FUND OVERVIEW

- The Fund seeks to achieve long term capital growth.
- The Fund invests at least 80% of its total assets in the equity securities and equity-related securities (namely American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs)) of companies domiciled in, or exercising a significant part of their economic activity in global developed markets.
- Investment decisions are based on company-specific research to identify and select equity securities that, in the opinion of the Investment Adviser (IA), have viable competitive advantage and the potential to produce attractive long-term capital growth. The Fund's portfolio is expected to be concentrated (i.e. expected to hold few stocks in comparison to other funds), but there is no guarantee that this will always be the case.

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
