iShares China CNY Bond Index Fund (IE)

A sub-fund of BlackRock Fixed Income Dublin Funds plc

Class Flex Hedged USD Accu

ISIN: IE000J642SM6

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the Bloomberg Barclays China Treasury + Policy Bank Index, the Fund's benchmark index (Index).
- ▶ The Fund is passively managed and aims to invest so far as possible and practicable in the fixed income (FI) securities (such as bonds) that make up the Index or provide a similar return to the securities of the Index. The FI securities, will at the time of inclusion in the Index, comply with the requirements of the Index and will have no minimum credit rating, provided they are not in default.
- ▶ The Index measures the performance of CNY denominated bonds issued by the Ministry of Finance of the People's Republic of China (PRC), and debt issued by Chinese policy banks (PRC government agencies which are not guaranteed by the government), that are listed on the China Interbank Bond Market (CIBM). They have a par value of at least CNY5 billion and a remaining maturity of at least 1 year at the time of inclusion in the Index. The Index does not impose any minimum credit rating requirements. The Fund intends to replicate the Index by holding the bond issues of all issuers which make up the Index, in a similar proportion to the weightings of the issuers in the Index.
- ▶ The investment manager may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objectives. FDIs may be used for direct investment purposes. The use of FDIs is expected to be limited for this Share Class.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be accumulating shares (i.e. dividend income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the base currency of the Fund. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$500,000.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated three due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- ▶ Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- ▶ Fixed income securities issued or guaranteed by government entities in emerging markets generally experience higher 'Credit Risk' than developed economies.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
 - The PRC/Ireland tax treaty provides for exemption from Chinese capital gains tax on sales of the Fund's investment in China A Shares. Although the Fund is expected to be exempt, there is a risk that the PRC tax authorities could consider the Fund not to be eligible for the PRC/Ireland tax treaty and seek to collect such tax on a retrospective basis, which would affect the value of the investment.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects arbitrage by an investor on the yield of the Fund.

The ongoing charges figure is based on the fixed annualised fees charged to the Fund as set out in the Fund's prospectus. This figure excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** (i) To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges. (ii) Holders in this share class will be subject to additional periodic charges outside of the Fund by way of separate agreement with BlackRock.

Past Performance

Past performance is not a guide to future performance.

The Fund was launched in 2021. The share class was launched in 2025.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

This chart has been left intentionally blank as there is less than one year's performance data.
