BLACKROCK UCITS FUNDS

BACKGROUND

BlackRock UCITS Funds (the "Entity") is an open-ended unit trust established on 29 June 2007 as an umbrella fund under the laws of Ireland. The Entity was constituted by the Trust Deed dated 28 June 2007 between BlackRock Asset Management Ireland Limited (the "Manager") and J.P. Morgan Bank (Ireland) plc (the "Trustee") and is governed by an amended and restated Trust Deed dated 4 December 2009 and any deeds supplemental thereto. The Entity is authorised as a unit trust with segregated liability between the funds pursuant to the Unit Trusts Act, 1990 (the "Act"). The Entity is authorised and supervised by the Central Bank of Ireland ("CBI") pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations").

The Entity is constituted as an umbrella fund and comprises of separate funds ("Fund") of the Entity. The units of each Fund may be grouped into different classes of units (each a "unit class"). Each Fund will represent a separate portfolio of assets and may consist of one or more unit classes. Each unit class may apply different subscription and redemption provisions, charges, fees or brokerage arrangements. The creation of an additional class of units will be notified to the CBI in advance. The portfolio of assets maintained for each Fund will be invested in accordance with the investment objectives and policies applicable to each Fund as set out in the prospectus. The assets of each Fund shall belong exclusively to that Fund, shall be segregated from the assets of other Funds, shall not be used to discharge directly or indirectly the liabilities of or claims against any other Fund and shall not be available for any such purpose.

Where an asset or a liability of the Entity cannot be considered as being attributable to a particular Fund or Funds, the Manager shall have discretion, to determine the basis upon which such asset or liability shall be allocated between the Funds and the Manager shall have power at any time and from time to time to vary such basis, including allocating such asset or liability between all Funds or some of the Funds pro rata to their Net Asset Values ("NAV") or such other basis as the Manager determines.

The term "Fund" shall be deemed to mean either a Fund or Funds of the Entity, or if the context so requires, the Manager or its delegate acting for the accounts of the relevant Fund. The term "BlackRock" and "Investment Manager" are used to represent BlackRock Advisors (UK) Limited as appropriate. All references to "redeemable units" shall be deemed to mean redeemable participating units when Fund units are classified as financial liabilities. The term "Directors" means the directors of the Manager.

Further details, including the investment objectives and minimum subscription requirements, are set out in the Entity's prospectus.

Changes to the Entity during the financial period

On 23 April 2021, an amended credit facility agreement was issued to facilitate an increase in the credit facility available by JPMorgan Chase Bank, N.A. ("JPMorgan") and the other syndicated lenders to USD 300,000,000.

On 1 May 2021, Adele Spillane resigned as a non-executive Director of the Manager and was appointed as an executive Director of the Manager.

On 5 May 2021, Barry O'Dwyer resigned as a non-executive Director of the Manager and was appointed as an executive Director of the Manager.

On 24 May 2021, Patrick Boylan resigned as a non-executive Director of the Manager and was appointed as an executive Director of the Manager.

On 14 September 2021, Eimear Martin was appointed as a non-executive Director of the Manager.

Fund details

The Entity had 18 Funds in operation as at 30 September 2021.

United Kingdom exit from European Union

On 31 January 2020, the United Kingdom (the "UK") formally withdrew and ceased being a member of the European Union (the "EU"). Following this, the UK entered into a transition period which lasted for the remainder of 2020, during which period the UK was subject to applicable EU laws and regulations. The transition period expired on 31 December 2020, and EU law no longer applies in the UK.

On 30 December 2020, the UK and the EU signed an EU-UK Trade and Cooperation Agreement ("UK/EU Trade Agreement"), which applies from 1 January 2021 and sets out the foundation of the economic and legal framework for trade between the UK and the EU. As the UK/EU Trade Agreement is a new legal framework, the implementation of the Agreement may result in uncertainty in its application and periods of volatility in both the UK and wider European markets throughout 2021 and beyond. The UK's exit from the EU is expected to result in additional trade costs and disruptions in this trading relationship. While the UK/EU Trade Agreement provides for the free trade of goods, it provides only general commitments on market access in services together with a "most favoured nation" provision which is subject to many exceptions. Furthermore, there is the possibility that either party may impose tariffs on trade in the future in the event that regulatory standards between the EU and the UK diverge. The terms of the future relationship may cause continued uncertainty in the global financial markets, and adversely affect the performance of the Funds.

Volatility resulting from this uncertainty may mean that the returns of the Funds' investments are affected by market movements, the potential decline in the value of Sterling or Euro, and the potential downgrading of sovereign credit ratings of the UK or an EU member state.

Outbreak of COVID-19

The infectious respiratory illness caused by a novel coronavirus known as COVID-19 has given rise to an extended global pandemic. The impact of this significant event on the Funds' financial risk exposure is disclosed in Note 3.1.

The Manager has assessed the impact of market conditions arising from the COVID-19 outbreak on the Funds' ability to meet their investment objectives. Based on the latest available information, the Funds continue to be managed in line with their investment objectives, with no disruption to the operations of the Funds and the publication of NAV.

INVESTMENT MANAGER'S REPORT (continued)

Investment management approach

For non-replicating funds, the investment management approach aims to match the main risk characteristics of the benchmark index by investing in a portfolio that is primarily made up of securities that represent the benchmark index. The objective is to generate a return which is as close as practicable to the total return of the benchmark index net of transaction costs and gross of fees and other cost.

BLACKROCK UCITS FUNDS

INVESTMENT MANAGER'S REPORT (continued)

Performance summary and tracking error

The following table compares the realised Fund performance against the performance of the relevant benchmark index/performance measure during the financial period ended 30 September 2021. It also discloses the anticipated tracking error of the Fund (disclosed in the prospectus on an ex-ante basis) against the actual realised tracking error of the Fund as at 30 September 2021.

