

Alternative Investment Fund Managers Directive Disclosures

BlackRock Smaller Companies Trust plc

(the "Company")

This document contains the information required to be made available to investors in the Company before they invest, pursuant to Directive 2011/61/EU of the European Parliament and of the Council on Alternative Investment Fund Managers and UK implementing measures (the Alternative Investment Fund Managers Regulations No.1773/2013, and consequential amendments to the FCA Handbook) (the "AIFMD").

The Company's articles of association provide that such information can be made available to investors on the Company's website: <http://www.blackrock.co.uk/brsc>

The table below sets out information required to be disclosed pursuant to the AIFMD.

This document contains solely that information that the Manager is required to make available to investors pursuant to the AIFMD and should not be relied upon as the basis for any investment decision.

In this document references to the Manager are to BlackRock Fund Managers Limited; references to the Investment Manager are to BlackRock Investment Management (UK) Limited; references to the Board are to the board of the Company; references to Shares are to shares in the capital of the Company and references to Shareholders are to shareholders in the Company.

DISCLOSURE REQUIREMENT	DISCLOSURE OR LOCATION OF RELEVANT DISCLOSURE

Master fund domicile, if relevant	N/A
If the Company is a fund of funds, domicile of investee funds	N/A
The types of asset in which the Company may invest	Please refer to the investment policy in the Company's latest annual report: http://www.blackrock.com/uk/individual/literature/annual-report/blackrock-smaller-companies-trust-plc-annual-report.pdf . No material change may be made to the investment policy without the passing of an ordinary resolution by the Company's shareholders.
Investment techniques that may be employed and all associated risks	Please refer to the investment guidelines in the Company's latest annual report http://www.blackrock.com/uk/individual/literature/annual-report/blackrock-smaller-companies-trust-plc-annual-report.pdf .

Please refer to the risk disclosures in the Company's latest annual report <http://www.blackrock.com/uk/individual/literature/annual-report/blackrock-smaller-companies-trust-plc-annual-report.pdf>.

Additional risk disclosures:

1. Gearing

The Company is permitted to borrow to purchase additional investments. This is called "gearing", and it allows the Company to take advantage of a long-term view on a sector or to take advantage of a favourable situation or a particularly attractive stock without having to sell existing investments. Gearing works by magnifying the Company's performance. If the Company "gears up" and then markets rise and the returns on the investments outstrip the costs of borrowing, the overall returns to investors will be even greater. But if markets fall and the performance of the assets in the portfolio is poor, then losses suffered by the investor will also be magnified.

To ensure that the Company has appropriate levels of gearing in place, Gearing levels and sources of funding are reviewed regularly by the Board. It is the Board's intention that gearing will not exceed 15% of the net assets of the Company at the time of the drawdown of the relevant borrowings. Under normal operating conditions it is envisaged that gearing will be within a range of 0%-15% of net assets.

2. Liquidity of portfolio investments

The Company may invest from time to time in securities of limited liquidity. The Company's investments may therefore be subject to liquidity constraints, which means that shares may trade less frequently and in small volumes, for instance smaller companies. As a result, changes in the value of investments may be more unpredictable. In certain cases, it may not be possible to sell the security at the last market price quoted or at a value considered to be fairest. Liquidity risk is mitigated by the fact that the majority of the Company's assets are investments in quoted equities and other quoted securities that are readily realisable. Although the Company may also trade on the Alternative Investment Markets ("**AIM**"), it is the Board's current intention is that the value of AIM listed stocks as a percentage of the Company's portfolio should not exceed 50 per cent. The Board of Directors gives guidance to the Investment Manager as to the maximum amount of the Company's resources that should be invested in any one Company, and prior approval from the Board is required before the Investment Manager may invest in unquoted securities.

3. Derivatives

The Investment Manager is not permitted to deal in derivatives without the prior approval of the Board and whilst the Company's investment policy permits investment in derivatives, the Board do not currently envisage that the Company's portfolio will be exposed to significant levels of holdings in derivatives.

To the extent the Company did in the future enter into derivative transactions, the use of derivatives gives rise to a number of specific potential risks. Derivative instruments can be highly volatile and can expose investors to a higher risk of loss. Derivatives inherently contain much greater leverage than a non-margined purchase of the underlying security or instrument. This is due to the fact that, generally, only a very small portion (and in some cases none) of the value of the underlying security or instrument is required to be paid in order to make such

