit such expenses to a percentage of average daily net assets as follows:

<i>Fund Name</i>	
Advantage Large Cap Core	0.04%
Capital Appreciation	0.04
Global Allocation	0.04
Government Money Market	0.02
High Yield	0.05
Sustainable Balanced	0.04

The Manager has agreed not to reduce or discontinue the contractual expense limitations through June 30, 2024, unless approved by each Board, including a majority of the Independent Directors, or by a vote of a majority of the outstanding voting securities of a Fund. These amounts are included in transfer agent fees reimbursed by the Manager in the Statements of Operations. For the year ended December 31, 2023, expense reimbursements were as follows:

<i>Fund Name</i>	<i>Transfer agent fees reimbursed by the Manager</i>
Advantage Large Cap Core	\$ 156,778
Capital Appreciation	172,069
Global Allocation	165,141
Government Money Market	145,793
High Yield	17,619
Sustainable Balanced	412,735

With respect to each Fund, the Manager contractually agreed to waive and/or reimburse fees or expenses in order to limit expenses, excluding interest expense, dividend expense, tax expense and certain other fund expenses, which constitute extraordinary expenses not incurred in the ordinary course of each Fund’s business (“expense limitation”). The expense limitations as a percentage of average daily net assets are as follows:

<i>Fund Name</i>	
Advantage Large Cap Core	0.50%
Capital Appreciation	0.57
Global Allocation	0.57
Government Money Market	0.50
High Yield	0.50
Sustainable Balanced	0.50

Notes to Financial Statements (continued)

The Manager has agreed not to reduce or discontinue the contractual expense limitations through June 30, 2024. The contractual agreement may be terminated, with respect to each Fund, upon 90 days' notice by a majority of the Independent Directors, or by a vote of a majority of the outstanding voting securities of a Fund. For the year ended December 31, 2023, the following amounts are included in fees waived and/or reimbursed by the Manager and transfer agent fees reimbursed by the Manager in the Statements of Operations:

<i>Fund Name</i>	<i>Fees waived and/or reimbursed by the Manager</i>
Advantage Large Cap Core	\$ 9,070
Global Allocation	395,013
Government Money Market	26,259
High Yield	163,520
Sustainable Balanced	3,061

<i>Fund Name</i>	<i>Transfer agent fees reimbursed by the Manager</i>
Advantage Large Cap Core	\$ 62,225
Global Allocation	57,697
Government Money Market	19,264
High Yield	10,362
Sustainable Balanced	70,558

The Manager has also voluntarily agreed to waive a portion of its investment advisory fees and/or reimburse operating expenses to enable Government Money Market to maintain minimum levels of daily net investment income if applicable. These amounts, if any, are reported in the Statements of Operations as fees waived and/or reimbursed by the Manager and transfer agent fees reimbursed by the Manager. The Manager may discontinue the waiver and/or reimbursement at any time. For the year ended December 31, 2023, there were no fees waived and/or reimbursed by the Manager under this agreement for Government Money Market.

Securities Lending: The U.S. Securities and Exchange Commission ("SEC") has issued an exemptive order which permits BIM, an affiliate of the Manager, to serve as securities lending agent for the Funds, subject to applicable conditions. As securities lending agent, BIM bears all operational costs directly related to securities lending. The Funds are responsible for expenses in connection with the investment of cash collateral received for securities on loan (the "collateral investment expenses"). The cash collateral is invested in a private investment company, Money Market Series, managed by the Manager or its affiliates. However, BIM has agreed to cap the collateral investment expenses of the Money Market Series to an annual rate of 0.04%. The investment adviser to the Money Market Series will not charge any advisory fees with respect to shares purchased by the Funds. The Money Market Series may impose a discretionary liquidity fee of up to 2% of the value withdrawn, if such fee is determined to be in the best interests of the Money Market Series. The Money Market Series seeks current income consistent with maintaining liquidity and preserving capital. Although the Money Market Series is not registered under the 1940 Act, its investments may follow the parameters of investments by a money market fund that is subject to Rule 2a-7 under the 1940 Act.

Securities lending income is equal to the total of income earned from the reinvestment of cash collateral, net of fees and other payments to and from borrowers of securities, and less the collateral investment expenses. Each Fund retains a portion of securities lending income and remits a remaining portion to BIM as compensation for its services as securities lending agent.

Pursuant to the current securities lending agreement, Advantage Large Cap Core and Capital Appreciation retain 81% of securities lending income (which excludes collateral investment expenses), and this amount retained can never be less than 70% of the total of securities lending income plus the collateral investment expenses.

In addition, commencing the business day following the date that the aggregate securities lending income earned across the BlackRock Multi-Asset Complex in a calendar year exceeds a specified threshold, Advantage Large Cap Core and Capital Appreciation, pursuant to the securities lending agreement, will retain for the remainder of that calendar year securities lending income in an amount equal to 81% of securities lending income (which excludes collateral investment expenses), and this amount retained can never be less than 70% of the total of securities lending income plus the collateral investment expenses.

Pursuant to the current securities lending agreement, Global Allocation and Sustainable Balanced retain 82% of securities lending income (which excludes collateral investment expenses), and this amount retained can never be less than 70% of the total of securities lending income plus the collateral investment expenses.

In addition, commencing the business day following the date that the aggregate securities lending income earned across the BlackRock Multi-Asset or Fixed-Income Complexes, as applicable, in a calendar year exceeds a specified threshold, Global Allocation and Sustainable Balanced, pursuant to the securities lending agreement, will retain for the remainder of that calendar year securities lending income in an amount equal to 85% of securities lending income (which excludes collateral investment expenses), and this amount retained can never be less than 70% of the total of securities lending income plus the collateral investment expenses.

Prior to January 1, 2023, Sustainable Balanced retained 81% of securities lending income (which excluded collateral investment expenses) and the amount retained could never be less than 70% of the total of securities lending income plus the collateral investment expenses. In addition, commencing the business day following the date that the aggregate securities lending income earned across the BlackRock Multi-Asset Complex in a calendar year exceeded a specified threshold, the Fund would retain for the remainder of that calendar year 81% of securities lending income (which excluded collateral investment expenses), and the amount retained could never be less than 70% of the total of securities lending income plus the collateral investment expenses.