Further information on these performance measures and calculation methodologies used is detailed below:

- Fund returns disclosed are the performance returns for the primary unit class for each Fund, net of fees, which has been selected as a representative unit class. The primary unit class represents the class of unit invested in by the majority of investors in the Fund and also takes into account other relevant factors such as the Fund's base currency. The returns disclosed for the comparative are in the same currency as the primary unit class, unless otherwise stated. Performance returns for any other unit class can be made available on request.
- For Funds that commenced trading and/or fully redeemed during the financial period, returns are shown from the date the Fund commenced trading and/or to the date the Fund fully redeemed, and the total expense ratio ("TER") is the effective TER from the date the Fund commenced trading and/or to the date the Fund fully redeemed.
- Fund returns are based on the NAV calculated in accordance with the prospectus for the financial period under review with any dividends reinvested. Due to Financial Reporting Standard 104 Interim Financial Reporting ("FRS 104") requirements which apply to the financial statements, there may be differences between the NAV per unit as recorded in the financial statements and the NAV per unit calculated in accordance with the prospectus.
- Each Fund's TER is accrued on a daily basis throughout the financial period, which can impact the measurement of a tracking error in a positive or negative manner depending on the performance in the market and the TER rate applied. The extent and magnitude of this effect on performance measurement is subject to the timing of the market performance relative to the performance period of the Fund and can be greater than the headline TER in a positive market and lower than the TER in a negative market. The TER expresses the sum of all fees, operating costs and expenses, with the exception of direct trading costs and performance fees, charged to each Fund's assets as a percentage of the average Fund assets based on a twelve-month period ended 30 September 2021.
- Anticipated tracking error is based on the expected volatility of differences between the returns of a fund and the returns of its benchmark index.
- Realised tracking error is the annualised standard deviation of the difference in monthly returns between a fund and its benchmark index. Tracking error shows the consistency of the returns relative to the benchmark index over a defined period of time. The realised tracking error is annualised and calculated using data from the preceding 36 month observation period. Where a Fund has not been trading for 36 months, the annualised tracking error since inception has been presented.

Global economic overview

Global equities, as represented by the MSCI All Country World Index ("ACWI"), posted a return of 6.26% (in US Dollar terms) for the six months ended 30 September 2021. The reporting period began as mass COVID-19 vaccination programmes were in their early stages. Optimism about the prospect of a vaccine-led return to normality drove a strong economic rebound and significant gains for most equity classes. However, concerns surrounding the COVID-19 delta variant, higher inflation, and rising commodity and energy prices weighed on markets, particularly late in the 6-month reporting period.

Patterns of economic growth varied in different regions of the world; some economies slowed significantly as the reopening rebound faded, while others continued to expand. The US economy grew at a robust pace in the second quarter of 2021, due to elevated consumer spending, while Japanese growth was tepid. The UK economy grew notably in 2021's second quarter amid a surge in vaccinations. The Eurozone emerged from a brief recession and returned to modest growth as unemployment fell and restrictions eased.

Emerging market economic performance varied, as growth stalled in Brazil and India, but continued apace in South Korea. China posted positive economic growth in the second quarter of 2021, although factory output and consumer sales showed signs of slowing by period end.

Renewed economic growth was supported by action from global central banks, a key catalyst for the global equity rally. The US Federal Reserve ("the Fed") kept interest rates near zero and maintained major bond-buying programmes to stabilise US Treasury and government agency debt markets. The Fed debated a reduction of asset purchases but indicated that it remains committed to a near-zero interest rate policy, even if inflation does temporarily rise.

BLACKROCK UCITS FUNDS

INVESTMENT MANAGER'S REPORT (continued)

Global economic overview (continued)

The Bank of England ("BoE") also maintained its near-zero interest rate policy and a significant quantitative easing programme (monetary policy used as a way to introduce new money into the economy and lower the interest rates on savings and loans). However, inflation near the end of the period reached or topped the BoE's inflation target of 2%, and several monetary policy committee members indicated support for an end to the BoE's bond purchases. Inflation pressure late in the reporting period also affected the Eurozone, and the European Central Bank indicated that it would begin slowing its own bond-buying programme.

Most global equities increased in value throughout the reporting period amid government efforts to distribute COVID-19 vaccines, with over 45% of the global population receiving at least one dose by the end of the period. High savings and the resumption of some leisure activities led to increased consumer spending as pent-up demand began to be released, while strong demand amid stock shortages led to a widespread resurgence in manufacturing activity and global trade. The surge in spending and constraints in some supply chains led to higher inflation during the six-month period.

Global bond performance was relatively muted, as heightened inflation expectations put pressure on returns. Corporate bonds gained only slightly amid high rates of issuance, as companies took advantage of low borrowing costs. US Treasuries gained value, particularly longer-term bonds, despite concerns that the Fed could raise interest rates earlier than expected due to rising inflation. Returns for most Japanese, UK, and European government bonds were relatively flat.

Stocks in emerging markets posted a decline amid concerns that the fast-spreading COVID-19 delta variant would interrupt growth. An abrupt shift in China's regulatory regime, particularly towards companies in the technology, education, and gaming industries, also constrained emerging market equity returns. Emerging market bonds gained in value amid investors' search for yield, outpacing other international bonds for the six-month period.

In the commodities market, supply and demand shifts induced by the pandemic and subsequent recovery led to a notable rise in many commodity prices. Energy commodities, which had fallen sharply at the beginning of the pandemic, rebounded sharply due to higher demand amid a rise in industrial output, and Brent crude oil, natural gas, and coal prices all rose substantially. Strong demand for batteries to power electric vehicles drove lithium prices to all-time highs. Gold prices were nearly flat, as the rise in investors' inflation expectations was offset by the prospect of higher future interest rates.