	<p>leveraged investments. As a result of any leverage employed by the Company, small changes in the value of the underlying assets may cause a relatively large change in the Net asset value of the Company. Many such financial instruments are subject to variation or other interim margin requirements, which may force premature liquidation of investment positions.</p> <p>Furthermore, the use of derivative instruments involves certain special risks, including: (i) dependence on movements in the price of underlying securities and movements in interest rates; (ii) when used for hedging purposes, an imperfect correlation between the returns of the derivative instrument used for hedging and the returns on the investments or markets being hedged; (iii) credit exposure to the counterparty with whom it trades, and (iv) the fact that the skills needed to select those instruments may be different from those needed to select the Company's other investments. Counterparty risks may differ materially from those entailed in exchange-traded transactions that generally are backed by clearing organisation guarantees, daily marking-to-market and settlement, and segregation and minimum capital requirements applicable to intermediaries. Transactions entered into directly between counterparties generally do not benefit from such protections and expose the parties to the risk of counterparty default. Trading in derivatives markets may be unregulated or subject to less regulation than in other markets. Derivatives markets are, in general, relatively new markets and there are uncertainties as to how these markets will perform during periods of unusual price volatility or instability, market illiquidity or credit distress. The Company could suffer substantial losses from its derivative holdings in these or other situations.</p>
Investment restrictions	<p>Please refer to the investment policy in the Company's latest annual report http://www.blackrock.com/uk/individual/literature/annual-report/blackrock-smaller-companies-trust-plc-annual-report.pdf.</p> <p>The management of the Company's assets is also subject to the following investment restrictions:</p> <ul style="list-style-type: none"> • The Company will primarily invest in companies that are quoted on a recognised UK stock exchange, although the Manager may invest in unquoted securities with the prior approval of the Board; • The Company may invest in securities which are listed overseas but have a secondary UK quotation. • The Company may trade on the Alternative Investment Market of the London Stock Exchange ("AIM") and the Board's current intention is that the value of stocks that trade on AIM as a percentage of the Company's portfolio should not exceed 40%. • The Company may not hold more than 6% of the share capital of any company in which it has an investment. • The Company will not invest more than 15% of its total assets in other UK listed investment companies. • The Manager will not deal in derivatives without the prior approval of the Board.

	<ul style="list-style-type: none"> • Save with the prior approval of the Board of the Company, securities will only be purchased if <ul style="list-style-type: none"> (i) the aggregate market capitalisation of the ordinary share class is less than £2 billion at the time of the original purchase; or (ii) the security is listed on the Benchmark (the Numis Smaller Companies plus AIM (excluding Investment Companies) Index, on a sterling basis without income reinvested). • For the purpose of any restriction on the percentage of the Company which may be invested in an asset class, investments in an In-House Fund will be allocated to a single asset class determined by reference to the principal asset class exposure obtained through that In-House Fund. Some In-House Funds may have a large percentage exposure to other asset classes. • No investments in In-House Funds or collective investment schemes (which include regulated or unregulated collective investment schemes, but, for the avoidance of doubt, exclude In-House Funds which are cash funds) and/or investment trusts operated by other investment management firms ("Managed Funds") will be made without the prior approval of the Board. <p>"In-House Funds" mean collective investment schemes or investment trusts (as the case may be) of which the Manager or an associate is the manager.</p> <ul style="list-style-type: none"> • The Manager will not effect contingent liability investments without the prior approval of the Board. • The Manager may commit the Company to underwrite or sub-underwrite any issue or offer for sale of investments. No such commitment will be entered into if, at that time, the aggregate of such investments would exceed 10 per cent of the net asset value of the Company or any such individual investment would exceed 5 per cent of the net asset value of the Company.
<p>Circumstances in which the Company may use leverage</p> <p>The types and sources of leverage permitted</p> <p>Restrictions on the use of leverage</p> <p>The maximum level of leverage which the Company may employ</p>	<p>Please refer to the Company's latest annual report http://www.blackrock.com/uk/individual/literature/annual-report/blackrock-smaller-companies-trust-plc-annual-report.pdf which discloses the gearing that the Company uses, and the sources thereof.</p> <p>Gearing may be used for short term liquidity purposes and for enhancing investment returns, always, however, in accordance with, and subject to the limits set out in, the Company's stated investment policy (as set out in the Company's latest annual report). The Company's expected level of gearing is currently anticipated to be around 10% of net assets, and it is the Board's intention that it will not exceed 15% of net assets at the time of drawdown.</p> <p>The definition of 'leverage' as understood pursuant to the AIFMD is wider than 'gearing', as measured in accordance with AIC guidelines.</p> <p>Pursuant to its regulatory obligations, the Manager is required to express the level which the Company's 'leverage' will not exceed.</p> <p>For the purposes of this disclosure, leverage is any method by which a fund's exposure is increased. A fund's exposure may be increased by using derivatives, by reinvesting cash borrowings, through positions within repurchase or reverse repurchase agreements, through</p>

securities lending or securities borrowing arrangements, or by any other means (such increase referred to herein as the “Incremental Exposure”). The AIFMD prescribes two methodologies for calculating overall exposure of a fund: the “gross methodology” and the “commitment methodology”. These methodologies are briefly summarised below.

The commitment methodology takes account of the hedging and netting arrangements employed by a fund at any given time (purchased and sold derivative positions will be netted where both relate to the same underlying asset). This calculation of exposure includes all Incremental Exposure as well as a fund’s own physical holdings; and cash. By contrast, the gross methodology does not take account of the netting or hedging arrangements employed by a company. This calculation of exposure includes all Incremental Exposure as well as the Company’s own physical holdings, Cash is excluded.

The AIFMD requires that each leverage ratio be expressed as the ratio between a fund’s total exposure (including any Incremental Exposure) and its net asset value. Using the methodologies prescribed under the AIFMD and implementing legislation, the Company has set a maximum level of leverage, taking into account atypical and volatile market conditions. Leverage will not exceed the ratio of 2:1 using the commitment methodology and 4:1 using the gross methodology.

