Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 30-Apr-2026. All other data as at 18-May-2026.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the MSCI North America Screened Select Index, the Fund's benchmark index (Index).
- The Fund is passively managed and aims to invest so far as possible and practicable in equity securities (i.e. shares) that make up the Index.
- The Index aims to reflect a sub-set of equity securities within the MSCI North America Index (Parent Index) which remain after the index provider has excluded issuers that are involved in the following business lines / activities: controversial weapons, nuclear weapons, thermal coal (including thermal coal mining and thermal coal power generation), oil sands or Arctic oil, tobacco-related products, gambling-related activities, adult entertainment, predatory lending activities, unconventional oil and gas, and firearms or small arms ammunition for the civilian market. The Index also excludes issuers that are not in compliance with the United Nations Global Compact Principles (UNGC Principles). The Parent Index measures the performance of large and mid-capitalisation stocks of the North America equity market.

RISK INDICATOR

Lower Risk

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