On the foreign exchanges, the US dollar rose slightly against most global currencies, as a shift in tone from the Fed, which indicated the possibility of interest rate increases, led to a strengthening US dollar. The Japanese yen, the euro, and the pound sterling declined against the US dollar, while the Chinese yuan gained.

Fund performance review and activity

BlackRock Diversified Strategies Selection Fund

BlackRock Fixed Income Selection Fund

BlackRock Global Equity Selection Fund

BlackRock Multi Asset Balanced Selection Fund

BlackRock Multi Asset Conservative Selection Fund

In the first part of the period there was a renewed sense of optimism about global growth, albeit differentiated between countries and regions and with clear signs of a pick-up in inflation. Throughout summer concerns around the Delta variant of COVID-19 and signs of a peak in the economic rebound did not unsettle risky assets. However, September brought renewed focus on inflation and fears of monetary tightening which unsettled risky assets.

BlackRock Diversified Strategies Selection Fund

Over the six-month period to 30 September 2021, the Fund's return was 0.69%. No performance measure is calculated for this Fund.

The Fund is actively managed with the objective of keeping low beta and correlation to equity and fixed income markets.

In this context, the Fund recorded a positive performance, while maintaining a limited beta to equity markets and a good diversification between underlying strategies. Most underlying strategies contributed positively in the period, except for the global long-short equity strategy and the flexible fixed income fund with a focus on European markets, which marginally detracted from overall performance.

During the six-month period the following were the largest contributors to and detractors from the Fund's return:

| Largest contributors | | Largest detractors | |
|--|-----------------------|--|-----------------------|
| Strategy | Effect on Fund return | Strategy | Effect on Fund return |
| BlackRock Strategic Funds – European Absolute Return Fund | 1.15% | Derivatives (foreign exchange hedging) and cash equivalents | (0.60%) |
| BlackRock Funds I ICAV – BlackRock Tactical Opportunities Fund | 0.36% | BlackRock Strategic Funds – Global Long Short Equity Fund | (0.13%) |
| BlackRock Strategic Funds – BlackRock Global Event Driven Fund | 0.26% | BlackRock Strategic Funds – BlackRock Fixed Income Strategies Fund | (0.01%) |

The European absolute return strategy, with a highly stock-specific approach, was the main contributor, followed by the tactical asset allocation strategy (BlackRock Tactical Opportunities Fund).

BlackRock UK Credit Screened Fund

Over the six-month period to 30 September 2021, the Fund's active return was (0.01%), underperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

Rapid virus inoculation was a key driver behind the UK's restart in first half of the review period. The third quarter of 2021 saw rapidly rising new cases, however the hospitalisation rate declined amidst a highly vaccinated population. September surprised to the upside with positive data prints showing the UK rebounding following the easing of coronavirus restrictions, however the Monetary Policy Committee revised downward their quarter three 2021 growth forecast amid an increasingly challenging backdrop where businesses face shortages of both workers and materials.

The Fund marginally underperformed its performance measure. Over the review period the Fund was defensively positioned with underweights (screens) in the communications sector, particularly in wirelines sub-sector as well as in railroads sub-sector within the transportation sector. Within financials, the Fund was defensively positioned in selected life insurance companies. Within utilities, the Fund avoided selected issuers in the natural gas, electric and other utility sub-sectors.

^o Underweight position - holds less exposure than the performance measure

There are no overweight positions in the Fund. The Fund uses a credit screening approach that only seeks to remove issuers at the highest risk of credit deterioration. Once these issuers have been removed, the Fund will seek to match the beta of the underlying investment universe, and thus the Fund aims to avoid any active overweights.

BlackRock Defensive Yield ESG Screened Fund

Over the six-month period to 30 September 2021, the Fund's return was 0.59%, outperforming its performance measure, which returned (0.27%).

The first half of the review period saw a renewed sense of optimism about global growth, albeit differentiated between countries and regions, and raised expectations about a pickup in inflation. In July, concerns around the Delta variant of COVID-19 and signs of a peak in the economic rebound unsettled risk sentiment. August was a quieter month, however September was a more volatile month for financial markets owing to a combination of rising developed market government bond yields on monetary policy normalisation speculation.

The Fund remained defensively positioned, however marginally increased its allocation to high yield credit over the review period. As of 30 September 2021, the Fund held 65.7% of the overall portfolio market value in investment grade credit, compared to 67.2% in the beginning of the review period, and 34.3% is allocated to high yield, compared to 32.7% in the beginning of the review period.

During the six-month period the following were the largest contributors to and detractors from the Fund's return:

| Largest contributors | | Largest detractors | |
|-----------------------|-----------------------|--------------------|-----------------------|
| Sector | Effect on Fund return | Sector | Effect on Fund return |

| Banking | 0.09% | | |
| Transportation | 0.06% | | |

At a sector level, selected issuers within the consumer non-cyclical, consumer cyclical and capital goods sectors were the primary contributors. Selected issuers within the financial other sector marginally detracted over the review period.

BlackRock Developed Markets Sovereign Screened Bond Fund

Over the six-month period to 30 September 2021, the Fund's active return was (0.03%), underperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

The first half of the review period saw a renewed sense of optimism about global growth, albeit differentiated between countries and regions, and raised expectations about a pickup in inflation. In July, concerns around the Delta variant of COVID-19 and signs of a peak in the economic rebound unsettled risk sentiment. August was a quieter month, however September was a more volatile month for financial markets owing to a combination of rising developed market government bond yields on monetary policy normalisation speculation.

Over the review period, underweight allocations to China and overweight allocations to selected developed market countries, particularly to Korea, Austria and Germany, detracted from performance. However, overweighting Australia, as well as underweighting Belgium and France, offset some of the losses.