Notes to Financial Statements (continued)

The share of securities lending income earned by each Fund is shown as securities lending income — affiliated — net in the Statements of Operations. For the year ended December 31, 2023, each Fund paid BIM the following amounts for securities lending agent services:

<i>Fund Name</i>	<i>Amounts</i>
Advantage Large Cap Core	\$ 7,349
Capital Appreciation	3,236
Global Allocation	3,227
Sustainable Balanced	6,469

Interfund Lending: In accordance with an exemptive order (the “Order”) from the SEC each Fund may participate in a joint lending and borrowing facility for temporary purposes (the “Interfund Lending Program”), subject to compliance with the terms and conditions of the Order, and to the extent permitted by each Fund’s investment policies and restrictions. Each Fund is currently permitted to borrow and lend under the Interfund Lending Program.

A lending BlackRock fund may lend in aggregate up to 15% of its net assets but may not lend more than 5% of its net assets to any one borrowing fund through the Interfund Lending Program. A borrowing BlackRock fund may not borrow through the Interfund Lending Program or from any other source more than 33 1/3% of its total assets (or any lower threshold provided for by the fund’s investment restrictions). If a borrowing BlackRock fund’s total outstanding borrowings exceed 10% of its total assets, each of its outstanding interfund loans will be subject to collateralization of at least 102% of the outstanding principal value of the loan. All interfund loans are for temporary or emergency purposes and the interest rate to be charged will be the average of the highest current overnight repurchase agreement rate available to a lending fund and the bank loan rate, as calculated according to a formula established by the Board.

During the year ended December 31, 2023, the Funds did not participate in the Interfund Lending Program.

Directors and Officers: Certain directors and/or officers of the Companies are directors and/or officers of BlackRock or its affiliates. The Funds reimburse the Manager for a portion of the compensation paid to the Companies’ Chief Compliance Officer, which is included in Directors and Officer in the Statements of Operations.

Other Transactions: The Funds may purchase securities from, or sell securities to, an affiliated fund provided the affiliation is due solely to having a common investment adviser, common officers, or common directors. For the year ended December 31, 2023, the purchase and sale transactions and any net realized gains (losses) with affiliated funds in compliance with Rule 17a-7 under the 1940 Act were as follows:

<i>Fund Name</i>	<i>Purchases</i>	<i>Sales</i>	<i>Net Realized Gain (Loss)</i>
Advantage Large Cap Core	\$ 14,049,084	\$ 19,853,273	\$ 1,026,988
Capital Appreciation	812,186	—	—
Sustainable Balanced	28,509,688	35,094,271	2,718,543

7. PURCHASES AND SALES

For the year ended December 31, 2023, purchases and sales of investments, including paydowns/payups, mortgage dollar rolls and excluding short-term securities, were as follows:

<i>Fund Name</i>	<i>U.S. Government Securities</i>		<i>Other Securities</i>	
	<i>Purchases</i>	<i>Sales</i>	<i>Purchases</i>	<i>Sales</i>
Advantage Large Cap Core	\$ —	\$ —	\$ 198,170,689	\$ 213,656,530
Capital Appreciation	—	—	41,312,968	57,876,853
Global Allocation	8,736,807	13,726,700	276,749,027	277,772,566
High Yield	—	—	12,289,527	11,181,215
Sustainable Balanced	15,861,365	5,869,442	489,049,032	506,688,291

For the year ended December 31, 2023, purchases and sales related to mortgage dollar rolls were as follows:

<i>Fund Name</i>	<i>Purchases</i>	<i>Sales</i>
Global Allocation	\$ 80,411,194	\$ 80,366,083
Sustainable Balanced	98,112,502	98,050,778

8. INCOME TAX INFORMATION

It is each Fund’s policy to comply with the requirements of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies, and to distribute substantially all of its taxable income to its shareholders. Therefore, no U.S. federal income tax provision is required.

Each Fund files U.S. federal and various state and local tax returns. No income tax returns are currently under examination. The statute of limitations on each Fund’s U.S. federal tax returns generally remains open for a period of three years after they are filed. The statutes of limitations on each Fund’s state and local tax returns may remain open for an additional year depending upon the jurisdiction.

Management has analyzed tax laws and regulations and their application to the Funds as of December 31, 2023, inclusive of the open tax return years, and does not believe that there are any uncertain tax positions that require recognition of a tax liability in the Funds’ financial statements.

Notes to Financial Statements (continued)

U.S. GAAP requires that certain components of net assets be adjusted to reflect permanent differences between financial and tax reporting. These reclassifications have no effect on net assets or NAVs per share. As of period end, permanent differences attributable to non-deductible expenses were reclassified to the following accounts:

<i>Fund Name</i>		<i>Paid-In Capital</i>	<i>Accumulated Earnings (Loss)</i>
Global Allocation	\$	(11)	\$ 11
High Yield		(2)	2

The tax character of distributions paid was as follows:

<i>Fund Name</i>		<i>Year Ended 12/31/23</i>	<i>Year Ended 12/31/22</i>
Advantage Large Cap Core			
Ordinary income	\$	1,724,219	\$ 3,891,451
Long-term capital gains		3,266,873	3,680,269
	\$	4,991,092	\$ 7,571,720
Capital Appreciation			
Ordinary income	\$	1,758,434	\$ 537,564
Long-term capital gains		3,602,658	16,370,976
	\$	5,361,092	\$ 16,908,540
Global Allocation			
Ordinary income	\$	4,183,933	\$ 4,558,257
Return of capital	\$	—	\$ 246,211
	\$	4,183,933	\$ 4,804,468
Government Money Market			
Ordinary income	\$	4,931,339	\$ 1,186,997
High Yield			
Ordinary income	\$	1,311,289	\$ 1,119,738
Return of capital	\$	—	\$ 41,567
	\$	1,311,289	\$ 1,161,305
Sustainable Balanced			
Ordinary income	\$	7,130,405	\$ 5,964,872
Long-term capital gains		7,591,112	2,733,093
	\$	14,721,517	\$ 8,697,965

