

**PRODUCT:** ACS World Low Carbon Screened and Optimised Equity Tracker Fund (the "**Fund**")

**MANAGER:** BlackRock Fund Managers Limited (the "**Manager**")

**DATE:** 24 April 2026

**FCA PRODUCT REFERENCE NUMBER:** 796804

**This Fund does not have a UK sustainable investment label. Sustainable investment labels help investors find products that have a specific sustainability goal. The Fund does not use a sustainability label because whilst the Fund tracks an index which applies environmental, social or governance ("ESG") criteria (as described below), the Fund does not have a specific sustainability goal. This is because the Fund follows a passive strategy and the index which the Fund tracks may not meet the criteria of any sustainability label.**

### Sustainability Approach

The Fund tracks the performance of the MSCI World Low Carbon Target Reduced Fossil Fuel Select Index (the "**Benchmark Index**"). The Benchmark Index aims to reflect the performance characteristics of a sub-set of equity securities within the MSCI World Index (the "**Parent Index**") which remain after the index provider has excluded securities using pre-defined ESG screens and weighted securities using an optimisation process, as described below. These ESG criteria may not apply to investments held by the Fund for efficient portfolio management and liquidity purposes which are not included in the Benchmark Index (including derivatives, money market instruments, deposits and units in collective investment schemes). However, exposure to such assets will not exceed 20% of the Fund's total assets. The Benchmark Index excludes issuers based on their involvement in certain activities deemed by the index provider to have negative environmental or social outcomes. Issuers are excluded from the Benchmark Index based on their involvement in the following business lines/activities (or related activities): (i) thermal coal mining; (ii) thermal coal based power generation; (iii) unconventional oil and gas extraction; (iv) conventional oil and gas extraction; (v) oil and gas based power generation; (vi) oil sands extraction; and (vii) fossil fuel reserves (i.e. issuers that have coal and/or oil and natural gas reserves used for energy purposes). The index provider's definition of "involvement" in each activity may be based on specific revenue thresholds, or any connection to an activity regardless of the amount of revenue received. The Benchmark Index also excludes issuers from the Parent Index which have a 'red' (i.e. very severe) MSCI ESG controversy score. An MSCI controversy score measures an issuer's involvement (or alleged involvement) in very serious controversies relating to their operations and/or products which are deemed to have a negative ESG impact ("**MSCI ESG Controversy Score**"). Where data is unavailable in respect of an issuer's controversy rating that issuer will be excluded from the Benchmark Index. Where data is unavailable in respect of an issuer's involvement in the restricted activities described above, that issuer is still eligible for inclusion in the Benchmark Index. Once the exclusion screens are applied, the Benchmark Index is constructed using an optimisation process which aims to: (a) minimise the carbon emission intensity and potential emission intensity of the constituents of the Benchmark Index relative to the Parent Index; and (b) create a portfolio with at least a 10% increase in the aggregate weight of issuers which set carbon emission reduction targets; subject to, in each case, a turnover budget (i.e. a limit on trading activity), a tracking error budget and the other optimisation parameters applicable to the portfolio. Please refer to the risk factor set out in section 20(B) (*Use of optimisers in Benchmark Indices*) of the Fund's prospectus for more information. Carbon intensity is a measurement of issuers' carbon emissions, in tonnes of greenhouse gases ("**GHG**") equivalent, divided by enterprise value including cash. The calculation of carbon intensity includes Scope 1 GHG emissions, Scope 2 GHG and Scope 3 GHG emissions. Please refer to the risk factor set out in section 20(A) (*Carbon emission intensity calculations and greenhouse gas (GHG) emissions data*) of the Fund's prospectus for more information on GHG emissions. Where data is unavailable for an issuer, the average carbon intensity of all the issuers of the MSCI ACWI Index in the same Global Industry Classification Standard (GICS) industry group in which that issuer belongs is used. Potential carbon emissions are based on a company's fossil fuel reserves used for energy purposes and the potential emission intensity of an issuer is derived by dividing the potential carbon emissions of that issuer by its enterprise value including cash. Further details regarding the Benchmark Index and the Parent Index (including their constituents and the ESG methodology for the Benchmark Index (including any specific revenue thresholds)) are available on the index provider's website at <https://www.msci.com/constituents>.

## Sustainability Metrics

The ESG criteria described above were met through the Fund closely tracking the Benchmark Index. The following table provides information about the performance of these ESG criteria during the reference period which is from 1 January 2025 to 31 December 2025. The figures presented are based on an average of the value of investments traded and held on or around each applicable rebalance date within the reference period.

Sustainability Metric	Description	Fund	Parent Index
<b>Carbon emissions intensity</b>	Weighted average scope 1, 2, 3 carbon intensity (annual carbon emissions, divided by enterprise value including cash in millions (USD)) Target: minimise relative to Parent Index	59.36 (79.77 lower than the Parent Index)	293.32
<b>Potential carbon emissions</b>	Weighted average potential carbon emissions (absolute potential emissions, divided by enterprise value including cash) Target: minimise relative to Parent Index	0.00 (99.99% lower than the Parent Index) <sup>***</sup>	0.00
<b>Exposure to issuers setting carbon emissions reduction targets</b>	% exposure to issuers which have set corporate carbon emission reduction targets Target: 10% higher than the screened version of the Parent Index	57.00% (9.93% higher than the screened version of the Parent Index of 51.84%)*	Not applicable <sup>**</sup>
<b>Exclusion of issuers involved in certain restricted activities (as described above)</b>	% market value exposure to issuers involved in certain activities deemed to have negative environmental and/or social outcomes	0.00%	7.42%
<b>Exclusion of issuers which have a 'red' or no MSCI ESG controversy score</b>	% market value exposure to issuers which have a 'red' or no MSCI ESG controversy score	0.00%	0.23%

\* The aggregate results for each ESG consideration are calculated as an average of the results across the relevant index rebalances during the financial period. The Benchmark Index had rebalanced as of the close of the last business day of May and November ("Effective Date"). The ESG data used for each rebalance is taken as of the end of the preceding month ("ESG Data Cut-off"), and the composition of the index ("Index Cut-off") is announced nine business days before the Effective Date. Changes to ESG data between an ESG Data Cut-off and an Effective Date as well as market movements between an Index Cut Off and the same Effective Date can result in the Fund missing its ESG consideration on the Effective Date, this was the case at the May rebalance.

\*\* The Parent Index is noted as not applicable, as a screened version of the Parent Index is used for this sustainability metric, as outlined above and in the prospectus of the Fund.

\*\*\* The results included in the table for this sustainability metric (0.00) are rounded to two decimal places and when not rounded, the Fund was 99.99% lower than the Parent Index.

## Additional Information

**Pre-contractual disclosure:** Please see the Fund's prospectus, which is available by searching the name of the Fund on the following website: [www.blackrock.com/uk/education/library](http://www.blackrock.com/uk/education/library).

**Product-level sustainability report:** Please see the Sustainability Product Report on the following website: <https://www.blackrock.com/uk/literature/public-disclosure/sustainability-product-report-acs1.pdf>

**Sustainability entity report:** Not currently available.

**Other non-sustainability related information:** Please see the Fund's key investor information document, which is available by searching the name of the Fund on the following website: <https://www.blackrock.com/uk/solutions/library/gls-library-uk?materialType=kiid>.
