## FUND OVERVIEW

The Fund seeks to track the performance of an index composed of a sub-set of MSCI USA stocks that have been experiencing an upward price trend.

## KEY BENEFITS

1. Exposure to a sub-set of MSCI USA stocks that have been experiencing an upward price trend
2. Direct investment in US companies that have been experiencing an upward price trend
3. US exposure with a focus on stocks that have been experiencing an upward price trend

## RISK INDICATOR

### Lower Risk

Potentially Lower Rewards

### Higher Risk

Potentially Higher Rewards

**CAPITAL AT RISK:** The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

## KEY RISKS:

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Index Methodology Risk: Although the benchmark index was created to select securities within the Parent Index for their recent price increases on the assumption that such increases will continue, there is no guarantee this objective will be achieved.
- Factor Focus Risk: Indices with a factor focus are less diversified than their parent index because they have predominant exposure to a single factor rather than the multiple factor exposure of most indices. Therefore they will be more exposed to factor related market movements. Investors should consider this Fund as part of a broader investment strategy.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