As of December 31, 2023, the tax components of accumulated earnings (loss) were as follows:

<i>Fund Name</i>	<i>Undistributed Ordinary Income</i>	<i>Undistributed Long-Term Capital Gains</i>	<i>Non-Expiring Capital Loss Carryforwards^(a)</i>	<i>Net Unrealized Gains (Losses)^(b)</i>	<i>Qualified Late-Year Capital Losses^(c)</i>	<i>Total</i>
Advantage Large Cap Core	\$ 812,683	\$ 1,114,615	\$ —	\$ 29,445,016	\$ —	\$ 31,372,314
Capital Appreciation	308,656	1,295,450	—	78,568,590	—	80,172,696
Global Allocation	2,988,072	—	—	3,917,563	—	6,905,635
Government Money Market	4,483	—	—	—	—	4,483
High Yield	—	—	(3,133,805)	(228,548)	—	(3,362,353)
Sustainable Balanced	8,201,717	—	—	19,046,847	(4,054,584)	23,193,980

^(a) Amounts available to offset future realized capital gains.

^(b) The difference between book-basis and tax-basis net unrealized gains (losses) was attributable primarily to the tax deferral of losses on wash sales and straddles, amortization and accretion methods of premiums and discounts on fixed income securities, the realization for tax purposes of unrealized gains (losses) on certain futures and foreign currency exchange contracts, the realization for tax purposes of unrealized gains on investments in passive foreign investment companies and constructive sales, the timing and recognition of partnership income, the accounting for swap agreements, the characterization of corporate actions and the classification of investments.

^(c) The Fund has elected to defer these qualified late-year losses and recognize such losses in the next taxable year.

As of December 31, 2023, gross unrealized appreciation and depreciation based on cost of investments (including short positions and derivatives, if any) for U.S. federal income tax purposes were as follows:

<i>Fund Name</i>	<i>Tax Cost</i>	<i>Gross Unrealized Appreciation</i>	<i>Gross Unrealized Depreciation</i>	<i>Net Unrealized Appreciation (Depreciation)</i>
Advantage Large Cap Core	\$ 162,203,762	\$ 32,630,505	\$ (3,295,328)	\$ 29,335,177
Capital Appreciation	148,365,308	79,478,016	(1,112,501)	78,365,515
Global Allocation	147,713,143	17,203,520	(10,622,117)	6,581,403
High Yield	21,646,286	478,401	(629,236)	(150,835)
Sustainable Balanced	434,193,337	42,487,324	(23,503,197)	18,984,127

9. BANK BORROWINGS

The Companies, on behalf of each Fund (except for Government Money Market), along with certain other funds managed by the Manager and its affiliates ("Participating Funds"), is party to a 364-day, \$2.50 billion credit agreement with a group of lenders. Under this agreement, the Funds may borrow to fund shareholder redemptions. Excluding commitments designated for certain individual funds, the Participating Funds, including the Funds, can borrow up to an aggregate commitment amount of \$1.75 billion at any time outstanding, subject to asset coverage and other limitations as specified in the agreement. The credit agreement has the following terms: a fee of 0.10% per annum on unused commitment amounts and interest at a rate equal to the higher of (a) Overnight Bank Funding Rate ("OBFR") (but, in any event, not less than 0.00%) on the date the loan is made plus 0.80% per annum, (b) the Fed Funds rate (but, in any event, not less than 0.00%) in effect from time to time plus 0.80% per annum on amounts borrowed or (c) the sum of (x) Daily Simple SOFR (but, in any event, not less than 0.00%) on the date the loan is made plus 0.10% and (y) 0.80% per annum. The agreement expires in April 2024 unless extended or renewed. These fees were allocated among such funds based upon portions of the aggregate commitment available to them and relative net assets of Participating Funds. During the year ended December 31, 2023, the Funds did not borrow under the credit agreement.

10. PRINCIPAL RISKS

In the normal course of business, the Funds invest in securities or other instruments and may enter into certain transactions, and such activities subject each Fund to various risks, including among others, fluctuations in the market (market risk) or failure of an issuer to meet all of its obligations. The value of securities or other instruments may also be affected by various factors, including, without limitation: (i) the general economy; (ii) the overall market as well as local, regional or global political and/or social instability; (iii) regulation, taxation or international tax treaties between various countries; or (iv) currency, interest rate and price fluctuations. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, or other events could have a significant impact on the Funds and their investments. Each Fund's prospectus provides details of the risks to which each Fund is subject.

On July 12, 2023, the SEC approved changes to money market fund regulations. These changes, among other things: (i) eliminate provisions that permit a money market fund to suspend redemptions except in liquidations, (ii) require institutional prime and institutional tax-exempt money market funds to impose mandatory liquidity fees under certain conditions, (iii) permit a discretionary liquidity fee for a non-government money market fund and (iv) increase minimum daily and weekly liquidity for all money market funds. These changes will be implemented over the next 12 months depending on the change and may affect the Funds' operations and return potential.

The Funds may be exposed to additional risks when reinvesting cash collateral in money market funds that do not seek to maintain a stable NAV per share of \$1.00, which may be subject to discretionary liquidity fees under certain circumstances.

Market Risk: Each Fund may be exposed to prepayment risk, which is the risk that borrowers may exercise their option to prepay principal earlier than scheduled during periods of declining interest rates, which would force each Fund to reinvest in lower yielding securities. Each Fund may also be exposed to reinvestment risk, which is the risk that income from each Fund's portfolio will decline if each Fund invests the proceeds from matured, traded or called fixed-income securities at market interest rates that are below each Fund portfolio's current earnings rate.

