KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The price of Shares of the Fund and any income from them may fall as well as rise.

These risk factors may cause you to lose some or all of your investment.

Refer to "Risk Factors" of the Singapore Prospectus for further information on risks of the product.

Market and Credit Risks

- **The Fund may be subject to Credit Risk of Issuers**
 - o The Fund may be exposed to the credit/default risk of bonds that it invests in. In the event of bankruptcy or default of an issuer, the Fund may experience losses and incur costs.
 - o The actual or perceived downgrading of a rated debt security or its issuer could decrease the value and liquidity of the security, and may have an adverse impact on the Fund. However, the Fund may continue to hold it to avoid a distressed sale.
- **The Fund may be subject to Currency Risks**
 - o Foreign currency exchange rate movements are likely to influence the returns to investors in Singapore, hence investors may be exposed to exchange rate risks.
 - o For Hedged Share Classes, while the Fund attempts to hedge currency risks, there can be no guarantee that it will be successful in doing so.
- **The Fund may be subject to Emerging and Frontier Markets Risks**
 - o The Fund may invest in one or more emerging and frontier markets and may be subject to a higher than average volatility than investing in more developed markets due to greater political, tax, economic, social, foreign exchange, custodial, liquidity, regulatory or other risks.

Liquidity Risks

- Redemptions may be suspended in certain circumstances detailed in the Prospectus.

Product-Specific Risks

- **The Fund may be subject to Derivatives Risks**
 - o The use of derivatives may expose the Fund to a higher degree of risk. Derivative contracts can be highly volatile and a relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative positions can hence increase the Fund's volatility. The Fund may sustain loss as a result of the failure of a derivatives counterparty to comply with the terms of the derivatives contract.
- **The Fund may be subject to Non-Investment Grade Bonds Risks**
 - o The Fund may invest in non-investment grade bonds. This may subject the Fund to higher credit/default risks, volatility and liquidity risks than investment grade bonds.
- **The Fund may be subject to the risks of Securities Lending**
 - o The Fund may engage in securities lending. As such, the Fund will have a credit risk exposure to the counterparties to any securities lending contract. The Fund's investments can be lent to counterparties over a period of time. A default by the counterparty combined with a fall in the value of the collateral below that of the value of the securities lent may result in a reduction in the value of the Fund.
