Objectives and Investment Policy

- The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets).
- The Fund invests at least 70% of its total assets in the equity securities (e.g. shares) of companies which are domiciled in, or the main business of which is in, Asia excluding Japan. Many of these countries are developing countries.
- In particular, the Fund will invest in the equity securities of companies, which, in the opinion of the investment adviser (IA), have good growth potential. For example the companies may demonstrate above-average growth rates in earnings or sales and high or improving returns on capital.
- The Fund has the flexibility to invest outside of the asset class and geographical focus set out above, which for the avoidance of doubt may include Japan.
- The Fund is actively managed and the investment adviser has discretion to select the Fund's investments. In doing so, the IA will refer to the MSCI All Country Asia ex Japan Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The IA may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by unitholders to compare the performance of the Fund.
- The IA may use derivatives (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective and for efficient portfolio management.
- The Fund may, via derivatives, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your units will be accumulating units (i.e. dividend income will be included in their value).
- Your units will be denominated in Sterling, the Fund’s base currency.
- You can buy and sell your units daily. The minimum initial investment for this unit class is £500.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund’s prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

Lower risk
Typically lower rewards

1

Higher risk
Typically higher rewards

- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 25 January 2022. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund’s annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund’s net asset value at each year-end. The Fund was launched in 2014. The unit class was launched in 2014. Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

†¹MSCI All Country Asia ex Japan Index (GBP)

It is not intended that the performance of the Fund will track the index.

Historic performance to 31 December 2021
