Performance data quoted represents past performance and is no guarantee of future results. Investment returns and principal values may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. All returns assume reinvestment of all dividend and capital gain distributions. Refer to [www.blackrock.com](http://www.blackrock.com) for current month-end performance. Investment returns reflect total fund operating expenses, net of all fees, waivers, and/or expense reimbursements. Index performance is shown for illustrative purposes only. It is not possible to invest directly in an unmanaged index.

The share classes have different sales charges, fees and other features.

Returns with sales charge reflect the deduction of current maximum initial sales charge of 4% for Unit Class A and applicable contingent deferred sales charges (CDSC) for Unit Class C. The maximum CDSC of 1% for Unit Class C is reduced to 0% after 1 year.

Unit Class I are purchased with no initial sales charge, no CDSC charge applied and no ongoing sales charge. Only available to certain clients or intermediaries.

1.4	110.8	1.4	0.4	0.1	3.2	0.2	-17.3	-0.2

The fund itself has not been rated by an independent rating agency. Credit quality ratings on underlying securities of the fund are received from S&P, Moody's and Fitch and converted to the equivalent S&P major rating category. This breakdown is provided by BlackRock and takes the median rating of the three agencies when all three agencies rate a security, the lower of the two ratings if only two agencies rate a security and one rating if that is all that is provided. Unrated securities do not necessarily indicate low quality. Below-investment-grade is represented by a rating of BB and below. Ratings and portfolio credit quality may change over time.

*BlackRock CollegeAdvantage 529 Plan is offered to residents of all states. However, you should note that (i) depending on the laws of the state where you or your beneficiary live or pay state income taxes, favorable state tax treatment or other benefits offered by the applicable state for investing in qualified tuition programs may be available only for investments in such state's qualified tuition program, (ii) any state-based benefit offered with respect to a particular qualified tuition program should be one of many appropriately weighted factors to consider in making an investment decision and (iii) you should consult with your financial, tax or other advisers to learn more about how state tax and state-based benefits (such as financial aid, scholarship funds and protection from creditors that are only available for investments in such state's qualified tuition program) would apply to your specific circumstances and you may wish to contact your home state and your beneficiary's home state, or any other qualified tuition program, to learn more about the features, benefits and limitations of the applicable state's qualified tuition program.*

**Negative weightings** may result from specific circumstances (including timing differences between trade and settle dates of securities purchased by the funds) and/or the use of certain financial instruments, including derivatives, which may be used to gain or reduce market exposure and/or risk management. Certain transactions the funds may utilize may give rise to a form of leverage through either additional market exposure or borrowing capital in an attempt to increase investment return. The use of such transactions includes certain leverage-related risks, including potential for higher volatility, greater decline of the fund's net asset value and fluctuations of dividends and distributions paid by the fund. **% Notional Exposures** represents a fund's use of derivatives, including, but not limited to, futures, options and swaps. This value captures the fund exposures as if the derivative was replaced with the underlying asset and the corresponding financing or lending, such that all exposures sum to the net asset value. For non-derivatives, the Market Value and the Notional Market Value are identical.

**Important Risks:** *The fund is actively managed and its characteristics will vary. Holdings shown should not be deemed as a recommendation to buy or sell securities. Bond values fluctuate in price so the value of your investment can go down depending on market conditions. Fixed income risks include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refers to the possibility that the bond issuer will not be able to make principal and interest payments. Principal of mortgage- or asset-backed securities normally may be prepaid at any time, reducing the yield and market value of those securities. Obligations of U.S. government agencies are supported by varying degrees of credit but generally are not backed by the full faith and credit of the U.S. government. Non-investment-grade debt securities (high-yield/junk bonds) may be subject to greater market fluctuations, risk of default or loss of income and principal than higher-rated securities. International investing involves risks including, but not limited to political risks, currency fluctuations, illiquidity and volatility. These risks may be heightened in emerging markets. If the index measuring inflation falls, the principal value of inflation-indexed bonds will go down and the interest payable will be reduced. Any increase in the principal amount will be considered taxable ordinary income. Repayment of the original bond principal upon maturity (adjusted for inflation) is guaranteed for U.S. Treasury inflation-indexed bonds. For bonds that do not provide a guarantee, the adjusted principal value repaid at maturity may be less than the original principal. The fund may use derivatives to hedge investments or seek enhanced returns. Derivatives entail risks relating to liquidity, leverage and credit that may reduce returns and increase volatility.*

*An investor should consider the investment objectives, risks, charges and expenses associated with municipal fund securities before investing. More information about municipal fund securities is available in the issuer's program description. You may obtain a program description or current month-end performance for any investment option by visiting [www.blackrock.com/collegeadvantage](http://www.blackrock.com/collegeadvantage), calling 866-529-8582 or contacting your financial professional. The program description should be read carefully before investing.*

*Any investment in a BlackRock CollegeAdvantage mutual fund-based investment option is not insured or guaranteed by the FDIC or any other government agency or other party, including the custodian/state of Ohio, the Tuition Trust, BlackRock or any of the mutual fund firms under contract with the Ohio Tuition Trust Authority. Investing involves risks including possible loss of principal.*

**1** Performance data reflects fees, expenses and annual asset-based fees for each underlying fund. Because the 529 Option has higher expense ratios than the underlying funds, it will have lower performance than the underlying funds. However, the underlying funds do not offer the same tax advantages as the 529 Option. Performance differences also are caused by differences in the trade dates of Portfolio purchases. When you invest money in a 529 Option, you receive Program Units as of the trade date. The trade date for the purchase of underlying fund shares typically will be one business day after the trade date for your investment. **2** The unmanaged Bloomberg U.S. TIPS Index comprises U.S. Treasury Inflation Linked Indexed securities. Indexes assume reinvestment of distributions and interest payments and exclude fees. Securities held by the underlying funds do not match those in the indexes and 529 Option performance will differ. **3 Weighted Average Life** is the average number of years for which each dollar of unpaid principal on a loan or mortgage remains outstanding. **Effective Duration** measures the sensitivity of the price of a bond with embedded options to changes in interest rates, taking into account the likelihood of the bond being called, put and/or sunk prior to its final maturity date. BlackRock uses a proprietary duration model which employs certain assumptions and may differ from other fund complexes. Effective Duration is measured at the portfolio level and adjusted for leverage, hedging transactions and non-bond holdings, including derivatives. BlackRock provides compensation in connection with obtaining or using third-party ratings and rankings.

\*BlackRock CollegeAdvantage has been awarded the Bronze medal rating as of November 2, 2023. The Morningstar Medalist Rating™ is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about these ratings, including their methodology, please go to [global.morningstar.com/managerdisclosures/](http://global.morningstar.com/managerdisclosures/). The Morningstar Medalist Ratings are not statements of fact, nor are they credit or risk ratings. The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate.