The use of leverage, including borrowings, may increase the volatility of the Company’s net asset value per Ordinary Share and also amplify any loss in the value of the Company’s assets.

While the use of borrowing should enhance the total return on the Shares where the return on the Company’s underlying assets is rising and exceeds the cost of borrowing, it will have the opposite effect where the return on the Company’s underlying assets is falling or rising at a lower rate than the cost of borrowing, reducing the total return on the Shares. As a result, the use of borrowings by the Company may increase the volatility of the net asset value per Share.

Any reduction in the value of the Company’s investments may lead to a correspondingly greater percentage reduction in its net asset value (which is likely to adversely affect the price of a Share). Any reduction in the number of Shares in issue (for example, as a result of buy-backs or tender offers) will, in the absence of a corresponding reduction in borrowings, result in an increase in the Company’s level of gearing.

To the extent that a fall in the value of the Company’s investments causes gearing to rise to a level that is not consistent with the Company’s gearing policy or borrowing limits, the Company may have to sell investments in order to reduce borrowings.

The Company will pay interest on its borrowings. As such, the Company is exposed to interest rate risk due to fluctuations in the prevailing market rates. The Company may employ hedging techniques designed to reduce the risk of adverse movements in interest rates. However, such strategies may also result in losses and overall poorer performance than if the Company had not entered into such hedging transactions.

The risks associated with the derivatives used by the Company which may contribute to the leverage of the Company are set out earlier.

Collateral and re-use arrangements	<p>The Company may be required to deliver collateral from time to time to its trading counterparties and/or brokers under the terms of the relevant trading agreements (including, but not limited to, ISDA master agreement, related credit support documentation and/or securities lending, repurchase, master forward, foreign exchange and/or futures clearing agreements), by posting initial margin and/or variation margin and on a daily mark-to-market basis. The Company may deliver such collateral by way of title transfer or by way of security interest (and, in certain circumstances, may grant a right of reuse in respect of any such collateral that is the subject of a security interest arrangement) to a trading counterparty or broker. The treatment of such collateral varies according to the type of transaction and where it is traded.</p>
<p>The main implications of the contractual relationship entered into for the purpose of investment including information on jurisdiction, applicable law and enforcement.</p>	<p>The Company is a company limited by shares, incorporated in Scotland. While investors acquire an interest in the Company on subscribing for or purchasing Shares, the Company is the sole legal and/or beneficial owner of its investments. Consequently, Shareholders have no direct legal or beneficial interest in those investments. The liability of Shareholders for the debts and other obligations of the Company is limited to the amount unpaid, if any, on the Shares held by them.</p> <p>Shareholders' rights in respect of their investment in the Company are governed by the Company's articles of association and the Companies Act 2006. Under English law, the following types of claim may in certain circumstances be brought against a company by its shareholders: contractual claims under its articles of association; claims in misrepresentation in respect of statements made in its prospectus and other marketing documents; unfair prejudice claims; and derivative actions. In the event that a Shareholder considers that it may have a claim against the Company in connection with such investment in the Company, such Shareholder should consult its own legal advisers.</p> <p><i>Jurisdiction and applicable law</i></p> <p>As noted above, Shareholders' rights are governed principally by the articles of association and the Companies Act. By subscribing for Shares, investors agree to be bound by the articles of association which is governed by, and construed in accordance with, the laws of England and Wales.</p> <p><i>Recognition and enforcement of foreign judgments</i></p> <p>Regulation (EC) 593/2008 ("Rome I") must be applied in all member states of the European Union (other than Denmark). Accordingly, where a matter comes before the courts of a relevant member state, the choice of a governing law in any given agreement is subject to the provisions of Rome I. Under Rome I, the member state's courts may apply any rule of that member state's own law which is mandatory irrespective of the governing law and may refuse to apply a rule of governing law if it is manifestly incompatible with the public policy of that member state. Further, where all other elements relevant to the situation at the time of the choice are located in a country other than the country whose law has been chosen, the choice of the parties shall not prejudice the application of provisions of the law of that other country which cannot be derogated from by agreement.</p> <p>Shareholders should note that there are a number of legal instruments providing for the recognition and enforcement of foreign judgments in England. Depending on the nature and jurisdiction of the original judgment, Council Regulation (EC) No 44/2001 on jurisdiction and the recognition and enforcement of judgments in civil and commercial matters, Regulation (EC) No 805/2004 of the European Parliament and</p>

