OBJECTIVES AND INVESTMENT POLICY

The Fund aims to provide a return (gross of charges) on your investment (generated through an increase in the value of the assets held by the Fund) by tracking closely the performance of the Morningstar Developed Markets Asia Pacific ex-Japan ESG Enhanced Index (the "Benchmark Index").

The Fund invests in equity securities (e.g. shares) of companies that make up the Benchmark Index. The Benchmark Index aims to reflect the performance of a sub-set of equity securities within the Morningstar Developed Markets Asia-Pacific ex-Japan Target Market Exposure Index (the "Parent Index") which remain after the index provider has excluded securities using pre-defined ESG screens and criteria, as determined by the index provider.

The pre-defined ESG screens set by the index provider seek to limit and/or exclude from the Benchmark Index corporate issuers within the Parent Index which are determined by the index provider (often by reference to specific revenue thresholds or to any connection to an activity regardless of any revenue received) as having exposure to, or other ties with, certain activities including but not limited to controversial weapons, tobacco, nuclear weapons, civilian firearms, thermal coal, oil sands, adult entertainment, alcohol, gaming and UN global compact violators.

The Fund is passively managed and the investment manager has limited discretion to select the Fund’s investments and in doing so will take into consideration the Benchmark Index.

The Fund intends to replicate the Benchmark Index by holding the equity securities, which make up the Benchmark index, in similar proportions to the benchmark index. Derivatives (i.e. investments the prices of which are based on one or more underlying assets) may be used to seek to reduce risk (relevant to the investment objective) within the Fund, reduce investment costs and generate additional income for the Fund (often referred to as "efficient portfolio management" or "EPM").

The Fund may also engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.

Recommendation: This Fund may not be appropriate for short-term investment.

Your units will be income units (i.e. dividend income will be paid semi-annually on the units).

Your units will be denominated in Sterling, the Fund’s base currency.

You can buy and sell your units daily. The minimum initial investment for this unit class is £10,000,000.

RISK AND REWARD PROFILE

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean risk free.

The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund’s investments or expose the Fund to losses.

Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Investors should therefore make a personal ethical assessment of the benchmark index’s ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund’s investments compared to a fund without such screening.
- Particular risks not adequately captured by the risk indicator include: Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure shown here is an estimate of the annualised charges. An estimate is being used because the Fund (or unit class) was newly launched or it has been launched within the reported period. The Fund's annual report for each financial year will include detail on the exact charges made.

** (i) To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges. (ii) Holders in this unit class may be subject to additional periodic charges outside of the Fund by way of separate agreement with BlackRock.
