(based on a hypothetical \$10,000 investment)

Fund name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
iShares U.S. Equity Factor ETF	\$9	0.08%

How did the Fund perform last year?

- For the reporting period ended July 31, 2026, the Fund returned 17.38%.
- For the same period, the S&P Total Market Index returned 19.67% and the STOXX U.S. Equity Factor Index (Spliced) returned 17.53%.

What contributed to performance?

Information technology stocks were the largest contributor to the Fund's return during the reporting period. In the technology, hardware, storage, and peripherals subsector, companies benefited from resilient consumer demand and continued growth in services. Additionally, technology hardware and data storage companies advanced on improving pricing trends and increased demand for enterprise and hyperscale storage solutions driven by artificial intelligence ("AI")-related data growth. Semiconductors and semiconductor equipment stocks were supported by robust demand for AI, cloud computing, and data center infrastructure. Makers of high-performance AI chips were standout performers, as their products have become essential infrastructure for cloud providers and businesses adopting AI at scale. In the healthcare sector, pharmaceuticals stocks gained amid strong demand for GLP-1 therapies targeting obesity and diabetes, alongside continued innovation in oncology and immunology.

What detracted from performance?

During the reporting period, software and services stocks detracted from the Fund's return amid investor concerns that AI tools could disrupt the revenue models of traditional software businesses.