	<p>of the Council of 21 April 2004 creating a European Enforcement Order for uncontested claims, the Convention on jurisdiction and the recognition and enforcement of judgments in civil and commercial matters done at Lugano on 30 October 2007, the Administration of Justice Act 1920 and the Foreign Judgments (Reciprocal Enforcement) Act 1933 may apply. There are no legal instruments providing for the recognition and enforcement of judgments obtained in jurisdictions outside those covered by the instruments listed above, although such judgments might be enforceable at common law.</p>
Manager's compliance with GENPRU 2.1.67G	<p>Professional liability risks resulting from those activities which the Manager carries out pursuant to the AIFMD, are, to the extent required by law, covered by the Manager through 'own funds' (within the meaning of GENPRU)</p>
Valuation procedure and methods	<p>All investments are designated upon initial recognition as held at fair value through profit or loss.</p> <p>The fair value of the financial instruments is based on their quoted bid price.</p> <p>Unquoted investments are valued at fair value using International Private Equity and Venture Capital Valuation Guidelines.</p>
Liquidity risk management	<p>The Company is a closed ended listed investment company and, as such, shareholders in the Company have no right to redeem their shares. Any redemption offered to shareholders shall be at the discretion of the directors' of the Company.</p> <p>Liquidity risk is therefore the risk that a position held by the Company cannot be realised at a reasonable value sufficiently quickly to meet the obligations (primarily, debt) of the Company as they fall due.</p> <p>In managing the Company's assets therefore, the Manager seeks to ensure that the Company holds at all times a sufficient portfolio of assets listed on recognised investment exchanges to enable it to discharge its payment obligations. The Company also maintains an uncommitted overdraft facility which it utilises from time to time for short term liquidity purposes.</p> <p>In addition the Company has in place a three year multi-currency revolving loan facility of £35 million which it can use for liquidity purposes.</p>
Fair treatment of shareholders / preferential treatment	<p>As a company listed on the UK Listing Authority's Official List, the Company is required to treat all shareholders of a given class equally.</p>
Latest net asset value of the Company	<p>The latest published net asset value of the Company can be found in the <i>Announcements</i> section of the Company's website http://www.blackrock.co.uk/individual/prices-and-performance/investment-trusts/blackrock-smaller-companies-trust</p>
Historical performance of the Company	<p>Please refer to the Company's latest annual report http://www.blackrock.com/uk/individual/literature/annual-report/blackrock-smaller-companies-trust-plc-annual-report.pdf which contains historical performance information on the Company.</p>

SERVICE PROVIDERS AND COMPANY EXPENSES DISCLOSURE	
<p>Manager (AIFM) and Administrator</p>	<p>BlackRock Fund Managers Limited whose registered office is 12 Throgmorton Avenue London EC2N 2DL</p> <p>The Manager, as the alternative investment fund manager of the Company, is responsible for the discretionary portfolio management of the Company and exercising the risk management function in respect of the Company.</p> <p>In addition the Manager performs certain administration, fund accounting and valuation services for the Company.</p> <p>The Manager receives an annual fee of:</p> <ul style="list-style-type: none"> • 0.60% in respect of the first £750 million of the Company's total assets less current liabilities; and • 0.50% of the remainder. <p>The fee is calculated quarterly, as one quarter of the amount equal to the fee rate of 0.60% multiplied by the first £750 million of total assets (excluding current year income) less the current liabilities of the Company at the relevant quarter end, plus one quarter of any amount of total assets (excluding current year income) less current liabilities in excess of this threshold multiplied by 0.50%.</p> <p>There are no performance fee arrangements in place.</p> <p>The Manager has delegated day to day discretionary portfolio management, risk management, administrative and fund accounting activities to BlackRock Investment Management (UK) Limited who has, in turn, delegated certain fund accounting services to Bank of New York Mellon (International) Limited.</p> <p>Conflicts may arise between the interests of the Manager and its permitted delegates in certain circumstances, for example, where there is likelihood that: (i) the delegate and an investor in the Company are members of the same group or have any other contractual relationship, if the investor controls the delegate or has the ability to influence its actions; (ii) the delegate makes a financial gain, or avoids a financial loss, at the expense of the Company or the investors in the Company; (iii) the delegate has an interest in the outcome of a service or an activity provided to the Manager or the Company; (iv) the delegate has a financial or other incentive to favour the interest of another client or fund over the interests of the Company or the investors in the Company; (v) the delegate receives or will receive from a person other than the Manager an inducement in relation to the collective portfolio management activities provided to the Manager and the Company in the form of monies, goods or services other than the standard commission or fee for that service.</p> <p>Although conflicts of interest can also arise where the delegate and the Manager are members of the same group or have any other contractual relationship and the delegate controls the Manager or has the ability to influence its actions, it is not currently considered that there are material existing conflicts of interest between the Manager and the Investment Manager, its parent company.</p>

