**This document is marketing material.** For Investors in Luxembourg. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

### FUND OVERVIEW

The Fund aims to provide a total return, comprising income and capital, by investing in a portfolio predominantly of Euro-denominated AAA-rated collateralized loan obligations (CLOs). **The Fund is not suitable for retail investors unless the investor in question qualifies as an "advanced investor" as prescribed by the European MiFID Template (EMT), being an investor who has good knowledge of relevant financial products and transactions and/or has financial industry experience or whose investment is accompanied by professional investment advice or included in a discretionary portfolio service.**

### KEY BENEFITS

1. The Fund is actively managed.
2. The Fund will invest a minimum of 80% in AAA-rated CLOs and may invest up to 20% in tranches of CLOs rated at least A-.
3. The investment manager has discretion to select the Fund's investments without reference to a benchmark. Investors may use the J.P. Morgan Euro CLOIE AAA Index to compare the performance of the Fund.

### RISK INDICATOR

#### Lower Risk

Potentially Lower Rewards

#### Higher Risk

Potentially Higher Rewards

**CAPITAL AT RISK:** The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

### KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Collateralised Loan Obligations are subject to the same risks described for fixed income securities. These instruments may be subject to 'Liquidity Risk', have high levels of borrowing and may not fully reflect the value of underlying assets.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

#### GLOSSARY

**SFDR Classification: Article 8:** Products that promote environmental or social characteristics and promote good governance practices.

**Article 9:** Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

**Yield to Maturity:** Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTM's based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

**Effective Duration:** Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.
