This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund is a sub-fund of BlackRock Authorised Contractual Scheme I taking the form of a Co-ownership Scheme. As a consequence of this, the Fund may be treated as tax transparent for the purpose of income and/or capital gains by relevant taxing jurisdictions. Each investor should take appropriate professional advice as to the tax treatment of their investment in the Fund. Investors in the Fund must be Eligible Investors as defined in the Fund's prospectus and must have completed all relevant documentation prior to the purchase of units in the Fund.
- The Fund aims to provide a return on your investment (generated through an increase to the value of the assets held by the Fund and/or income received from those assets) by tracking closely the performance of the MSCI World ESG Focus Low Carbon Screened Index, the Fund's benchmark index (the "Benchmark Index"). The Fund invests in equity securities (e.g. shares) of companies that make up the Benchmark Index. The Fund may use derivatives (i.e. investments the prices of which are based on one or more underlying assets) to help achieve its investment objective or for efficient portfolio management purposes (EPM) (i.e. to reduce risk or costs within the Fund's portfolio, or generate additional income). The use of derivatives is expected to be limited. The Fund may engage in short-term secured lending of its investments to certain eligible third parties to generate additional income and off-set costs.
- The Benchmark Index aims to reflect the performance characteristics of a sub-set of equity securities within the MSCI World Index ("Parent Index") which remain after the index provider has excluded securities using pre-defined environmental, social and governance (ESG) screens and weighted securities using an optimisation process (as described in the Fund's prospectus), as determined by the index provider. The Fund may obtain indirect exposure (through including but not limited to, derivatives and units in collective investment schemes) to securities considered not to satisfy the ESG criteria.

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Tax treatment of Fund: The tax treatment of this fund structure is so far untested which could lead to adverse tax consequences for the investor. Changes to the tax status of the Fund could lead to taxation being due.