	<p>The BlackRock Group has policies and procedures in place to monitor the conflicts of interest that may arise in the context of the Manager's delegation of certain of its functions. To the extent any actual conflicts of interest are determined to have arisen, the BlackRock Group will manage such conflicts to minimise any impact on the investment performance of the Company, and will also seek to prevent them from reoccurring.</p>
Company secretary	<p>BlackRock Investment Management (UK) Limited whose registered office is 12 Throgmorton Avenue London EC2N 2DL.</p> <p>The company secretary's duties include the arrangement of, co-ordination and preparation of board and committee meetings and papers; ensuring that packs provided for board meetings shall include required documents; and attendance and minuting of board meetings.</p> <p>The fee payable for company secretarial services is covered by the management fee described above.</p>
Depository	<p>The Company's appointed depository is The Bank of New York Mellon (International) Limited, whose registered office is 1 Canada Square, London E14 5AL.</p> <p>The depository's duties include, amongst others, the following:</p> <ul style="list-style-type: none"> (a) ensuring that the Company's cash flows are properly monitored, and that all payments made by or on behalf of investors upon the subscription for shares are received; (b) safekeeping the assets of the Company, which includes (i) holding in custody all financial instruments that can be registered in a financial instrument account opened in the depository's books and all financial instruments that can be physically delivered to the depository; and (ii) for other assets, verifying the ownership of such assets and maintaining records accordingly; (c) ensuring that the sale, issue, re-purchase, redemption and cancellation of shares in the Company are carried out in accordance with applicable law and the Company's articles of association; (d) ensuring that the value of the shares in the Company is calculated in accordance with applicable law and the articles of association; (e) carrying out the instructions of the Manager, unless they conflict with applicable law or the articles of association; (f) ensuring that in transactions involving the Company's assets any consideration is remitted to the Company within the usual time limits; and (g) ensuring that the Company's income is applied in accordance with applicable law and the articles of association. <p>The remuneration of the depository will be paid out of the property of the Company and will consist of a periodic charge (together with value added tax thereon), calculated on the first business day of each month and based upon the net asset value of the portfolio (being the total value of all assets held less all liabilities but including current income) using bid market prices at close of business on the last business day of the preceding month. The calculation of each periodic charge shall be based on the number of calendar days in the relevant month.</p> <p>The current rate of the depository's periodic charge in respect of the Fund shall consist of an ad valorem fee per annum of 0.0095% (0.95 basis points) of the net assets of the Company.</p>

	<p>In addition to this fee, the Depositary is entitled to recharge expenses incurred in the performance of its duties which include custody fees. More information is given in the “other ongoing expenses” section below.</p>
Registrar	<p>Computershare Investor Services PLC whose registered office is The Pavilions, Bridgwater Road, Bristol, BS99 6ZZ.</p> <p>The principal duty of the registrar is the maintenance of the register of shareholders (including registering transfers). It also provides services in relation to corporate actions (including tender offers and the exercise of subscription shares), dividend administration and shareholder documentation.</p> <p>Computershare receives a fixed fee of £20,260 per annum plus disbursements and VAT. The fixed fee will apply for the three years commencing on 1 July 2017. Fees in respect of corporate actions are negotiated on an arising basis.</p>
Auditor	<p>PricewaterhouseCoopers LLP (PWC) are the Company’s auditors. PWC’s registered office is Atria One, 144 Morrison Street, Edinburgh EH3 8EX.</p> <p>The auditor’s responsibility is to audit and express an opinion on the financial statements of each Company in accordance with applicable law and auditing standards.</p> <p>The Auditors’ remuneration is determined by the Directors of the Company and for the year ended 29 February 2020 amounted to £22,275 in respect of the annual audit which was carried out by PWC.</p> <p>PWC were also paid £2,650, in the year to 29 February 2020, for work in relation to a review of the Company’s debenture compliance.</p>
Rights against third party service providers	<p>The Company is reliant on the performance of third party service providers, including the Manager, the registrar, and the depositary.</p> <p>Without prejudice to any potential right of action in tort that a Shareholder may have to bring a claim against a service provider, each Shareholder’s contractual relationship in respect of its investment in Shares is with the Company only.</p> <p>Accordingly, no Shareholder will have any contractual claim against any service provider with respect to such service provider’s default.</p> <p>In the event that a Shareholder considers that it may have a claim against a third-party service provider in connection with such Shareholder’s investment in the Company, such Shareholder should consult its own legal advisers.</p> <p>The above is without prejudice to any right a shareholder may have to bring a claim against an FCA authorised service provider under section 138D of the Financial Services and Markets Act 2000 (which provides that breach of an FCA rule by such service provider is actionable by a private person who suffers loss as a result), or any tortious or contractual cause of action. Shareholders who believe they may have a claim under section 138D of the Financial Services and Markets Act 2000, or in tort or contract, against any service provider in connection with their investment in the Company, should consult their legal adviser.</p>

	<p>Shareholders who are "Eligible Complainants" for the purposes of the FCA "Dispute Resolutions Complaints" rules (natural persons, micro-enterprises and certain charities or trustees of a trust) are able to refer any complaints against the Manager to the Financial Ombudsman Service ("FOS") (further details of which are available at www.financial-ombudsman.org.uk). Additionally, Shareholders may be eligible for compensation under the Financial Services Compensation Scheme ("FSCS") if they have claims against an FCA authorised service provider (including the Investment Manager) which is in default. There are limits on the amount of compensation available. Further information about the FSCS is at www.fscs.org.uk. To determine eligibility in relation to either the FOS or the FSCS, Shareholders should consult the respective websites above and speak to their legal advisers.</p>
Directors' fees	<p>The aggregate fees payable to the directors of the Company are £165,562 for the year ended 29 February 2020, excluding out of pocket expenses. The cap on the aggregate remuneration that can be paid to directors in any one year per the Company's articles of association is £200,000.</p> <p>The aggregate emoluments of the directors of the Company for the last financial year can be found in the Company's annual report http://www.blackrock.com/uk/individual/literature/annual-report/blackrock-smaller-companies-trust-plc-annual-report.pdf.</p>
Other ongoing expenses	<p>Other ongoing operational expenses that will be borne by the Company include travel, accommodation, printing, D&O insurance, website maintenance, and legal fees.</p> <p>Out of pocket expenses of the Manager, Depositary, Administrator, the registrar, the CREST agent and the directors relating to the Company will also be borne by the Company.</p> <p>These expenses will be deducted from the assets of the Company and, although they may vary, are estimated to be in the region of £490,000 per annum, excluding any non-recurring or extraordinary expenses. This includes custody fees incurred by the Depositary in the course of the performance of its duties which were approximately £7,000 for the year to 29 February 2020.</p> <p>Given that many of the above fees, charges and expenses are either irregular or calculated using formulae that contain variable components, the maximum amount of fees, charges and expenses that Shareholders will bear in relation to their investment cannot be disclosed in advance.</p> <p>The fees and expenses for the Company in respect of the last financial year (including the ongoing expenses of the Company) can be found in the Company's annual report http://www.blackrock.com/uk/individual/literature/annual-report/blackrock-smaller-companies-trust-plc-annual-report.pdf.</p>

