BlackRock Emerging Markets Alpha Tilts Fund

A sub-fund of BlackRock UCITS Funds

Class Flexible Accumulating USD

ISIN: IE00BDZSCX67

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund aims to achieve long-term capital growth on your investment.
- ▶ In order to achieve its investment objective and policy, the Fund invests primarily in the equity securities (e.g. shares) of companies domiciled in, or the main business of which is in, emerging market countries and/or in the shares of companies domiciled in, or the main business of which is in, developed markets, but which have significant business operations in emerging markets.
- ▶ The Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection, based on their expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account. The models select stocks from a broad universe of equities and rank them broadly according to three categories: fundamental information about the relevant company (such as financial reports), market sentiment towards the company's stock and general economic themes (such as interest rates) to which the stock may be exposed to.
- ▶ The investment manager (IM) may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income.
- ▶ The Fund may indirectly invest in emerging markets by investing in American Depository Receipts (ADRs), which are listed or traded on stock exchanges and regulated markets outside emerging markets. ADRs are investments issued by financial institutions which give exposure to underlying equity securities.
- ▶ The Fund is actively managed and the IM has discretion to select the Fund's investments. In doing so, the IM will refer to the MSCI Emerging Markets Index (the Index) when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy). The IM is not bound by the components or weighting of the Index when selecting investments. The IM may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Fund is also designed to provide investors with achievement of the investment objective by typically taking a moderate level of active risk relative to the Index in order to seek a commensurate active return in excess of applicable management fees over the long term (i.e. 5 years or more). The Index should be used by investors to compare the performance of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in US Dollar, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is US\$250,000.

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
 - Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - The Fund uses quantitative models in order to make investment decisions. As market dynamics shift over time, a quantitative model may become less efficient or may even present deficiencies under certain market conditions.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 January 2024. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** (i) To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges. (ii) Holders in this unit class may be subject to additional periodic charges outside of the Fund by way of separate agreement with BlackRock.
