FUND OVERVIEW

The fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the STOXX Global Nuclear Energy and Uranium Mining Index, the Fund's benchmark index ("Index").

KEY BENEFITS

1. Exposure to companies that: (i) meet the inclusion criteria defined by their revenue and/or patent exposure to the Nuclear Energy and Uranium Mining Theme and/or their nuclear power generation capacity; and (ii) meet criteria around daily trading volume and market capitalization and are domiciled in an eligible country as determined by the index provider.
2. The Index excludes companies classified as Non-Compliant with Sustainalytics' Global Standards Screening ("GSS"), companies which Sustainalytics identifies to have a Controversy Rating of Category 5 (Severe), and companies determined to have involvement in activities related to certain controversial weapons.
3. The Index is adjusted equally weighted and applies a higher weighting to issuers assessed to have a greater involvement in Nuclear Energy and Uranium Mining Theme.

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