ONGOING AND PERIODIC DISCLOSURES

Information to be made available, as a minimum, as part of	The Manager must periodically disclose to Shareholders certain information in relation to the Company. This includes providing disclosure on the Company's risk profile, which, as prescribed in the
--	--

the Company's annual report	<p>AIFMD, shall outline: (i) the measures used to assess the sensitivity of the Company's portfolio to the most relevant risks to which the Company is or could be exposed; and (ii) if risk limits set by the Manager have been or are likely to be exceeded and, where these risk limits have been exceeded, a description of the circumstances and the remedial measures taken. The Company will, in the annual report, disclose:</p> <ul style="list-style-type: none"> • the current risk profile of the Company and the risk management systems employed by the Manager to manage those risks; and • the total amount of leverage employed by the Company. <p>Shareholders will also be notified whenever the Manager makes material changes to liquidity management systems and procedures it employs in respect of the Company.</p>
Information to be made available without undue delay	<p>Information will also be provided regarding changes to (i) the maximum level of leverage which the Company, or the Manager on the Company's behalf, may employ; or (ii) the rights for re-use of collateral under the Company's leveraging arrangements; or (iii) any guarantee granted under the Company's leveraging arrangements.</p> <p>This information will be made available by way of an update to this document, or in such other manner as the Manager and directors of the Company determine as appropriate.</p>

TERMS OF ISSUE

Procedure and conditions for the issue of shares	<p>Shares will be issued in registered form.</p> <p>Shares will be eligible for settlement through CREST. Shares allocated will be transferred to places through the CREST system unless otherwise stated. Member firms will be requested to give their CREST settlement details to the Company. The Company will arrange for Euroclear to be instructed to credit the appropriate Euroclear accounts of the subscribers concerned or their nominees with their respective entitlements to Shares. The names of subscribers or their nominees that invest through their Euroclear accounts will be entered directly on to the share register of the Company.</p>
--	--

SECURITIES FINANCING TRANSACTION REGULATION (SFTR) DISCLOSURES

General	<p>Securities Financing Transactions (“SFTs”) such as securities lending, repurchase transactions, total return swaps (TRS) and contracts for difference (CFDs) may be used by the Company (subject to its investment objective and policy) either to help meet the investment objective of a Company and/or as part of efficient portfolio management.</p> <p>The types of assets that may be subject to SFTs include equity securities, fixed income securities, collective investment schemes, money market instruments and cash. Use of such assets is subject to the Company's investment objective and policy.</p>
---------	---

Securities Lending	<p>The maximum proportion of the net asset value of the Company that can be subject to securities lending is 0%.</p> <p>The demand to borrow securities is a significant driver for the amount that is lent from a fund. Borrowing demand fluctuates over time and depends to a large extent on market factors that cannot be forecasted precisely. Based on historical data, lending volumes for funds typically range between 0% and 0% of the Company's net asset value, though past levels are no guarantee of future levels.</p>
Total Return Swaps and Contracts for Difference	<p>The maximum proportion of the net asset value of the Company that can be subject to Total Return Swaps and Contracts for Difference is 50%.</p> <p>The expected proportion of the Company's net asset value that will be subject to Total Return Swaps and Contracts for Difference is up to 0%. The expected proportion is not a limit and the actual percentage may vary over time depending on factors including, but not limited to, market conditions.</p>
Repurchase and Reverse Repurchase Agreements	<p>The maximum proportion of net asset value of the Company that can be subject to repurchase transactions is 0%.</p> <p>The expected proportion of the Company's net asset value that will be subject to repurchase transactions is up to 0%. The expected proportion is not a limit and the actual percentage may vary over time depending on factors including, but not limited to, market conditions.</p>
Counterparty Selection & Review	<p>BlackRock select from an extensive list of full service and execution-only brokers and counterparties. All prospective and existing counterparties require the approval of the Counterparty and Concentration Risk Group ("CCRG"), which is part of BlackRock's independent Risk & Quantitative Analysis department ("RQA").</p> <p>In order for a new counterparty to be approved, a requesting portfolio manager or trader is required to submit a request to the CCRG. The CCRG will review relevant information to assess the credit-worthiness of the proposed counterparty in combination with the type and settlement and delivery mechanism of the proposed security transactions. A list of approved trading counterparties is maintained by the CCRG and reviewed on an on-going basis.</p> <p>Counterparty reviews take into account the fundamental creditworthiness (ownership structure, financial strength, regulatory oversight) and commercial reputation of specific legal entities in conjunction with the nature and structure of proposed trading activities. Counterparties are monitored on an ongoing basis through the receipt of audited and interim financial statements, via alert portfolios with market data service providers, and where applicable, as part of BlackRock's internal research process. Formal renewal assessments are performed on a cyclical basis.</p> <p>BlackRock select brokers based upon their ability to provide good execution quality (i.e. trading), whether on an agency or a principal basis; their execution capabilities in a particular market segment; and their operational quality and efficiency; and we expect them to adhere to regulatory reporting obligations.</p> <p>Once a counterparty is approved by the CCRG, broker selection for an individual trade is then made by the relevant dealer at the point of trade,</p>

