Global Bond Income Fund

A sub-fund of BlackRock Global Funds

Class A10 Hedged NZD Dist

ISIN: LU3348747455

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- ▶ The Fund aims to achieve an income on your investment without sacrificing long term capital growth.
- ▶ The Fund invests globally at least 70% of its total assets in fixed income securities. These include bonds and money market instruments (i.e. debt securities with short term maturities). In order to generate above average income, the Fund will seek diversified income sources across a variety of such fixed income transferable securities.
- ▶ The fixed income securities are denominated in various currencies and may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development), including those domiciled in, or the main business of which is in, emerging market countries.
- ▶ The Fund may invest in the full range of fixed income securities, including investment grade (i.e. meet a specified level of credit worthiness), non-investment grade (which may be significant exposure) and unrated.
- ▶ The investment adviser (IA) may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ The Fund is actively managed, and the IA has discretion to select the Fund's investments without reference to a benchmark. However, investors may use the Bloomberg Global Aggregate Bond Index (USD Hedged) (the "Index") to compare the performance of the Funds versus global bonds (and the IA intends to include these comparisons in its reports on the Fund from time to time)
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be distributing. The amount of dividend payable on the shares will be determined by a committee appointed by the Directors of the Fund, which will aim to pay stable dividends monthly, although this is not guaranteed. Dividends will be calculated on the basis of expected income, net realised and unrealised capital gains over a period of time. In the event dividend is paid from the capital of the Fund, it will result in capital erosion and may constrain further capital growth.
- ▶ The Fund's base currency is US Dollar. Shares for this class are bought and sold in New Zealand Dollar. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be hedged with the aim of reducing the effect of exchange rate fluctuations between the denominated currency of the shares and the Fund's underlying portfolio currencies or the Fund's base currency. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares. Please see the prospectus for further details.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$5,000 or other currency equivalent.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Asset backed securities and mortgage backed securities are subject to the same risks described for fixed income securities. These instruments may be subject to 'Liquidity Risk', have high levels of borrowing and may not fully reflect the value of underlying assets.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure shown here is an estimate of the annualised charges. An estimate is being used because the Fund (or share class) was newly launched or it has been launched within the reported period. The Fund's annual report for each financial year will include detail on the exact charges made.

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	1.26%**

Charges taken from the Fund under certain conditions	
Performance Fee	None

Past Performance

Past performance is not a guide to future performance.

The Fund was launched in 2018. The share class was launched in 2026.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.
