FUND OVERVIEW

iShares S&P 500 Premium Income ETF seeks to track the performance of the Cboe S&P 500 Enhanced 1% OTM BuyWrite NTR Index JPY(the "Underlying Index"). The Underlying Index is designed to measure the performance of holding the iShares Core S&P 500 ETF ("IVV" or the "Underlying Fund") while writing (selling) call options on the S&P 500 Index (the "Underlying Fund's underlying index" or "SPX") to generate income. The Underlying Index consists of four tranches of options, each rolling on a weekly staggered schedule. However, if the premium on a 1% out-of-the-money call option falls below a specified threshold, the Fund will instead write an at-the-money SPX call option.

WHY 452A ?

1. Aims to provide stable income through dividends and option premiums by applying a covered call strategy on the S&P 500 Index.
2. Covered call strategy demonstrates its effectiveness in market environments where U.S. equities are gradually rising, moving sideways, or experiencing mild declines.
3. Listed on the Tokyo Stock Exchange and tradable during market hours similar to a listed stock.