Overweight allocation to Korea, was driven by high fiscal space and external finance position scores, while positioning in Austria, Germany and Australia was driven by high willingness to pay and fiscal space scores. The Fund's positioning in China was driven by low willingness to pay scores, while underweight allocation to France was driven by low fiscal space score and additionally, low external finance positions score for Belgium.

BlackRock Diversifying Fixed Income Fund

Over the six-month period to 30 September 2021, the Fund's return was 2.20%, outperforming its performance measure, which returned (0.27%).

In the second quarter of 2021, risk assets continued to perform well on the back of the accelerating roll-out of COVID-19 vaccines and the continued rebound in economic activity. Within the government bond space, there was a bit of a divergence with US government bond yields falling and German government bond yields slightly rising. In this environment, the Fund performed well, with the Fund's exposure to the long end of the US yield curve as well as corporate spreads being among the main positive return drivers. In the third quarter of 2021, government bond yields remained broadly unchanged over the entire quarter as an initial fall reversed in September on the back of central bank tapering discussions and increased inflation pressure. In this environment, the Fund generated a slight positive return mainly due to carry from higher yielding asset classes while its rates exposure detracted. The impact of rising sovereign bond yields in September on the Fund's return was mitigated by cutting duration in the second and the third quarter.

During the six-month period the following were the largest contributors to and detractors from the Fund's return:

| Largest contributors | | Largest detractors | |
|--|-----------------------|--------------------------------------|-----------------------|
| Positions | Effect on Fund return | Positions | Effect on Fund return |

| BlackRock Global High Yield ESG and Credit Screened Fund | 0.56% | US 10 Year Note September 2021 | (0.03%) |

Overall, the last six-month have broadly been characterised by continued positive performance of risk assets. As a result, emerging market debt and high yield exposures were the largest positive return contributors while safe-haven assets such as developed market government bonds were the main detractors.

BlackRock Emerging Markets Alpha Tilts Fund

Over the six-month period to 30 September 2021, the Fund's active return was (1.98%), underperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

The Fund's investment strategy uses quantitative (mathematical or statistical) models to take a systematic (rule-based) approach to selection stocks.

Quality insights were the largest detractor, more precisely insights that focus on ESG. For example, it was a poor period for our proprietary ESG insight which looks at each company's tax policy. The signal takes a social view of tax collection and penalises companies that pay lower levels of tax versus peers and rewards those that pay higher relative levels. The signal had worked well as more "old economy" companies bounced back after a tough 2020. However, the return to a focus on growth and momentum names was at odds with this. Likewise, controversy and green innovation measures detracted.

During the six-month period the following were the largest contributors to and detractors from the Fund's return:

| Largest contributors | | Largest detractors | |
|---------------------------|-----------------------|---------------------------|-----------------------|
| Sector | Effect on Fund return | Sector | Effect on Fund return |

China produced the largest underperformance during the period. We were overweight on Chinese tech giants like Tencent which was not rewarded during the period, as China's economic growth prospects softened.

BlackRock Euro Cash Fund (continued)

During the six-month period, the European Central Bank ("ECB") left its key interest rates unchanged but it announced in September that it will start reducing the monthly pace of the Pandemic Emergency Purchase Programme ("PEPP"). According to President Lagarde, "It is not a tapering but a recalibration of the stimulus". The ECB also revised up its inflation forecast through 2021-2023 but they remain below the ECB target. The ECB also sees growth stronger in 2021.

After cheapening in February 2021, money market yields consolidated, with yields almost unchanged across the curve over the period. The overnight indexed swap ("OIS") curve is still pricing in no ECB rate hike in the next year and 0.14% hike over 2-year period.

During the period the Fund's Assets Under Management ("AUM") increased from approx. €89 million to approx. €100 million.

The talk of reflation has caused any pricing for a rate cut this period to all but vanish, whilst commercial paper levels continue to cheapen. The Fund's weighted average maturity ("WAM's") has been maintained around the 43-day range after being lengthened as high as 50 days before quarter end pressures took it lower.

The following table details the significant portfolio weightings at 30 September 2021 and 31 March 2021:

BlackRock Fixed Income Selection Fund

Over the six-month period to 30 September 2021, the Fund's return was 1.45%. No performance measure is calculated for this Fund.

The Fund is actively managed investing mainly in fixed income asset classes (government bonds, corporate bonds, emerging markets debt) in order to maintain a similar risk contribution between macro risk factors (rates and spreads); such directional exposures are combined with flexible fixed income strategies and multi asset strategies with the objective to improve the Fund's diversification and return/risk ratio.

In this context, the Fund recorded a positive performance. The Fund's return was driven by a combination of exposures to multi-asset strategies and risky fixed income, especially high yield bonds (both global and European) and corporate emerging markets debt, including China. Flexible fixed income strategies were also additive thanks to their dynamic management of duration.

During the six-month period the following were the largest contributors to and detractors from the Fund's return:

| Largest contributors | | Largest detractors | |
|--|-----------------------|---|-----------------------|
| Strategy | Effect on Fund return | Strategy | Effect on Fund return |
| BlackRock Global Funds – ESG Multi-Asset Fund | 0.34% | Derivatives (foreign exchange hedging) and cash equivalents | (0.42%) |
| BlackRock Funds I ICAV – BlackRock Tactical Opportunities Fund | 0.30% | BlackRock Strategic Funds – ESG Euro Bond Fund | (0.03%) |
| BlackRock Global Funds – Global Multi-Asset Income Fund | 0.15% | BlackRock Global Funds – ESG Fixed Income Global Opportunities Fund | (0.02%) |

The exposure to the multi asset strategies (ESG, tactical asset allocation and target income) was the top contributor thanks to its positive beta to equity markets, while the main (marginal) detractors were the fixed income exposures with a Euro focus, impacted by sharp move of rates in the period. Due to the appreciation of US dollar, the foreign exchange hedging applied at portfolio level to control its risk was the main detractor.

