

Sukuk Fund

A sub-fund of BlackRock Global Funds

Class A2 USD Accu

ISIN: LU3364740947

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- ▶ The Fund seeks to maximise total return through a combination of income and capital growth in line with Shari'ah investment principles.
- ▶ The Fund will invest at least 70% of its total assets in USD denominated investment grade sukuk issued by sovereign, quasi sovereign, corporate and supranational entities. The securities include issuers labelled as Sukuk and compliant with the AAOIFI standards.
- ▶ All securities selected by the Investment Adviser are screened by IdealRatings and are deemed compliant with the Shari'ah principles, as further detailed in section "Investments in a Shari'ah Fund" in the prospectus.
- ▶ In the rare event that any non-Shari'ah compliant income is nonetheless received by the Fund, such income will be excluded from the Fund's Net Asset Value and donated to approved charities for purification purposes, as further detailed in section "Purification of non-Shari'ah compliant Income" in the prospectus.
- ▶ The Fund's exposure to contingent convertible bonds is limited to 10% of its total assets and its exposure to Distressed Securities is limited to 5% of its total assets. Any such investments will be strictly limited to structures that have been reviewed and approved as Shari'ah-compliant by the appointed Shari'ah Panel.
- ▶ The Fund is designed for Islamic investors, but subscription is opened to any other investors who is interested in investing in the Fund.
- ▶ The Fund is actively managed, and the Investment Adviser (IA) has discretion to select the Fund's investments. In doing so, the IA will refer to the J.P. Morgan USD Aggregate Sukuk IG Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The IA may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Index has been chosen by the IA because it has determined that it is representative of the investment universe of the Fund and should be used by investors to compare the performance of the Fund.
- ▶ The IA may use Shari'ah-compliant financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes (not speculation) in order to achieve the investment objective of the Fund, or efficient portfolio management purposes.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be non-distributing (i.e. dividend income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$5,000 or other currency equivalent.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated three due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
 - Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
 - Shari'ah funds do not pay interest and are prohibited from investing in businesses that are considered unlawful under Islamic principles. As a result, they may perform differently from other funds that do not follow Islamic principles.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