Valuation Risk: The market values of equities, such as common stocks and preferred securities or equity related investments, such as futures and options, may decline due to general market conditions which are not specifically related to a particular company. They may also decline due to factors which affect a particular industry or industries. A Fund may invest in illiquid investments. An illiquid investment is any investment that a Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. A Fund may experience difficulty in selling illiquid investments in a timely manner at the price that it believes the investments are worth. Prices may fluctuate widely over short or extended periods in response to company, market or economic news. Markets also tend to move in cycles, with periods of rising and falling prices. This volatility may cause each Fund's NAV to experience significant increases or decreases over short periods of time. If there is a general decline in the securities and other markets, the NAV of a Fund may lose value, regardless of the individual results of the securities and other instruments in which a Fund invests.

The price a Fund could receive upon the sale of any particular portfolio investment may differ from a Fund's valuation of the investment, particularly for securities that trade in thin or volatile markets or that are valued using a fair valuation technique or a price provided by an independent pricing service. Changes to significant unobservable inputs and assumptions (i.e., publicly traded company multiples, growth rate, time to exit) due to the lack of observable inputs may significantly impact the resulting fair value and therefore a Fund's results of operations. As a result, the price received upon the sale of an investment may be less than the value ascribed by a Fund, and a Fund could realize a greater than expected loss or lesser than expected gain upon the sale of the investment. A Fund's ability to value its investments may also be impacted by technological issues and/or errors by pricing services or other third-party service providers.

Counterparty Credit Risk: The Funds may be exposed to counterparty credit risk, or the risk that an entity may fail to or be unable to perform on its commitments related to unsettled or open transactions, including making timely interest and/or principal payments or otherwise honoring its obligations. The Funds manage counterparty credit risk by entering into transactions only with counterparties that the Manager believes have the financial resources to honor their obligations and by monitoring the financial stability of those counterparties. Financial assets, which potentially expose the Funds to market, issuer and counterparty credit risks, consist principally of financial instruments and receivables due from counterparties. The extent of the Funds' exposure to market, issuer and counterparty credit risks with respect to these financial assets is approximately their value recorded in the Statements of Assets and Liabilities, less any collateral held by the Funds.

A derivative contract may suffer a mark-to-market loss if the value of the contract decreases due to an unfavorable change in the market rates or values of the underlying instrument. Losses can also occur if the counterparty does not perform under the contract.

For OTC options purchased, each Fund bears the risk of loss in the amount of the premiums paid plus the positive change in market values net of any collateral held by the Funds should the counterparty fail to perform under the contracts. Options written by the Funds do not typically give rise to counterparty credit risk, as options written generally obligate the Funds, and not the counterparty, to perform. The Funds may be exposed to counterparty credit risk with respect to options written to the extent each Fund deposits collateral with its counterparty to a written option.

Notes to Financial Statements (continued)

With exchange-traded options purchased and exchange-traded futures and centrally cleared swaps, there is less counterparty credit risk to the Funds since the exchange or clearinghouse, as counterparty to such instruments, guarantees against a possible default. The clearinghouse stands between the buyer and the seller of the contract; therefore, credit risk is limited to failure of the clearinghouse. While offset rights may exist under applicable law, a Fund does not have a contractual right of offset against a clearing broker or clearinghouse in the event of a default (including the bankruptcy or insolvency). Additionally, credit risk exists in exchange-traded futures and centrally cleared swaps with respect to initial and variation margin that is held in a clearing broker's customer accounts. While clearing brokers are required to segregate customer margin from their own assets, in the event that a clearing broker becomes insolvent or goes into bankruptcy and at that time there is a shortfall in the aggregate amount of margin held by the clearing broker for all its clients, typically the shortfall would be allocated on a pro rata basis across all the clearing broker's customers, potentially resulting in losses to the Funds.

Geographic/Asset Class Risk: A diversified portfolio, where this is appropriate and consistent with a fund's objectives, minimizes the risk that a price change of a particular investment will have a material impact on the NAV of a fund. The investment concentrations within each Fund's portfolio are disclosed in its Schedule of Investments.

Certain Funds invest a significant portion of their assets in securities within a single or limited number of market sectors. When a fund concentrates its investments in this manner, it assumes the risk that economic, regulatory, political and social conditions affecting such sectors may have a significant impact on the Fund and could affect the income from, or the value or liquidity of, the Fund's portfolio. Investment percentages in specific sectors are presented in the Schedules of Investments.

Certain Funds invest a significant portion of their assets in high yield securities. High yield securities that are rated below investment-grade (commonly referred to as "junk bonds") or are unrated may be deemed speculative, involve greater levels of risk than higher-rated securities of similar maturity and are more likely to default. High yield securities may be issued by less creditworthy issuers, and issuers of high yield securities may be unable to meet their interest or principal payment obligations. High yield securities are subject to extreme price fluctuations, may be less liquid than higher rated fixed-income securities, even under normal economic conditions, and frequently have redemption features.

Certain Funds invest a significant portion of their assets in fixed-income securities and/or use derivatives tied to the fixed-income markets. Changes in market interest rates or economic conditions may affect the value and/or liquidity of such investments. Interest rate risk is the risk that prices of bonds and other fixed-income securities will decrease as interest rates rise and increase as interest rates fall. The Funds may be subject to a greater risk of rising interest rates due to the period of historically low interest rates that ended in March 2022. The Federal Reserve has recently been raising the federal funds rate as part of its efforts to address inflation. There is a risk that interest rates will continue to rise, which will likely drive down the prices of bonds and other fixed-income securities, and could negatively impact certain Funds' performance.

Certain Funds invest a significant portion of their assets in securities of issuers located in the United States. A decrease in imports or exports, changes in trade regulations, inflation and/or an economic recession in the United States may have a material adverse effect on the U.S. economy and the securities listed on U.S. exchanges. Proposed and adopted policy and legislative changes in the United States may also have a significant effect on U.S. markets generally, as well as on the value of certain securities. Governmental agencies project that the United States will continue to maintain elevated public debt levels for the foreseeable future which may constrain future economic growth. Circumstances could arise that could prevent the timely payment of interest or principal on U.S. government debt, such as reaching the legislative "debt ceiling." Such non-payment would result in substantial negative consequences for the U.S. economy and the global financial system. If U.S. relations with certain countries deteriorate, it could adversely affect issuers that rely on the United States for trade. The United States has also experienced increased internal unrest and discord. If these trends were to continue, they may have an adverse impact on the U.S. economy and the issuers in which the Funds invest.