	<p>based upon the relative importance of the relevant execution factors. For some trades, it is appropriate to enter into a competitive tender amongst a shortlist of brokers. BlackRock perform pre-trade analysis to forecast transaction cost and to guide the formation of trading strategies including selection of techniques, division between points of liquidity, timing and selection of broker. In addition, BlackRock monitors trade results on a continuous basis.</p> <p>Broker selection will be based on a number of factors including, but not limited to the following:</p> <ul style="list-style-type: none"> • Ability to execute and execution quality; • Ability to provide Liquidity/capital; • Price and quote speed; • Operational quality and efficiency; and • Adherence to regulatory reporting obligations.
Acceptable collateral and valuation	<p>Collateral obtained in respect of derivatives (including forward exchange) and efficient portfolio management techniques, such as repo transactions or securities lending arrangements ("Collateral"), must comply with the following criteria:</p> <p>(i)liquidity: Collateral (other than cash) should be sufficiently liquid in order that it can be sold at a price that is close to its pre-sale valuation</p> <p>(ii)valuation: Collateral should be capable of being valued on a daily basis and assets that exhibit high price volatility should not be accepted as Collateral unless suitably conservative haircuts are in place;</p> <p>(iii)issuer: Collateral (other than cash) may be issued by a range of issuers;</p> <p>(iv)correlation: Collateral should be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty;</p> <p>(v)diversification: there is no restriction on the level of diversification required with respect to any country, market or issuer; and</p> <p>(vi)maturity: Collateral received may have a maturity date such as bonds or may not have a maturity date such as cash and equity.</p> <p>The value of Collateral obtained is marked to market on a daily basis. Subject to the framework of agreements in place with the relevant counterparty, which may or may not include minimum transfer amounts, it is the general intention of the BlackRock Group that any Collateral received shall have a value, adjusted in light of the haircut policy, which equals or exceeds the relevant counterparty exposure where appropriate. In addition, the BlackRock Group has implemented a haircut policy in respect of each class of assets received as Collateral. A haircut is a discount applied to the value of a Collateral asset to account for the fact that its valuation, or liquidity profile, may deteriorate over time. The haircut policy takes account of the characteristics of the relevant asset class, including the credit standing of the issuer of the Collateral and the price volatility of the Collateral.</p> <p>Collateral must be held by the Depositary or its agent (where there is title transfer). This is not applicable in the event that there is no title transfer in which case the Collateral can be held by a third party custodian which is subject to prudential supervision; and which is unrelated to the provider of the Collateral.</p>
Returns generated by SFTs	<p>Any revenues from repurchase and reverse repurchase agreements and total return swaps not received directly by the Company will be returned to the Company, net of direct and indirect operational costs and fees (which do not include hidden revenue).</p>

EU SUSTAINABLE FINANCE DISCLOSURES REGULATION (SFDR)	
ESG Integration	<p>Environmental, Social and Governance (ESG) investing is often conflated or used interchangeably with the term “sustainable investing.” BlackRock has identified sustainable investing as being the overall framework and ESG as a data toolkit for identifying and informing our solutions. BlackRock has defined ESG Integration as the practice of incorporating material ESG information and consideration of sustainability risks into investment decisions in order to enhance risk-adjusted returns. BlackRock recognises the relevance of material ESG information across all asset classes and styles of portfolio management. The Investment Manager may incorporate sustainability considerations in its investment processes across all investment platforms. ESG information and sustainability risks are included as a consideration in investment research, portfolio construction, portfolio review, and investment stewardship processes.</p> <p>The Investment Manager considers ESG insights and data, including sustainability risks, within the total set of information in its research process and makes a determination as to the materiality of such information in its investment process. ESG insights are not the sole consideration when making investment decisions and the extent to which ESG insights are considered during investment decision making will also be determined by the ESG characteristics or objectives of the Company. The Investment Manager’s evaluation of ESG data may be subjective and could change over time in light of emerging sustainability risks or changing market conditions. This approach is consistent with the Investment Manager’s regulatory duty to manage the Company in accordance with their investment objectives and policies and in the best interests of the Company’s investors. The Investment Manager’s Risk and Quantitative Analysis group will review portfolios to ensure that sustainability risks are considered regularly alongside traditional financial risks, that investment decisions are taken in light of relevant sustainability risks and that decisions exposing portfolios to sustainability risks are deliberate, and the risks diversified and scaled according to the investment objectives of the Company.</p> <p>BlackRock’s approach to ESG integration is to broaden the total amount of information the Investment Manager considers with the aim of improving investment analysis and understanding the likely impact of sustainability risks on the Company’s investments. The Investment Manager assesses a variety of economic and financial indicators, which may include ESG data and insights, to make investment decisions appropriate for the Company objectives. This can include relevant third-party insights or data, internal research or engagement commentary and input from BlackRock Investment Stewardship.</p> <p>Sustainability risks are identified at various steps of the investment process, where relevant, from research, allocation, selection, portfolio construction decisions, or management engagement, and are considered relative to the Company’s risk and return objectives. Assessment of these risks is done relative to their materiality (i.e. likeliness of impacting returns of the investment) and in tandem with other risk assessments (e.g. liquidity, valuation, etc.).</p>
Investment Stewardship	<p>BlackRock undertakes investment stewardship engagements and proxy voting with the goal of protecting and enhancing the long-term value of clients’ investments for relevant asset classes. In our experience, sustainable financial performance and value creation are enhanced by sound governance practices, including risk management oversight, board accountability, and compliance with regulations. We focus on board composition, effectiveness and accountability as a top priority. In our experience, high standards of</p>

