iShares eb.rexx® Government Germany 1.5-2.5yr UCITS ETF (DE)

MXN Hedged (Acc) Share Class

WKN: A2QP36

ISIN: DE000A2QP364

Exchange Traded Fund (ETF)

Management Company: BlackRock Asset Management Deutschland AG

Objectives and Investment Policy

- ▶ The Unit Class iShares eb.rexx® Government Germany 1.5-2.5yr UCITS ETF (DE) EUR (Dist) (the “Unit Class”) is a unit class of the iShares eb.rexx® Government Germany 1.5-2.5yr UCITS ETF (DE) (the Fund”) which is a passively managed exchange traded fund (ETF) that aims to track the performance of the eb.rexx® Government Germany 1.5-2.5 (Performance Index) as closely as possible. In this regard, it aims to replicate the benchmark (Index). The Unit Class also aims to reduce the impact of exchange rate fluctuations between the Fund’s underlying portfolio currencies and Mexican Peso on your returns by using foreign currency contracts for currency hedging.
- ▶ The Index measures the performance of German government bonds traded on the Eurex Bonds® platform with a remaining time to maturity between 1.5 and 2.5 years. Only bonds denominated in Euros with a minimum amount outstanding of EUR 4 billion are included in the Index. The Index is rebalanced on a monthly basis and uses a market-value weighted methodology with the maximum weighting of any individual bond limited to 30%.
- ▶ In order to achieve its investment objective, the Fund mostly invests in interest-bearing securities that are mainly issued by government entities in Germany.
- ▶ It is not the Investment Manager’s intention to leverage the Fund. However, the Fund may generate minimal amounts of leverage from time to time, for example, if using financial derivative instruments (FDIs) for efficient portfolio management purposes. FDIs (including FX forward contracts) may be used for direct investment purposes.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ This Unit Class is accumulating. Income from the Unit Class’ investments will be included in the value of the units rather than being paid out as a dividend.
- ▶ The Fund’s base currency is Euro. Units for this Unit Class are denominated in Mexican Peso. The performance of your units may be affected by this currency difference.
- ▶ Your units will be “hedged” with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the Fund’s underlying portfolio currencies. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your units.
- ▶ The units are listed on one or more Stock Exchange(s). Investors can buy or sell their units daily during business hours through an intermediary on such Stock Exchange(s).

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Unit Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Unit Class is rated two due to the nature of its investments which include the risks listed below. These factors may impact the value of the Unit Class’ investments or expose the Unit Class to losses.

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Unit Class to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Unit Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Investors dealing on exchanges will pay fees charged by their stock brokers. Such charges are publicly available on the exchanges on which the units are listed and traded, or can be obtained from stock brokers. If investors deal in units directly with the Fund or the Management Company of the Fund, the entry charge is up to 2% and the exit charge is up to 1%.

*Authorised participants dealing directly with the Fund or the Management Company (as the case may be) will pay related transaction costs.

The ongoing charges figure shown here is an estimate of the annualised charges. An estimate is being used because the Fund (or unit class) was newly launched or it has been launched within the reported period. The Fund's annual report for each financial year will include detail on the exact charges made.

One-off charges taken before or after you invest	
Entry Charge (entry charge 0% when traded on exchange)	2.00%*
Exit Charge (exit charge 0% when traded on exchange)	1.00%*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Unit Class over each year	
Ongoing Charges	0.18%
Charges taken from the Unit Class under certain conditions	
Performance Fee	None

Past Performance

Past performance is not a guide to future performance.

The Fund was launched in 2003. The Unit Class was launched in 2021.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

This chart has been left intentionally blank as there is less than one year's performance data.