As of period end, Capital Appreciation's investments had the following industry classifications:

INDUSTRY ALLOCATION

<i>Industry</i>	<i>Percent of Long-Term Investments</i>
Software	20.7%
Semiconductors & Semiconductor Equipment	14.5
Broadline Retail	8.4
Technology Hardware, Storage & Peripherals	8.4
Interactive Media & Services	5.9
Financial Services	5.8
Capital Markets	5.5
Other ^(a)	30.8

(a) All other industries held were less than 5% of long-term investments.

Significant Shareholder Redemption Risk: Certain shareholders may own or manage a substantial amount of fund shares and/or hold their fund investments for a limited period of time. Large redemptions of fund shares by these shareholders may force a fund to sell portfolio securities, which may negatively impact the fund's NAV, increase the fund's brokerage costs, and/or accelerate the realization of taxable income/gains and cause the fund to make additional taxable distributions to shareholders.

LIBOR Transition Risk: The Funds may be exposed to financial instruments that recently transitioned from, or continue to be tied to, the London Interbank Offered Rate ("LIBOR") to determine payment obligations, financing terms, hedging strategies or investment value. The United Kingdom's Financial Conduct Authority, which regulates LIBOR, has ceased publishing all LIBOR settings, but some USD LIBOR settings will continue to be published under a synthetic methodology until September 30, 2024 for certain legacy contracts. SOFR has been used increasingly on a voluntary basis in new instruments and transactions. Under U.S. regulations that implement a statutory fallback mechanism to replace LIBOR, benchmark rates based on SOFR have replaced LIBOR in certain financial contracts. The ultimate effect of the LIBOR transition process on the Funds is uncertain.

Notes to Financial Statements (continued)

11. CAPITAL SHARE TRANSACTIONS

Transactions in capital shares were as follows:

Fund Name/Share Class	Year Ended 12/31/23		Year Ended 12/31/22

12. SUBSEQUENT EVENTS

Management has evaluated the impact of all subsequent events on the Funds through the date the financial statements were issued and has determined that there were no subsequent events requiring adjustment or additional disclosure in the financial statements.

Report of Independent Registered Public Accounting Firm

To the Shareholders of BlackRock Advantage Large Cap Core Portfolio, BlackRock Capital Appreciation Portfolio, BlackRock Global Allocation Portfolio, BlackRock Government Money Market Portfolio, BlackRock Sustainable Balanced Portfolio, and BlackRock High Yield Portfolio, and the Board of Directors of BlackRock Series Fund, Inc. and BlackRock Series Fund II, Inc.:

Opinion on the Financial Statements and Financial Highlights

We have audited the accompanying statements of assets and liabilities of BlackRock Advantage Large Cap Core Portfolio, BlackRock Capital Appreciation Portfolio, BlackRock Global Allocation Portfolio, BlackRock Government Money Market Portfolio, BlackRock Sustainable Balanced Portfolio of BlackRock Series Fund, Inc., and of BlackRock High Yield Portfolio of BlackRock Series Fund II, Inc. (collectively, the "Funds"), including the schedules of investments, as of December 31, 2023, the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended, and the related notes. Such financial statements and financial highlights are consolidated for BlackRock Global Allocation Portfolio. In our opinion, the financial statements and financial highlights present fairly, in all material respects, the financial position of the Funds as of December 31, 2023, and the results of their operations for the year then ended, the changes in their net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements and financial highlights based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement, whether due to error or fraud. The Funds are not required to have, nor were we engaged to perform, an audit of their internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements and financial highlights, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements and financial highlights. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements and financial highlights. Our procedures included confirmation of securities owned as of December 31, 2023, by correspondence with custodians or counterparties; when replies were not received, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

Deloitte & Touche LLP
Boston, Massachusetts
February 14, 2024

We have served as the auditor of one or more BlackRock investment companies since 1992.

Statement Regarding Liquidity Risk Management Program

In compliance with Rule 22e-4 under the Investment Company Act of 1940, as amended (the "Liquidity Rule"), BlackRock Series Fund, Inc. ("Series Fund") and BlackRock Series Fund II, Inc. ("Series Fund II" and together with Series Fund, the "Companies" and each, a "Company") has adopted and implemented a liquidity risk management program (the "Program") for BlackRock Advantage Large Cap Core Portfolio, BlackRock Sustainable Balanced Portfolio, BlackRock Capital Appreciation Portfolio, BlackRock Global Allocation Portfolio and BlackRock High Yield Portfolio (the "Funds"), each a series of Series Fund and Series Fund II, as applicable, which is reasonably designed to assess and manage each Fund's liquidity risk.

The Board of Directors (the "Board") of Series Funds, on behalf of BlackRock Advantage Large Cap Core Portfolio, BlackRock Sustainable Balanced Portfolio, BlackRock Capital Appreciation Portfolio and BlackRock Global Allocation Portfolio, met on November 16-17, 2023 and the Board of Series Funds II, on behalf of BlackRock High Yield Portfolio met on November 14-15, 2023 (the "Meeting") to review the Program. The Boards previously appointed BlackRock Advisors, LLC or BlackRock Fund Advisors ("BlackRock"), each an investment adviser to certain BlackRock funds, as the program administrator for each Fund's Program, as applicable. BlackRock also previously delegated oversight of the Program to the 40 Act Liquidity Risk Management Committee (the "Committee"). At the Meetings, the Committee, on behalf of BlackRock, provided the Boards with a report that addressed the operation of the Program and assessed its adequacy and effectiveness of implementation, including the management of each Fund's Highly Liquid Investment Minimum ("HLIM") where applicable, and any material changes to the Program (the "Report"). The Report covered the period from October 1, 2022 through September 30, 2023 (the "Program Reporting Period").