	<p>corporate governance are the foundations of board leadership and oversight. We engage to better understand how boards assess their effectiveness and performance, as well as their position on director responsibilities and commitments, turnover and succession planning, crisis management and diversity.</p> <p>BlackRock takes a long-term perspective in its investment stewardship work informed by two key characteristics of our business: the majority of our investors are saving for long-term goals, so we presume they are long-term shareholders; and BlackRock offers strategies with varying investment horizons, which means BlackRock has long-term relationships with its investee companies.</p> <p>For further detail regarding BlackRock’s approach to sustainable investing and investment stewardship please refer to the website at www.blackrock.com/corporate/sustainability and https://www.blackrock.com/corporate/about-us/investment-stewardship#our-responsibility.</p>
<p>Sustainability Risks - General</p>	<p>Sustainability risk is an inclusive term to designate investment risk (probability or uncertainty of occurrence of material losses relative to the expected return of an investment) that relates to environmental, social or governance issues.</p> <p>Sustainability risk around environmental issues includes but is not limited to climate risk, both physical and transition risk. Physical risk arises from the physical effects of climate change (acute or chronic). For example, frequent and severe climate-related events can impact products and services and supply chains. Transition risk (whether policy, technology, market or reputation risk) arises from the adjustment to a low-carbon economy in order to mitigate climate change. Risks related to social issues can include but are not limited to labour rights and community relations. Governance related risks can include but are not limited to risks around board independence, ownership & control, or audit & tax management. These risks can impact an issuer’s operational effectiveness and resilience as well as its public perception and reputation, affecting its profitability and, in turn, its capital growth, which ultimately may impact the value of holdings in the Company.</p> <p>These are only examples of sustainability risk factors and sustainability risk factors do not solely determine the risk profile of the investment.</p> <p>Sustainability risk can manifest itself through different existing risk types (including but not limited to market, liquidity, concentration, credit, asset-liability mismatches etc.). By way of example, the Company may invest in the equity or debt of an issuer that could face potentially reduced revenues or increased expenditures from physical climate risk (e.g. decreased production capacity due to supply chain perturbations, lower sales due to demand shocks or higher operating or capital costs) or transition risk (e.g. decreased demand for carbon-intensive products and services or increased production costs due to changing input prices). As a result, sustainability risk factors may have a material impact on an investment, may increase the volatility, affect liquidity and may result in a loss to the value of investments in the Company.</p> <p>The impact of those risks may be higher for strategies with particular sectoral or geographic concentrations. For example, strategies may have geographical concentration in locations susceptible to adverse weather conditions where the value of the investments in the Company may be more impacted by adverse physical climate events. Strategies with a focus on emerging markets may face additional impacts on the value of investments in companies located in such markets as a result of sustainability risks, in</p>

	<p>particular those caused by environmental events resulting from climate change, social issues (including relating to labor rights) and governance risk (including but not limited to risks around board independence, ownership & control, or audit & tax management). Additionally, disclosures or third-party data coverage associated with sustainability risks is generally less available or transparent in these markets.</p> <p>Specific sectoral concentrations such as investing in industries or issuers with high carbon intensity or high switching costs associated with the transition to low carbon alternatives, may be more impacted by climate transition risks. The stock prices of companies operating in natural resource related sectors may also be more impacted as a result of environmental factors (both physical changes related to climate change and the transition to alternative energy), as well as social and governance factors.</p> <p>All or a combination of these factors may have an unpredictable impact on the Company's investments. Under normal market conditions such events could have a material impact on the value of shares of the Company.</p> <p>Assessments of sustainability risk are specific to the asset class and to the Company's objective. Different asset classes require different data and tools to apply heightened scrutiny, assess materiality, and make meaningful differentiation among issuers and assets. Risks are considered and risk managed concurrently, by prioritising based on materiality and on the Company's objective.</p> <p>The impacts of sustainability risk are likely to develop over time and new sustainability risks may be identified as further data and information regarding sustainability factors and impacts becomes available and the regulatory environment regarding sustainable finance evolves. These emerging risks may have further impacts on the value of shares in the Company.</p>
