Do more with your money

MyMap. There's do, and there's do more.

We all deserve the ability to meet today's expenses while being prepared for all of life's moments in between.

That's why we built MyMap – a simple range of actively managed funds designed to help people invest to build savings that serve them throughout their lives.

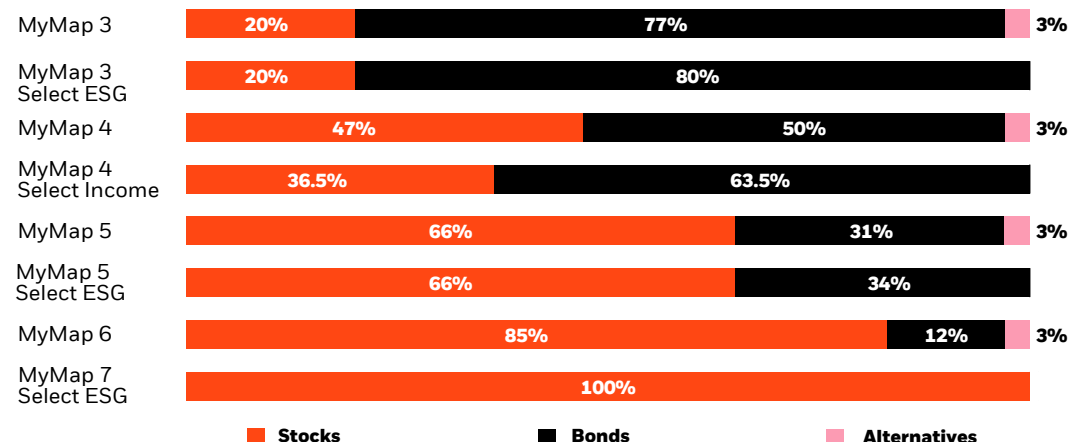

With high inflation and volatile financial markets, it can be challenging to build resilient portfolios.

The MyMap range takes the hard work out of investing, providing ready-made diversified portfolios designed to be simple, cost-effective, and risk-managed.

This means your money works harder and can do more for you.

Risk: Diversification and asset allocation may not fully protect you from market risk.

Current allocation of range

The power of investing

Investing has the potential to generate returns – beating inflation. This not only may protect your wealth from erosion, but also may help it grow over time.

This chart compares the long-term growth of £10,000 between a multi-asset investment portfolio and a typical UK savings account. Both results are based on real historical returns.

The investment portfolio has grown at a higher rate than inflation and is now* worth £35,855, whilst money parked in a savings account has barely kept up with inflation over a 24 year period. (*31 October 2022)

Investing outperforms savings over the long term

Risk: The value of an investment can fall as well as rise and investors may not get back the original amount invested. There is a risk that the entire amount invested may be lost. Past performance is not a reliable indicator of current or future results. BlackRock makes no representations or warranties as to the accuracy or completeness of any past, estimated or simulated performance results contained herein, and further nothing contained herein shall be relied upon as a promise by, or representation by BlackRock whether as to past or future performance results.

Key benefits of MyMap

Simple

BlackRock's MyMap funds are ready-made and have been built with risk levels in mind, so the only thing you need to do is choose one that fits your risk profile.

Cost-effective

Each MyMap fund is a collection of cost-effective exchange-traded funds (ETFs) and index funds, meaning we can keep fees low and you can keep more of the returns. All MyMap funds charge a low-cost 0.17% fee except for the MyMap 4 Select Income, which charges, 0.28%.

Diversified

The range of underlying investments is broad, so all your eggs aren't in one basket.

Risk: Diversification and asset allocation may not fully protect you from market risk.

Risk-managed

Risk is regularly assessed by our expert team to aim to stay it stays within predefined limits, but whilst also seeking the best possible returns.

Risk: Risk management cannot fully eliminate the risk of investment loss.

How does MyMap work?

MyMap is a range of actively managed multi-asset funds, that invest in different types of investments including equities (shares), bonds, and alternatives, providing more diversification than investing in a single investment type.

Under the hood of each MyMap fund is a collection of exchange-traded funds (ETFs) and index funds. These are investments that aim to track the performance of a specific index. An index represents the total return of a particular group of securities – often stocks or bonds.

Each actively managed MyMap fund offers a different level of risk and potential return to match your long-term goals and financial situation.

You select the MyMap fund that best matches the risk level you're comfortable with, and we do all of the work managing the fund for you.

Risk: Diversification and asset allocation may not fully protect you from market risk.

The MyMap fund range is cost-effective

If you consider two funds that differ only by their fee. The MyMap fund that charges 0.17% fee grew to over £353,000 which is approximately £34,000 more than the average investment fund that charges 0.65%.

The impact of fees

Opening doors globally

MyMap leverages BlackRock's global insights, expertise, and risk management and portfolio analytics.

They're constructed from risk-rated funds with an active management team at the helm, rebalancing quarterly, or more often if necessary, given market conditions. Rebalancing is the process of returning the values of the funds asset allocations to the levels defined by the investment plan.

Risk: Diversification and asset allocation may not fully protect you from market risk.