The Report described the Program's liquidity classification methodology for categorizing each Fund's investments (including derivative transactions) into one of four liquidity buckets. It also referenced the methodology used by BlackRock to establish each Fund's HLIM and noted that the Committee reviews and ratifies the HLIM assigned to each Fund no less frequently than annually. The Report also discussed notable events affecting liquidity over the Program Reporting Period, including the imposition of capital controls in certain countries.

The Report noted that the Program complied with the key factors for consideration under the Liquidity Rule for assessing, managing and periodically reviewing each Fund's liquidity risk, as follows:

- a) ***The Fund's investment strategy and liquidity of portfolio investments during both normal and reasonably foreseeable stressed conditions.*** During the Program Reporting Period, the Committee reviewed whether each Fund's strategy is appropriate for an open-end fund structure with a focus on funds with more significant and consistent holdings of less liquid and illiquid assets. The Committee also factored a fund's concentration in an issuer into the liquidity classification methodology by taking issuer position sizes into account. Where a fund participated in borrowings for investment purposes (such as tender option bonds or reverse repurchase agreements), such borrowings were factored into the Program's calculation of a fund's liquidity bucketing. A fund's derivative exposure was also considered in such calculation.
- b) ***Short-term and long-term cash flow projections during both normal and reasonably foreseeable stressed conditions.*** During the Program Reporting Period, the Committee reviewed historical redemption activity and used this information as a component to establish each Fund's reasonably anticipated trading size utilized for liquidity classifications. Each Fund has adopted an in-kind redemption policy which may be utilized to meet larger redemption requests. The Committee may also take into consideration a fund's shareholder ownership concentration (which, depending on product type and distribution channel, may or may not be available), a fund's distribution channels, and the degree of certainty associated with a fund's short-term and long-term cash flow projections.
- c) ***Holdings of cash and cash equivalents, as well as borrowing arrangements.*** The Committee considered the terms of the credit facility committed to each Fund, the financial health of the institution providing the facility and the fact that the credit facility is shared among multiple funds (including that a portion of the aggregate commitment amount is specifically designated for BlackRock Floating Rate Income Portfolio, a series of BlackRock Funds V, and BlackRock Floating Rate Loan ETF, a series of BlackRock ETF Trust II). The Committee also considered other types of borrowing available to the funds, such as the ability to use reverse repurchase agreements and interfund lending, as applicable.

There were no material changes to the Program during the Program Reporting Period other than the enhancement of certain model components in the Program's classification methodology. The Report provided to the Board stated that the Committee concluded that based on the operation of the functions, as described in the Report, the Program is operating as intended and is effective in implementing the requirements of the Liquidity Rule.

Independent Directors^(a) (continued)Interested Directors^{(a)(d)}

Name Year of Birth ^(b)	Position(s) Held (Length of Service) ^(c)	Principal Occupation(s) During Past 5 Years	Number of BlackRock-Advised Registered Investment Companies ("RICs") Consisting of Investment Portfolios ("Portfolios") Overseen	Public Company and Other Investment Company Directorships Held During Past 5 Years
Robert Fairbairn 1965	Director (Since 2015)	Vice Chairman of BlackRock, Inc. since 2019; Member of BlackRock's Global Executive and Global Operating Committees; Co-Chair of BlackRock's Human Capital Committee; Senior Managing Director of BlackRock, Inc. from 2010 to 2019; oversaw BlackRock's Strategic Partner Program and Strategic Product Management Group from 2012 to 2019; Member of the Board of Managers of BlackRock Investments, LLC from 2011 to 2018; Global Head of BlackRock's Retail and iShares® businesses from 2012 to 2016.	97 RICs consisting of 268 Portfolios	None
John M. Perlowski ^(e) 1964	Director (Since 2015); President and Chief Executive Officer (Since 2010)	Managing Director of BlackRock, Inc. since 2009; Head of BlackRock Global Accounting and Product Services since 2009; Advisory Director of Family Resource Network (charitable foundation) since 2009.	97 RICs consisting of 270 Portfolios	None

^(a) The address of each Director is c/o BlackRock, Inc., 50 Hudson Yards, New York, New York 10001.

^(b) Each Independent Director holds office until his or her successor is duly elected and qualifies or until his or her earlier death, resignation, retirement or removal as provided by the Company's by-laws or charter or statute, or until December 31 of the year in which he or she turns 75. Directors who are "interested persons," as defined in the 1940 Act, serve until their successor is duly elected and qualifies or until their earlier death, resignation, retirement or removal as provided by the Company's by-laws or statute, or until December 31 of the year in which they turn 72. The Board may determine to extend the terms of Independent Directors on a case-by-case basis, as appropriate.

^(c) Following the combination of Merrill Lynch Investment Managers, L.P. ("MLIM") and BlackRock, Inc. in September 2006, the various legacy MLIM and legacy BlackRock fund boards were realigned and consolidated into three new fund boards in 2007. In addition, effective January 1, 2019, three BlackRock Fund Complexes were realigned and consolidated into two BlackRock Fund Complexes. As a result, although the chart shows the year that each Independent Director joined the Board, certain Independent Directors first became members of the boards of other BlackRock-advised Funds, legacy MLIM funds or legacy BlackRock funds as follows: Susan J. Carter, 2016; Collette Chilton, 2015; Neil A. Cotty, 2016; Cynthia A. Montgomery, 1994; Mark Stalnecker, 2015; Kenneth L. Urish, 1999; Claire A. Walton, 2016.

^(d) Mr. Fairbairn and Mr. Perlowski are both "interested persons," as defined in the 1940 Act, of the Company based on their positions with BlackRock, Inc. and its affiliates. Mr. Fairbairn and Mr. Perlowski are also board members of the BlackRock Fixed-Income Complex.

^(e) Mr. Perlowski is also a trustee of the BlackRock Credit Strategies Fund and BlackRock Private Investments Fund.