The following table details the significant portfolio weightings at 30 September 2021 and 31 March 2021:

| 30 September 2021 | | 31 March 2021 | |
|---|-----------|---|-----------|
| Strategy | Weighting | Strategy | Weighting |
| BlackRock Strategic Funds – Fixed Income Strategies Fund | 13.70% | BlackRock Strategic Funds – Fixed Income Strategies Fund | 13.60% |

| BlackRock Funds I ICAV – BlackRock Tactical Opportunities Fund | 9.10% | BlackRock Global Funds – Fixed Income Global Opportunities Fund | 12.20% |

In the period the Fund maintained its strategic allocation broadly stable, but tactically managed the strategy, in particular by reducing the exposure to high yield by the end of the period mostly in favor of emerging markets debt, where valuations appear still somewhat attractive.

The Fund also continued with the transition to ESG strategies and substituted the BlackRock Global Funds – Fixed Income Global Opportunities Fund with the ESG equivalent.

BlackRock Global Equity Selection Fund

Over the six-month period to 30 September 2021, the Fund's return was 9.38%, outperforming its performance benchmark.

The relative strong outperformance of the Fund was mainly driven by positive manager selection, with underlying active strategies which – after a though first quarter of the year – generated positive alpha. In particular, the European fundamental platform (continental and special situations), the global long-horizon fund (introduced in quarter two) and the financial sector exposure recorded relevant positive results in the active space.

The asset allocation, which was revised in the second quarter to remove excessive style biases and reach a balanced position between "growth" and "value" exposures, also helped stabilising performance over a period of intense even if short lived style rotation.

During the six-month period the following were the largest contributors to and detractors from the Fund's return:

| Largest contributors | | Largest detractors | |
|--|-----------------------|--|-----------------------|
| Strategy | Effect on Fund return | Strategy | Effect on Fund return |
| BlackRock Global Funds – Continental European Flexible Fund# | 2.32% | BlackRock Strategic Funds – Emerging Markets Equity Strategies Fund# | (0.10%) |
| iShares MSCI USA ESG Enhanced UCITS ETF# | 1.49% | BlackRock Global Funds – Emerging Markets Fund# | (0.08%) |
| BlackRock Global Funds – European Special Situations Fund# | 1.45% | BlackRock Global Funds – Asian Growth Leaders Fund# | (0.04%) |

Given the supportive market environment for equities over the period, most underlying strategies contributed positively in total return terms, with the only exception of emerging market equities – with a marginally negative impact. The European active strategies (continental flexible and special situations – with the latter strongly reduced in quarter two in favor of some more style-neutral exposures) were among best contributors thanks to the positive alpha recorded after some difficulties in the first quarter of 2021; the US ESG enhanced strategy was also among the best performers.

The following table details the significant active positions, where the Fund is overweight (holds more exposure than the performance benchmark) and underweight (holds less exposure than the performance benchmark), as at 30 September 2021 and 31 March 2021:

| Largest overweight positions | | | |
|------------------------------|-----------------|------------------|-----------------|
| 30 September 2021 | | 31 March 2021 | |
| Equity region | Active position | Equity region | Active position |
| Emerging markets & frontier | 1.10% | Cash securities | 1.80% |
| Cash securities | 0.90% | United States | 0.60% |
| Japan | 0.15% | Emerging Markets | 0.60% |

| Largest underweight positions | | | |
|-------------------------------|-----------------|---------------|-----------------|
| 30 September 2021 | | 31 March 2021 | |
| Equity region | Active position | Equity region | Active position |
| EU ex EMU | (1.20%) | EU ex EMU | (1.70%) |
| Canada | (0.98%) | Canada | (1.30%) |
| US | (0.84%) | Japan | (0.60%) |

Where the Fund is underweighting a region, the return from such region will have an opposite effect on the Fund's active return. This may result in a country being listed as a contributor/detactor but not listed on the Fund's Schedule of Investments.

BlackRock Multi Asset Balanced Selection Fund

Over the six-month period to 30 September 2021, the Fund's return was 4.65%. No performance measure is calculated for this Fund.

The Fund is actively managed combining exposures to fixed income (government bonds, corporate bonds, emerging markets debt) and equity markets, with a regional bias towards Europe, in order to achieve capital growth with a balanced level of risk. Multi asset strategies can be added with the objective to improve the Fund's diversification and return/risk ratio.

In this context, the Fund recorded a positive performance.

The Fund's positive return was mostly driven by the exposures to developed equities, followed by higher-risk fixed income (high yield and emerging markets corporate bonds, including China) and inflation-linked bonds.

Due to the appreciation of US dollar, the foreign exchange hedging applied on the fixed income component to control its risk was the main detractor.

The following table details the significant portfolio weightings at 30 September 2021 and 31 March 2021:

In the period the Fund maintained its strategic allocation broadly stable, but tactically managed the strategy, in particular by reducing the exposure to high yield by the end of the period mostly in favour of US and Euro bonds, global equities and emerging markets debt.

BlackRock Multi Asset Conservative Selection Fund

Over the six-month period to 30 September 2021, the Fund's return was 3.59%. No performance measure is calculated for this Fund.

The Fund is actively managed combining exposures to fixed income (government bonds, corporate bonds, emerging markets debt) and equity markets with a diversification component, in order to achieve capital growth with a conservative level of risk. The diversification component is built ensuring diversification between underlying managers and keeping low beta and correlation to financial markets with the objective to improve the Fund's return/risk ratio.

In this context, the Fund recorded a positive performance.

The Fund's positive return was mostly driven by the exposures to developed equities, followed by higher-risk fixed income (high yield and emerging markets corporate bonds, including China) and inflation-linked bonds. The exposure to absolute return strategies was also a relevant positive contributor.

