Class I2 Hedged U.S. Dollar BlackRock Strategic Funds

Performance, Portfolio Breakdowns and Net Assets information as at: 30-Apr-2026. All other data as at 11-May-2026.

This document is marketing material. For Investors in Luxembourg, Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to achieve positive absolute returns through a combination of capital growth and income on your investment regardless of market conditions.
- The Fund will seek to achieve this investment objective by taking long, synthetic long and synthetic short investment exposures in equities and equity-related securities (including derivatives) of, giving exposure to, companies located in developed countries. Such companies include small, mid and large capitalization companies that are considered 'emerging', i.e. at an early stage of their life cycle and/or expected to experience significant growth.
- The Fund will invest at least 70% of its assets in equity securities and other equity-related securities, including financial derivative instruments (FDIs) (i.e. investments whose prices are based on one or more underlying assets). The Fund may also, when determined appropriate, invest in fixed income (FI) securities, money market instruments (MMIs) (i.e. debt securities with short-term maturities), deposits and cash.

RISK INDICATOR

Lower Risk

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Shares in smaller companies typically trade in less volume and experience greater price variations than larger companies.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Due to its investment strategy an 'Absolute Return' fund may not move in line with market trends or fully benefit from a positive market environment.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

KEY FACTS

Comparator[†]: 3 month SONIA Compounded in Arrears + ISDA spread (GBP)

Asset Class : Equity

Fund Launch Date : 17-Oct-2018

Share Class Launch Date : 17-Oct-2018