Officers Who Are Not Directors^(a)

Name Year of Birth ^(b)	Position(s) Held (Length of Service)	Principal Occupation(s) During Past 5 Years

Robert Fairbairn 1965	Director (Since 2015)	Vice Chairman of BlackRock, Inc. since 2019; Member of BlackRock's Global Executive and Global Operating Committees; Co-Chair of BlackRock's Human Capital Committee; Senior Managing Director of BlackRock, Inc. from 2010 to 2019; oversaw BlackRock's Strategic Partner Program and Strategic Product Management Group from 2012 to 2019; Member of the Board of Managers of BlackRock Investments, LLC from 2011 to 2018; Global Head of BlackRock's Retail and iShares® businesses from 2012 to 2016.	97 RICs consisting of 268 Portfolios	None
John M. Perlowski ^(d) 1964	Director (Since 2015); President and Chief Executive Officer (Since 2010)	Managing Director of BlackRock, Inc. since 2009; Head of BlackRock Global Accounting and Product Services since 2009; Advisory Director of Family Resource Network (charitable foundation) since 2009.	99 RICs consisting of 270 Portfolios	None

^(a) The address of each Director is c/o BlackRock, Inc., 50 Hudson Yards, New York, New York 10001.

^(b) Each Independent Director holds office until his or her successor is duly elected and qualifies or until his or her earlier death, resignation, retirement or removal as provided by the Company's by-laws or charter or statute, or until December 31 of the year in which he or she turns 75. Directors who are "interested persons," as defined in the Investment Company Act serve until their successor is duly elected and qualifies or until their earlier death, resignation, retirement or removal as provided by the Company's by-laws or statute, or until December 31 of the year in which they turn 72. The Board may determine to extend the terms of Independent Directors on a case-by-case basis, as appropriate.

^(c) Following the combination of Merrill Lynch Investment Managers, L.P. ("MLIM") and BlackRock, Inc. in September 2006, the various legacy MLIM and legacy BlackRock fund boards were realigned and consolidated into three new fund boards in 2007. Certain Independent Directors first became members of the boards of other legacy MLIM or legacy BlackRock funds as follows: Frank J. Fabozzi, 1988; R. Glenn Hubbard, 2004; and W. Carl Kester, 1995. Certain other Independent Directors became members of the boards of the closed-end funds in the Fixed-Income Complex as follows: Cynthia L. Egan, 2016; and Catherine A. Lynch, 2016.

^(d) Dr. Fabozzi, Ms. Egan, Dr. Kester, Ms. Lynch, Mr. Steinmetz and Mr. Perlowski are also trustees of the BlackRock Credit Strategies Fund and BlackRock Private Investments Fund.

^(e) Mr. Fairbairn and Mr. Perlowski are both "interested persons," as defined in the 1940 Act, of the Company based on their positions with BlackRock, Inc. and its affiliates. Mr. Fairbairn and Mr. Perlowski are also board members of the BlackRock Multi-Asset Complex.

^(f) Mr. Steinmetz is currently classified as a non-management interested Director based on his former directorship at another company that is not an affiliate of BlackRock, Inc. Mr. Steinmetz does not currently serve as an officer or employee of BlackRock, Inc. or its affiliates or own any securities of BlackRock, Inc. It is anticipated that Mr. Steinmetz will become an Independent Director effective January 19, 2024.

Officers Who Are Not Directors^(a)

Name Year of Birth ^(b)	Position(s) Held (Length of Service)	Principal Occupation(s) During Past 5 Years
Jennifer McGovern 1977	Vice President (Since 2014)	Managing Director of BlackRock, Inc. since 2016; Director of BlackRock, Inc. from 2011 to 2015; Head of Americas Product Development and Governance for BlackRock's Global Product Group since 2019; Head of Product Structure and Oversight for BlackRock's U.S. Wealth Advisory Group from 2013 to 2019.
Trent Walker 1974	Chief Financial Officer (Since 2021)	Managing Director of BlackRock, Inc. since September 2019; Executive Vice President of PIMCO from 2016 to 2019; Senior Vice President of PIMCO from 2008 to 2015; Treasurer from 2013 to 2019 and Assistant Treasurer from 2007 to 2017 of PIMCO Funds, PIMCO Variable Insurance Trust, PIMCO ETF Trust, PIMCO Equity Series, PIMCO Equity Series VIT, PIMCO Managed Accounts Trust, 2 PIMCO-sponsored interval funds and 21 PIMCO-sponsored closed-end funds.
Jay M. Fife 1970	Treasurer (Since 2007)	Managing Director of BlackRock, Inc. since 2007.
Aaron Wasserman 1974	Chief Compliance Officer (Since 2023)	Managing Director of BlackRock, Inc. since 2018; Chief Compliance Officer of the BlackRock-advised funds in the BlackRock Multi-Asset Complex, the BlackRock Fixed-Income Complex and the iShares Complex since 2023; Deputy Chief Compliance Officer for the BlackRock-advised funds in the BlackRock Multi-Asset Complex, the BlackRock Fixed-Income Complex and the iShares Complex from 2014 to 2023.
Lisa Belle 1968	Anti-Money Laundering Compliance Officer (Since 2019)	Managing Director of BlackRock, Inc. since 2019; Global Financial Crime Head for Asset and Wealth Management of JP Morgan from 2013 to 2019; Managing Director of RBS Securities from 2012 to 2013; Head of Financial Crimes for Barclays Wealth Americas from 2010 to 2012.
Janey Ahn 1975	Secretary (Since 2019)	Managing Director of BlackRock, Inc. since 2018; Director of BlackRock, Inc. from 2009 to 2017.

^(a) The address of each Officer is c/o BlackRock, Inc., 50 Hudson Yards, New York, New York 10001.

^(b) Officers of the Company serve at the pleasure of the Board.

Further information about the Company's Directors and Officers is available in the Company's Statement of Additional Information, which can be obtained without charge by calling (800) 441-7762.

Effective July 1, 2023, Aaron Wasserman replaced Charles Park as Chief Compliance Officer of the Company.

Effective December 31, 2023, Frank Fabozzi retired as Director of the Company.

Effective January 19, 2024, Arthur Steinmetz became an Independent Director of the Company.