During the six-month period the following were the largest contributors to and detractors from the Fund's return:

Due to the appreciation of US dollar, the foreign exchange hedging applied at portfolio level to control its risk was the main detractor.

INVESTMENT MANAGER'S REPORT (continued)

Fund performance review and activity (continued)

BlackRock Multi Asset Conservative Selection Fund (continued)

The following table details the significant portfolio weightings at 30 September 2021 and 31 March 2021:

| 30 September 2021 | | 31 March 2021 | |
|--|-----------|--|-----------|
| Strategy | Weighting | Strategy | Weighting |
| BlackRock Global Funds - US Dollar Bond Fund | 10.30% | BlackRock Global Funds - US Dollar Bond Fund | 9.80% |
| BlackRock Global Funds - ESG Euro Bond Fund | 8.30% | iShares MSCI USA ESG Enhanced UCITS ETF | 7.70% |
| iShares MSCI USA ESG Enhanced UCITS ETF | 7.40% | BlackRock Global Funds - ESG Euro Bond Fund | 7.60% |

In the period the Fund maintained its strategic allocation broadly stable, but tactically managed the strategy, in particular by reducing the exposure to high yield by the end of the period mostly in favor of US and Euro bonds, global equities and emerging markets debt.

BlackRock Systematic ESG Emerging Markets Equity Fund

Over the six-month period to 30 September 2021, the Fund's active return was 0.30%, outperforming its performance measure (active return is the difference between the Fund's return and the performance measure return).

The Fund's investment strategy uses quantitative (mathematical or statistical) models to take a systematic (rule-based) approach to selection stocks.

Model performance was somewhat mixed with Quality and Sentiment insights detracting, whereas Value insights, which help to identify attractively priced stocks, performing well.

Our proprietary impact signals were also additive. For example, a notable contributor over the period was our ESG flows insight. Investor flows into ESG remained resilient throughout the period. Likewise, environment measures added value, with a signal focused on greenhouse gas emissions being top contributors.

During the six-month period the following were the largest contributors to and detractors from the Fund's return:

| Largest contributors | | Largest detractors | |
|---------------------------|-----------------------|---------------------------|-----------------------|
| Sector | Effect on Fund return | Sector | Effect on Fund return |
| China [◊] | 1.10% | Taiwan [#] | (0.24%) |
| South Africa [#] | 0.13% | Saudi Arabia [◊] | (0.22%) |
| Greece [#] | 0.11% | Indonesia [◊] | (0.14%) |
| Indonesia [◊] | 0.10% | Kuwait [◊] | (0.11%) |
| Brazil [#] | 0.09% | Thailand [#] | (0.10%) |

[#] Overweight position - holds more exposure than the performance measure.

[◊] Underweight position - holds less exposure than the performance measure.

The portfolio benefited from an underweight position in Chinese equities. China's economic growth prospects softened over the period. Covid outbreaks in China increased as the delta variant spread. Moreover, escalating concerns around the financial viability of Evergrande, and the potential spill-over concerns of any restructuring of the firm impacted sentiment of cyclical industries involved in the construction supply chain.

The following table details the significant active positions, where the Fund is overweight (holds more exposure than the performance measure) and underweight (holds less exposure than the performance measure), as at 30 September 2021 and 31 March 2021:

| Largest overweight position | | | |
|-----------------------------|-----------|---------------|-----------|
| 30 September 2021 | | 31 March 2021 | |
| Country | Weighting | Country | Weighting |
| South Africa | 1.00% | Taiwan | 0.78% |
| Taiwan | 0.90% | China | 0.54% |
| Brazil | 0.61% | Malaysia | 0.37% |
| Chile | 0.47% | Greece | 0.36% |
| Greece | 0.33% | South Africa | 0.35% |

BLACKROCK UCITS FUNDS

NOTES TO THE FINANCIAL STATEMENTS

1. General information

The Entity is an open-ended unit trust domiciled and incorporated under the laws of Ireland as a unit trust. The Entity is authorised by the CBI and is governed by the provisions of the UCITS Regulations.

2. Significant accounting policies

2.1 Basis of preparation

The financial statements of the Entity are prepared in accordance with Financial Reporting Standard 104 Interim Financial Reporting ("FRS 104") applicable in the United Kingdom and Republic of Ireland. The principal accounting policies and estimation techniques are consistent with those applied to the previous annual financial statements.

On 22 October 2021, the Directors made the decision to close the BlackRock Mix Fonds 2, BlackRock Mix Fonds 3, BlackRock Mix Fonds 4 and BlackRock Mix Fonds 5 with effect from 29 October 2021. Therefore, the financial statements of these Funds have been prepared on a non-going concern basis.

All amounts have been rounded to the nearest thousand, unless otherwise indicated.

3. Financial risks

Each Fund's investment activities expose it to the various types of risk which are associated with the financial instruments and markets in which it invests. The risks are substantially consistent with those disclosed in the previous annual financial statements with the exception of those outlined below.

3.1 Market risk arising from price risk

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, recessions, or other events could have a significant impact on each Fund and the market price of its investments.

The infectious respiratory illness caused by a novel coronavirus known as COVID-19 has given rise to an extended global pandemic and has resulted in travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, cancellations, supply chain disruptions, and lower consumer demand, as well as general concern and uncertainty. While developments are being made with a view to ameliorating the effects of the pandemic, including the adoption in many countries of widespread vaccination programmes, the impact of COVID-19 continues to adversely affect the economies of many nations across the entire global economy, individual issuers and capital markets. It is not yet possible to predict with any accuracy how long this impact will continue to be felt. In addition, the impact of infectious illnesses in emerging market countries may be greater in impact, and more prolonged in duration, due to generally less established healthcare systems. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic risks in certain countries or globally. The duration of the COVID-19 outbreak and its effects cannot be determined with certainty.

