

BGF Global Dynamic Equity Fund Class A2 USD

AUGUST 2017 FACTSHEET

Performance, Portfolio Breakdowns and Net Asset information as at: 31-Aug-2017. All other data as at: 14-Sep-2017.

Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets. The Fund invests globally at least 70% of its total assets in the shares of companies. The Fund will generally aim to invest in securities of companies that are undervalued, where in the Portfolio Manager's opinion, their market price does not reflect their underlying worth.

GROWTH OF 10,000

Share Class and Benchmark performance displayed in USD. Source: BlackRock. Performance is shown on a Net Asset Value (NAV) basis, with gross income reinvested. Past performance is not a guide to future performance.

CUMULATIVE & ANNUALIZED PERFORMANCE

	Cumulative (%)				Annualized (% p.a.)			
	1m	3m	6m	YTD	1 Year	3 Years	5 Years	Since Inception
Share Class	-0.36%	2.57%	6.86%	11.73%	16.63%	4.59%	9.26%	5.81%
Benchmark	0.29%	3.31%	8.34%	14.38%	17.30%	6.86%	11.84%	6.76%
Quartile Rank	3	3	4	4	2	N/A	N/A	N/A

% CALENDAR YEAR RETURNS

	2016	2015	2014	2013	2012
Share Class	5.41	-2.22	3.87	25.27	11.42
Benchmark	9.13	-0.82	6.44	26.30	16.72

Share Class performance is calculated on a Net Asset Value (NAV) basis, net of fees in the dealing currency specified and do not include sales charge or taxes. Returns assume reinvestment of any distributions. Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product.

Key Risks: All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. The fund invests a large portion of assets which are denominated in other currencies; hence changes in the relevant exchange rate will affect the value of the investment. Compared to more established economies, the value of investments in developing Emerging Markets may be subject to greater volatility due to differences in generally accepted accounting principles or from economic or political instability. The fund may invest in smaller company shares which can be more unpredictable and less liquid than those of larger company shares.

¹The Reference Benchmark is an unmanaged weighted index comprised as follows: 60% of the S&P 500 Index and 40% FTSE World (ex US) Index.

²% of net assets represents the Fund's exposure based on the economic value of securities and is adjusted for futures, options, swaps, and convertible bonds. Allocations subject to change. Risk statistics are based on monthly fund returns for the 3-year period. Benchmark risk measures are calculated in relation to the FTSE World Index. Standard Deviation measures the volatility of the fund's returns. Higher deviation represents higher volatility. Sharpe Ratio uses a fund's standard deviation and its excess return (difference between the fund's return and the risk-free return of 90-day Treasury Bills) to determine reward per unit of risk.