Tailored Shareholder Reports for Open-End Mutual Funds and ETFs

Effective January 24, 2023, the SEC adopted rule and form amendments to require open-end mutual funds and ETFs to transmit concise and visually engaging streamlined annual and semiannual reports to shareholders that highlight key information. Other information, including financial statements, will no longer appear in a streamlined shareholder report but must be available online, delivered free of charge upon request, and filed on a semiannual basis on Form N-CSR. The rule and form amendments have a compliance date of July 24, 2024. At this time, management is evaluating the impact of these amendments on the shareholder reports for the Funds.

General Information

Quarterly performance, semi-annual and annual reports and other information regarding the Funds may be found on BlackRock's website, which can be accessed at [blackrock.com](https://www.blackrock.com). Any reference to BlackRock's website in this report is intended to allow investors public access to information regarding the Funds and does not, and is not intended to, incorporate BlackRock's website in this report.

Householding

The Funds will mail only one copy of shareholder documents, including prospectuses, annual and semi-annual reports and proxy statements, to shareholders with multiple accounts at the same address. This practice is commonly called "householding" and is intended to reduce expenses and eliminate duplicate mailings of shareholder documents. Mailings of your shareholder documents may be househanded indefinitely unless you instruct us otherwise. If you do not want the mailing of these documents to be combined with those for other members of your household, please call the Funds at (800) 441-7762.

Availability of Quarterly Schedule of Investments

The Funds (except BlackRock Government Money Market Portfolio) file their complete schedules of portfolio holdings with the SEC for the first and third quarters of each fiscal year as an exhibit to their reports on Form N-PORT. The Funds' Forms N-PORT are available on the SEC's website at [sec.gov](https://www.sec.gov).

The BlackRock Government Money Market Portfolio files its complete schedule of portfolio holdings with the SEC each month on Form N-MFP. The Fund's reports on Form N-MFP are available on the SEC's website at [sec.gov](https://www.sec.gov). The Fund makes portfolio holdings available to shareholders on its website at [blackrock.com](https://www.blackrock.com).

Availability of Proxy Voting Policies, Procedures and Voting Records

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities and information about how the Funds voted proxies relating to securities held in the Funds' portfolios during the most recent 12-month period ended June 30 is available without charge, upon request (1) by calling (800) 441-7762; (2) on the BlackRock website at [blackrock.com/prospectus/insurance](https://www.blackrock.com/prospectus/insurance); and (3) on the SEC's website at [sec.gov](https://www.sec.gov).

BlackRock's Mutual Fund Family

BlackRock offers a diverse lineup of open-end mutual funds crossing all investment styles and managed by experts in equity, fixed-income and tax-exempt investing. Visit [blackrock.com](https://www.blackrock.com) for more information.

Shareholder Privileges

Account Information

Call us at (800) 441-7762 from 8:00 AM to 6:00 PM ET on any business day to get information about your account balances, recent transactions and share prices. You can also visit [blackrock.com](https://www.blackrock.com) for more information.

Additional Information (continued)

Automatic Investment Plans

Investor class shareholders who want to invest regularly can arrange to have \$50 or more automatically deducted from their checking or savings account and invested in any of the BlackRock funds.

Systematic Withdrawal Plans

Investor class shareholders can establish a systematic withdrawal plan and receive periodic payments of \$50 or more from their BlackRock funds, as long as their account balance is at least \$10,000.

Retirement Plans

Shareholders may make investments in conjunction with Traditional, Rollover, Roth, Coverdell, Simple IRAs, SEP IRAs and 403(b) Plans.

BlackRock Privacy Principles

BlackRock is committed to maintaining the privacy of its current and former fund investors and individual clients (collectively, "Clients") and to safeguarding their non-public personal information. The following information is provided to help you understand what personal information BlackRock collects, how we protect that information and why in certain cases we share such information with select parties.

If you are located in a jurisdiction where specific laws, rules or regulations require BlackRock to provide you with additional or different privacy-related rights beyond what is set forth below, then BlackRock will comply with those specific laws, rules or regulations.

BlackRock obtains or verifies personal non-public information from and about you from different sources, including the following: (i) information we receive from you or, if applicable, your financial intermediary, on applications, forms or other documents; (ii) information about your transactions with us, our affiliates, or others; (iii) information we receive from a consumer reporting agency; and (iv) from visits to our websites.

BlackRock does not sell or disclose to non-affiliated third parties any non-public personal information about its Clients, except as permitted by law or as is necessary to respond to regulatory requests or to service Client accounts. These non-affiliated third parties are required to protect the confidentiality and security of this information and to use it only for its intended purpose.

We may share information with our affiliates to service your account or to provide you with information about other BlackRock products or services that may be of interest to you. In addition, BlackRock restricts access to non-public personal information about its Clients to those BlackRock employees with a legitimate business need for the information. BlackRock maintains physical, electronic and procedural safeguards that are designed to protect the non-public personal information of its Clients, including procedures relating to the proper storage and disposal of such information.

This report is authorized for distribution only to Policyowners of certain variable life insurance policies, which are funded by shares of BlackRock Series Fund, Inc. and BlackRock Series Fund II, Inc. It is not authorized for use as an offer of sale or a solicitation of an offer to buy shares of the Fund or the policies. Past performance results shown in this report should not be considered a representation of future performance. Investment returns and principal value of shares will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance information used throughout this report does not include insurance-related fees and expenses. An investment in BlackRock Government Money Market Portfolio is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other Government agency. BlackRock Government Money Market Portfolio's sponsor has no legal obligation to provide financial support to the Portfolio. Total return information assumes reinvestment of all distributions. Current performance may be higher or lower than the performance data quoted. For current month-end performance, call (800) 626-1960. BlackRock Government Money Market Portfolio's current 7-day yield more closely reflects the current earnings of the Portfolio than the total returns quoted. Although BlackRock Government Money Market Portfolio seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so and it is possible to lose money by investing in the Portfolio. Statements and other information herein are as dated and are subject to change. Please see the Fund's prospectus for a description of risks associated with global investments.