4. Fair value hierarchy

Each Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

Specific valuation techniques used to value financial instruments classified as level 2 and/or level 3 include:

- (i) for debt and equity instruments, the use of quoted market prices or dealer quotes for similar instruments;
- (ii) for foreign equities, using independent fair value adjustment factors to reflect the difference between the last market close and the valuation point of each Fund;
- (iii) for defaulted debt instruments, the use of recent transactions and defaulted equity instruments for which market data is unavailable;
- (iv) for interest rate swaps, the present value of the estimated future cash flows based on observable yield curves;
- (v) for total return swaps, the value of the estimated cash flows based on the market value of the underlying reference asset or index at the balance sheet date;
- (vi) for foreign currency forwards, present value of future cash flows based on the forward exchange rates at the balance sheet date;
- (vii) for foreign currency options, option pricing models; and
- (viii) for other financial instruments, discounted cash flow analysis.

BLACKROCK UCITS FUNDS

NOTES TO THE FINANCIAL STATEMENTS (continued)

4. Fair value hierarchy (continued)

All of the resulting fair value estimates are included in level 2 except for unlisted equity securities, a contingent consideration receivable and certain derivative contracts, where the fair values have been determined based on present values and the discount rates used were adjusted for counterparty or own credit risk.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' inputs requires significant judgement. The Directors consider observable inputs to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables provide an analysis of each Fund's financial assets and financial liabilities measured at fair value as at 30 September 2021 and 31 March 2021:

Irish tax

Under current law and practice, the Entity qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a 'chargeable event'. A chargeable event includes any distribution payments to unitholders or any encashment, redemption, cancellation or transfer of units and the holding of units at the end of each eight year period beginning with the acquisition of such units.

No Irish tax will arise on the Entity in respect of chargeable events in respect of:

- a) A unitholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Entity; or the Entity has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- b) Certain exempted Irish tax resident unitholders who have provided the Entity with the necessary signed annual declarations.

Overseas tax

Dividends, interest and capital gains (if any) received on investments made by the Entity may be subject to withholding taxes imposed by the country from which the investment income/gains are received, and such taxes may not be recoverable by the Entity or its unitholders.

For financial reporting purposes, and in accordance with FRS 104, the Entity must recognise a provision for deferred tax payable arising from material timing differences between the taxation of unrealised gains in the financial statements and actual realisable taxable profits.

¹The underlying funds employ an "all in one" fee structure. Each fund pays all of its fees, operating costs and expenses as a single flat fee (TER).

²The Manager of these investments will be responsible for discharging from its fee the annual expenses of the Funds. Where actual fees and costs incurred exceed the amount paid to the Manager, the excess will be discharged by the Manager from its own assets.

³The Manager of these investments is entitled to charge a fee of 0.03% per annum of the NAV of each fund or relevant share class. Where actual fees and costs incurred exceed the amount paid to the Manager, the excess will be discharged by the Manager from its own assets.

⁴The Manager of these investments is entitled to charge a fee of 0.30% per annum. The management fee payable to the Manager includes the fee of the Manager, the Administrator and the Trustee.

⁵The Fund is not subject to management fee on this investment. However, the underlying funds pay an administration fee to the management company, BlackRock Luxembourg S.A. The administration fee paid shall not exceed 0.15%, 0.25% and 0.30% per annum for BlackRock Global Index Funds, BlackRock Global Funds and BlackRock Strategic Funds respectively.

⁶The Fund is subject to a management fee on this investment. In addition, the underlying funds pay an administration fee to the management company, BlackRock Luxembourg S.A. The administration fee paid shall not exceed 0.25% for BlackRock Global Funds.

Securities lending

The total income earned from securities lending transactions is split between the relevant Fund and the Securities Lending Agent. The Funds which undertake securities lending transactions receive at least 62.5%, while the Securities Lending Agent receives up to 37.5% of such income, with all operational costs borne out of the Securities Lending Agent's share.

The table below details the securities lending income earned for the financial period ended:

| Fund name | Currency | 30 September 2021 | 30 September 2020 |

No commitments secured or unsecured or guarantees have been entered into with related parties during the financial period (31 March 2021: Nil).

BLACKROCK UCITS FUNDS

NOTES TO THE FINANCIAL STATEMENTS (continued)

10. Credit facility

The Funds entered into a credit facility with JPMorgan whereby JPMorgan, together with other syndicated lenders, made a portion of a USD 200,000,000 credit facility available to all the Funds with the exception of BlackRock Diversifying Fixed Income Fund and BlackRock Systematic ESG Emerging Markets Equity Fund. The portion of the USD 200,000,000 credit facility will be allocated to the Funds based on the credit facility agreement dated 24 April 2020. On 23 April 2021, an amended credit facility agreement was issued to facilitate an increase in the credit facility available by JPMorgan and the other syndicated lenders to USD 300,000,000. This credit facility will be utilised by the Funds for temporary funding purposes, including, without limitation, the funding of investor redemptions. Any interest and commitment fees in relation to drawdowns from such credit facility are paid out of the assets of the Fund. Any new Fund will not automatically be subject to a credit line and will therefore be required to be added by way of a joinder process. This process includes, inter alia, any necessary due diligence being carried out by the lenders in order to approve the addition of the new Fund. During this period, such Funds will not be subject to, or able to draw down on, any credit line. Furthermore, there is no guarantee that the addition of any new Fund will be approved by the lenders, or that credit will be available to a Fund since the credit line is subject to availability (on an equitable allocation basis) between the Fund and other BlackRock Funds participating in the credit agreement. As such, certain Funds may not be subject to the credit line and will not incur any fees with respect to same.

