Benchmark	18.12	4.16	9.46	N/A	6.88
Morningstar Average	13.78	3.43	8.16	6.07	N/A

CALENDAR YEAR PERFORMANCE

Without Sales Charge	2019	2020	2021	2022	2023	YTD	4Q2023
Class K	19.92	4.54	10.82	-17.23	14.35	14.35	8.60
Benchmark	21.92	14.06	14.43	-16.40	18.12	18.12	10.04
Morningstar Average	19.23	11.72	13.89	-13.64	13.78	13.78	8.60

Performance data shown represents past performance which is no guarantee of future results. Investment returns and principal values may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. All returns assume reinvestment of all dividend and capital gain distributions. Refer to blackrock.com for current month-end performance. Index performance is shown for illustrative purposes only. It is not possible to invest directly in an unmanaged index. Class K shares have limited availability. The performance information for periods prior to the inception date of the share class shows the performance of the Fund's Institutional Shares. The performance of this share class would be substantially similar to Institutional Shares because this share class and Institutional Shares invest in the same portfolio of securities and performance would only differ to the extent that this share class and Institutional Shares have different expenses. See the fund prospectus for more details.

MORNINGSTAR RANKINGS

	1 Year	3 Year	5 Year	10 Year
Morningstar Ranking	294/754	579/700	603/658	N/A
Quartile Rank	2	4	4	N/A

Rankings based on total return excluding sales charges, independently calculated and not combined to create an overall ranking. For periods not shown, Morningstar does not provide rankings based on synthetic performance.

KEY RISKS: *The fund is actively managed and its characteristics will vary. Holdings shown should not be deemed as a recommendation to buy or sell securities. Fund of funds are subject to the risks associated with the underlying BlackRock funds in which it invests. Stock and bond values fluctuate in price so the value of your investment can go down depending on market conditions. Fixed income risks include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refers to the possibility that the bond issuer will not be able to make principal and interest payments. Non-investment-grade debt securities (high-yield/junk bonds) may be subject to greater market fluctuations, risk of default or loss of income and principal than higher rated securities. Asset allocation strategies do not assure profit and do not protect against loss. Non-diversification of investments means that more assets are potentially invested in fewer securities than if investments were diversified, so risk is increased because each investment has a greater effect on performance. The fund may use derivatives to hedge its investments or to seek to enhance returns. Derivatives entail risks relating to liquidity, leverage and credit that may reduce returns and increase volatility. Covered call risk is the risk that the issuer will forgo any profit from increases in the market value of the security covering the call option but retain the risk of loss if the security declines in value. A number of factors may influence the option holder's decision to exercise the option, including the value of the security, price volatility, dividend yield and interest rates. To the extent that these factors increase the value of the call option, the option holder is more likely to exercise the option, which may negatively affect the fund.*

KEY FACTS

Size of Fund (Millions)	**$1,131.8M**
Fund Launch Date	**11/03/2014**
Share Class Launch Date	**03/28/2016**
Morningstar Category	**Moderate Allocation**
Number of Holdings	**2,058**
Benchmark	**70% MSCI World Index/30% Bloomberg U.S. Aggregate Bond Index (USD)**

ANNUAL EXPENSES

Gross Expense Ratio	**0.79%**
Net Expense Ratio	**0.63%**

The Net Expense Ratio excluding Investment Related Expenses is 0.60% Investment Related Expenses include acquired fund fees of 0.03%, and interest expense (cost of borrowing securities to seek to enhance return or reduce risk) of 0.00%, and certain other expenses, if applicable. Expenses stated as of the fund's most recent prospectus. The difference between gross and net expense ratios are due to contractual and/or voluntary waivers, if applicable. This share class has a contractual waiver with an end date of 06/30/2025 terminable upon 90 days' notice. BlackRock may agree to voluntarily waive certain fees and expenses, which the adviser may discontinue at any time without notice.

Sharpe Ratio	0.01	0.21

[2] % of net assets represents the Fund's exposure based on the economic value of securities and is adjusted for futures, options, swaps, and convertible bonds. Allocations subject to change.

[3] The fund itself has not been rated by an independent rating agency. Credit quality ratings on underlying securities of the fund are received from S&P, Moody's and Fitch and converted to the equivalent S&P major rating category. This breakdown is provided by BlackRock and takes the median rating of the three agencies when all three agencies rate a security the lower of the two ratings if only two agencies rate a security and one rating if that is all that is provided. Unrated securities do not necessarily indicate low quality. Below investment-grade is represented by a rating of BB and below. Ratings and portfolio credit quality may change over time. Negative weightings may result from specific circumstances (including timing differences between trade and settle dates of securities purchased by the funds) and/or the use of certain financial instruments, including derivatives, which may be used to gain or reduce market exposure and/or risk management. Certain transactions the funds may utilize may give rise to a form of leverage through either (a) additional market exposure or (b) borrowing capital in an attempt to increase investment return. The use of such transactions includes certain leverage-related risks, including potential for higher volatility, greater decline of the fund's net asset value and fluctuations of dividends and distributions paid by the fund.

Alpha: *A measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a mutual fund and compares its risk-adjusted performance to a benchmark index. The excess return of the fund relative to the return of the benchmark index is a fund's alpha.* ***Standard Deviation:*** *Standard Deviation measures the volatility of the funds returns. Higher deviation represents higher volatility.* ***Sharpe Ratio:*** *Sharpe Ratio uses a funds standard deviation and its excess return (difference between the funds return and the risk-free return of 90 -day Treasury Bills) to determine reward per unit of risk.* ***Model Duration:*** *Model Duration measures the sensitivity of the price of a bond to changes in interest rates, taking into account after-tax impact as well as the likelihood of the bond being called, put and/or sunk prior to maturity. BlackRock's options-based duration model employs certain assumptions and may differ from other fund complexes.* ***30-day SEC Yield:*** *A standard calculation of yield introduced by the SEC to provide fairer comparison among funds. This yield reflects the interest earned after deducting the fund's expenses during the most recent 30-day period by the average investor in the fund.* ***Unsubsidized SEC Yield:*** *Represents what a fund's 30-Day SEC Yield would have been had no fee waivers or expense reimbursement been in place over the period. Negative 30-Day SEC Yield results when accrued expenses of the past 30 days exceed the income collected during the past 30 days.*

You should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. The prospectus and, if available, the summary prospectus contain this and other information about the fund and are available, along with information on other BlackRock funds, by calling 800-882-0052 or from your financial professional. The prospectus should be read carefully before investing. Investing involves risks including possible loss of principal.

The blended benchmark is 70% MSCI World/30% Bloomberg U.S. Aggregate Bond Index. The Morgan Stanley Capital International World Index measures equity performance of 23 developed markets. The Bloomberg U.S. Aggregate Bond Index comprises the total U.S. investment grade bond market.