This material has been produced by BlackRock® for educational purposes only and does not constitute investment advice, or an offer or solicitation to sell or a solicitation of an offer to buy any shares of any fund (nor shall any such shares be offered or sold to any person) in any jurisdiction in which an offer, solicitation, purchase or sale would be unlawful under the securities laws of that jurisdiction. Before investing, you should consider the investment objectives, charges and expenses and the variety of risks (in addition to those described in the risk sections) of any applicable issuance documents. Certain share classes of certain Fund(s) mentioned in this document are registered for public distribution only in Spain, Portugal and Chile alongside each Prospectus for the Fund. In Spain, Fund(s) are registered with the number 140 in the Comisión Nacional del Mercado de Valores de España (CNMV). In Portugal, Fund(s) are registered with the Comissão do Mercado de Valores Mobiliários (CMVM). In Chile, Fund(s) are registered with the Superintendencia de Valores y Seguros (SVS) and for Fund(s) that are not registered they are subject to General Rule No. 336 and will not be supervised by the SVS. In Colombia, the sale of a Fund is addressed to less than one hundred specifically identified investors, and therefore may only be promoted or marketed in Colombia or to Colombian residents in compliance with Decree 2555 of 2010 and other applicable rules. No securities regulator in any country within Latin America or Iberia has confirmed the accuracy of any information contained herein. BlackRock Global Funds (BGF) is an open-ended investment company established in Luxembourg which is available for sale in certain jurisdictions only. BGF is not available for sale in the U.S. or to U.S. persons. Product information concerning BGF should not be published in the U.S. It is recognized under Section 264 of the Financial Services and Markets Act 2000. BlackRock Investment Management (UK) Limited is the UK distributor of BGF. Most of the protections provided by the UK regulatory system, and the compensation under the Financial Services Compensation Scheme, will not be available. A limited range of BGF sub-funds have a reporting fund status A sterling share class that seeks to comply with UK Reporting Fund Status requirements. Subscriptions in BGF are valid only if made on the basis of the current Prospectus, the most recent financial reports and the Key Investor Information Document, which are available on our website. Prospectuses, Key Investor Information Documents and application forms may not be available to investors in certain jurisdictions where the Fund in question has not been authorized. Issued by BlackRock Investment Management (UK) Limited (authorized and regulated by the Financial Conduct Authority). Registered office: 12 Throgmorton Avenue, London, EC2N 2DL. Registered in England No. 2020394. Tel: +44 (0) 20 7743 3000. For your protection, telephone calls are usually recorded. BlackRock is a trading name of BlackRock Investment Management (UK) Limited. The Morningstar Analyst Rating is not a credit or risk rating. It is a subjective evaluation performed by the manager research analysts of Morningstar. Morningstar evaluates funds based on five key pillars, which are process, performance, people, parent, and price. Analysts use this five pillar evaluation to determine how they believe funds are likely to perform over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weighting of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflect an Analyst's conviction in a fund's prospects for outperformance. Analyst Ratings are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to <http://corporate.morningstar.com/us/documents/MethodologyDocuments/AnalystRatingforFundsMethodology.pdf>. The Morningstar Analyst Rating should not be used as the sole basis in evaluating a mutual fund. Morningstar Analyst Ratings are based on Morningstar's current expectations about future events; therefore, in no way does Morningstar represent ratings as a guarantee nor should they be viewed by an investor as such. Morningstar Analyst Ratings involve unknown risks and uncertainties which may cause Morningstar's expectations not to occur or to differ significantly from what we expected Morningstar rates mutual funds from one to five stars based on how well they've performed (after adjusting for risk and accounting for all sales charges) in comparison to similar funds. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star. Funds are rated for up to three time periods--three-, five-, and 10 years--and these ratings are combined to produce an overall rating. Funds with less than three years of history are not rated. Ratings are objective, based entirely on a mathematical evaluation of past performance. They're a useful tool for identifying funds worthy of further research, but shouldn't be considered buy or sell recommendations. Morningstar Rating metrics. Morningstar, Inc.® 2017. GLOSSARY

Market Capitalization: is the total value of the shares issued by a company which trades on the stock exchange.

Ongoing Charge: is a figure representing all annual charges and other payments taken from the fund.

Price to Book Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.

Price to Earnings (TTM) Ratio: represents the ratio of the market price per share of a company to the company's earnings per share for a twelve-month period (usually the last 12 months or trailing twelve months (TTM)).

Quartile Rank: categorizes a fund into four equal bands based on their performance over a specified period within the relevant Morningstar's sector. The top or first quartile contains the top 25% of funds, through to the bottom or 4th quartile which contains the bottom 25% of funds.

SRRI: is a value based on the volatility of the fund, which gives an indication of the overall risk and reward profile of the Fund.

Performance Fee: is charged on any returns that, subject to a High Water Mark, the Fund achieves above its performance fee benchmark. Please refer to the Prospectus for further information.

Price to Earnings (FY1): A valuation ratio of a company's current share price compared to its per-share earnings in the current forecast year, calculated as current share price divided by current earnings per share.

Sharpe Ratio: A risk-adjusted measure. It is calculated by using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance.

Average Market Cap: The average market capitalization of a fund's equity portfolio gives you a measure of the size of the companies in which the fund invests. Market capitalization is calculated by multiplying the number of a company's shares outstanding by its price per share.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.