A loan commitment fee is charged on a daily basis in relation to this credit facility which is included in the income statement under caption "Credit administration fee". The loan commitment fee is charged at 0.10% on the outstanding balance.

The credit facility was not used during the period.

11. Commitments and contingent liabilities

There were no significant commitments or contingent liabilities as at 30 September 2021 and 31 March 2021.

12. Subsequent events

On 1 October 2021, an updated prospectus was issued for the Entity to facilitate the following changes:

- Inclusion of Enda McMahon as an executive Director of the Manager.
- Inclusion of BlackRock Cangrande Global Index Equity Fund.
- Inclusion of Flexible Accumulating unit class for BlackRock Multi Asset Conservative Selection Fund.

On 11 October 2021, the EUR - Flexible Accumulating Unit Class was fully redeemed for the BlackRock Developed Markets Sovereign Screened Bond Fund.

On 22 October 2021, the Directors made the decision to close the BlackRock Mix Fonds 2, BlackRock Mix Fonds 3, BlackRock Mix Fonds 4 and BlackRock Mix Fonds 5 with effect from 29 October 2021. Therefore, the financial statements of these Funds have been prepared on a non-going concern basis.

On 9 November 2021, BlackRock Cangrande Global Index Equity Fund commenced trading with the launch of Institutional Distributing Unit Class.

Other than the above, there have been no events subsequent to the financial period end, which, in the opinion of the Directors, may have had an impact on the financial statements for the financial period ended 30 September 2021.

13. Approval date

The financial statements were approved by the Directors on 18 November 2021.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial period is available, upon request, at no cost from the Administrator.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial period is available, upon request, at no cost from the Administrator.

Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. The performance figures do not consider charges and fees that may be levied at the time of subscription or redemption of units. Levels and bases of taxation may change from time to time.

TRANSACTIONS WITH CONNECTED PERSONS

In accordance with the requirements of the CBI, the Manager shall ensure that any transactions carried out between each Fund and the Manager or Trustee to a Fund, the delegates or sub-delegates of the Manager or Trustee (excluding any non-group company sub-custodians appointed by a Trustee) and any associated or group company of the Manager, Trustee, delegate or sub-delegate ("Connected Persons") must be conducted at arm's length and in the best interests of the unitholders.

The Directors are satisfied that there are arrangements in place, as evidenced by written procedures, to ensure that the obligations set out above are applied to all transactions with Connected Persons and that transactions with Connected Persons entered into during the financial period complied with this obligation.

SOFT COMMISSIONS

There were no soft commission arrangements entered into by the Investment Manager on behalf of each Fund during the financial period ended 30 September 2021.

BLACKROCK UCITS FUNDS

EFFICIENT PORTFOLIO MANAGEMENT AND SECURITIES FINANCING TRANSACTIONS

Efficient portfolio management techniques

The Directors may, on behalf of each Fund and subject to the conditions and within the limits laid down by the CBI and the prospectus, employ techniques and instruments relating to transferable securities, including investments in OTC FDIs provided that such techniques and instruments are used for efficient portfolio management purposes or to provide protection against exchange risk or for direct investment purposes, where applicable.

The underlying exposure obtained through FDI and at the identity of the counterparties to these FDIs at the financial period end are disclosed on the relevant Fund's schedules of investments.

Securities lending and total return swaps (including CFDs)

All securities lending transactions entered into by each Fund are subject to a written legal agreement between each Fund and the securities lending agent, BlackRock Advisors (UK) Limited, a related party to the Entity, and separately between the securities lending agent and the approved borrowing counterparty. Collateral received in exchange for securities lent is transferred under a title transfer arrangement. Collateral received is delivered to and held in an account in the name of the Trustee on behalf of each Fund. Collateral received is segregated from the assets belonging to each Fund's Trustee or the securities lending agent.

All OTC FDIs and total return swaps (including CFDs) are entered into by each Fund under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Fund and a counterparty that governs OTC FDIs (including total return swaps and CFDs) entered into by the parties. The parties' exposures under the ISDA Master Agreement are netted and collateralised together, therefore any collateral disclosures provided are in respect of all OTC FDIs entered into by a Fund under the ISDA Master Agreement, not just total return swaps and CFDs.

All collateral received/posted by each Fund under the ISDA Master Agreement is transferred bilaterally under a title transfer arrangement.

The following table details the value of securities on loan as a proportion of each Fund's total lendable assets and NAV and the value of total return swaps (including CFDs) as a proportion of the Fund's NAV, as at 30 September 2021 and the income/returns earned for the period ended 30 September 2021. Total lendable assets represent the aggregate value of assets forming part of a Fund's securities lending programme. This excludes any assets held by the Fund that are not considered lendable due to any market, regulatory, investment or other restriction. The value of total return swaps (including CFDs) is based on the underlying exposure value on a gross absolute basis.

Income earned during the period by the Funds from securities lending transactions is disclosed in the Fund's notes to the financial statements.

The total income earned from securities lending transactions is split between the relevant Fund and the Securities Lending Agent. Each Fund's receives at least 62.5% while securities lending agent receives up to 37.5% of such income with all operational costs borne out of the securities lending agent's share.

All returns and costs from total return swaps will accrue to each Fund's and are not subject to any returns or costs sharing arrangements with the Fund's Manager or any other third parties.

The following tables details the value of securities on loan (individually identified in the relevant Fund's schedule of investments), analysed by counterparty as at 30 September 2021.

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency; Standard & Poor's, Moody's or Fitch.

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no five equities combined represent more than 60% of the total index.

The maturity tenor analysis for fixed income securities received or posted as collateral is based on the respective contractual maturity date, while for equity securities and ETFs received or posted as collateral are presented as open transactions as they are not subject to a contractual maturity date.

All cash received or posted as collateral has an open maturity tenor as it is not subject to a contractual maturity date.

Reuse of collateral received