Global opportunities

The MyMap range has access to over 1,000* BlackRock managed funds, giving you access to a world of opportunities. *As of 31 March 2023.

BlackRock for more than 30 years

In line with our firm's purpose of helping more and more people experience financial well-being, MyMap captures this, all in one simple fund range.

Our sustainable offering

To meet the needs of the growing number of people interested in sustainable investing, we added three ESG funds into the MyMap range: MyMap 3 Select ESG, MyMap 5 Select ESG, and MyMap 7 Select ESG.

Environmental

Covers themes such as climate risks, natural resources scarcity, pollution and waste.

Social

Includes labour issues and product liability, risks such as data security.

Governance

Encompasses items relating to corporate governance.

Risk: There can be no guarantee that the investment strategy can be successful and the value of investments may go down as well as up.

The MyMap range includes three ESG funds for those looking to align their sustainability preferences with their investment goals through a low-cost multi-asset range.

All three ESG funds have a climate objective to reduce carbon emissions by 30%, invest at least 80% of their corporate assets in sustainable strategies, and invest at least 80% of their government bonds with sovereigns who have improved ESG credentials.*

Source: *sovereigns with improved ESG credentials are those who have an ESG rating of BB or higher.

Risk: This information should not be relied upon as investment advice, or a recommendation regarding any products, strategies. The environmental, social and governance (“ESG”) considerations discussed herein may affect an investment team’s decision to invest in certain companies or industries from time to time. Results may differ from portfolios that do not apply similar ESG considerations to their investment process.

Compare the MyMap range

We aim to capture investment potential, whilst managing the costs and risks associated with investing.

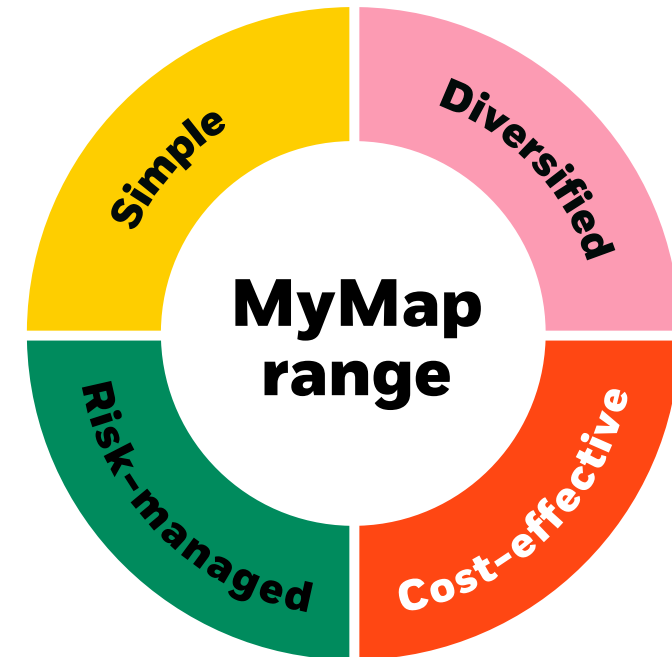

Each MyMap fund has a predefined risk profile, which is vital to achieving the right balance of risk and return potential – one that reflects your financial position and investment goals. You therefore need only select the fund with the profile that best matches these.

Each MyMap fund is designed to target different levels of market volatility, with the target volatility increasing from MyMap 3 to MyMap 7 Select ESG. Higher target volatility represents a higher risk and potential return which potentially means a larger exposure to equity holdings and a lower exposure to bonds.

Our range is also mapped against risk rating agencies, helping you compare each fund's risk against your expectations. For example; MyMap funds 3,4,5 and 6 have been given a silver rating by Morningstar. The Morningstar silver rating provides a forward-looking assessment of a fund's ability to outperform its peer group or a relevant benchmark on a risk-adjusted basis over the long term, typically a period of at least five years.

Source: Morningstar, 30 June 2023.

Risk: Past performance is not a reliable indicator of current or future results and should not be the sole factor of consideration when selecting a product or strategy.

Risk Warnings

Capital at risk. The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

Past performance is not a reliable indicator of current or future results and should not be the sole factor of consideration when selecting a product or strategy.

Changes in the rates of exchange between currencies may cause the value of investments to diminish or increase. Fluctuation may be particularly marked in the case of a higher volatility fund and the value of an investment may fall suddenly and substantially. Levels and basis of taxation may change from time to time.

Fund Risks

MyMap 3 Fund, MyMap 4 Fund, MyMap 4 Select Income Fund, MyMap 5 Fund, MyMap 6 Fund: Counterparty Risk, Credit Risk, Currency Risk, Equity Risk, Liquidity Risk.

MyMap 5 Select ESG Fund, MyMap 3 Select ESG Fund, MyMap 7 Select ESG Fund: Environmental, Social and Governance (ESG) risk. Counterparty Risk, Currency Risk, Credit Risk, Equity Risk, Liquidity Risk

Description of Fund Risks

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.

Equity Risk: The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.

Liquidity Risk: The Fund's investments may have low liquidity which often causes the value of these investments to be less predictable. In extreme cases, the Fund may not be able to realise the investment at the latest market price or at a price considered fair.
