Objectives and Investment Policy

- ▶ The Share Class is a share class of a Fund which aims to achieve a return on your investment through a combination of capital growth and income on the Fund's assets which reflects the return of the Bloomberg MSCI December 2035 Maturity EUR Corporate ESG Screened Index, the Fund's benchmark index (Index).
- ▶ The Share Class, via the Fund, is passively managed and aims to invest so far as possible and practicable in the fixed income (FI) securities that make up the Index and comply with its credit rating requirements. If the credit ratings of the FI securities are downgraded, the Fund may continue to hold these until they cease to form part of the Index and it is practicable to sell the position.
- ▶ The Index measures the performance of investment grade, Euro-denominated, taxable fixed-rate corporate bonds, as defined by the index provider, and excludes issuers based on the index provider's ESG and other exclusionary criteria.
- ▶ To be eligible for inclusion in the Index the bonds must (i) be Euro-denominated; (ii) mature on or between 01/01/2035 and 02/12/2035; (iii) comply with the requirements of the Index in relation to the minimum outstanding amount for each bond issuance; and (iv) be rated investment grade (Baa3/BBB-/BBB- or higher) by one or more of Moody's, Standard & Poor's and Fitch, using the middle rating of Moody's, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used.
- ▶ The Index applies screens which exclude issuers that are involved in the following business lines/activities: tobacco, nuclear weapons, civilian firearms, controversial weapons (including landmine manufacturing, cluster munitions, depleted uranium weapons, chemical and biological weapons), thermal coal (including thermal coal mining and thermal coal power generation), oil sands, conventional weapons and weapons systems/components/support systems/services. The Index also excludes issuers with a 'Red' MSCI ESG Controversies score (equal to 0) or that are not in compliance with the United Nations Global Compact Principles (UNGC Principles) and issuers that have not been assessed as part of the business involvement screens listed above or not been researched for an MSCI ESG Controversies Score or compliance with UNGC principles.
- ▶ The Index is market value weighted, with a percentage cap placed on each issuer, in accordance with the methodology of the index provider. The Index rebalances on a monthly basis. It is a term of investment in the Fund that Shareholders on 02/12/2035 will have their Shares redeemed without further notice or Shareholder approval on 03/12/2035.
- ▶ The Fund uses optimising techniques to achieve a similar return to its Index. These techniques may include the strategic selection of certain securities that make up the Index or other securities which provide similar performance to certain constituent securities. These may also include the use of financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). FDIs may be used for direct investment purposes.
- ▶ The Fund may obtain limited exposure to securities which do not satisfy the ESG criteria.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the Fund.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index. This Fund may not be appropriate for investors who plan to withdraw their money before 02/12/2035
- ▶ Your shares will be accumulating shares (i.e. income will be included in their value).
- ▶ Your shares will be denominated in Euro, the Fund's base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - Fixed maturity products are designed for investors to hold the shares/units for the full period of the fund, otherwise the loss of capital may be greater. The fund may also see an enhanced risk to early closure. Given the changing nature of the assets held, the risks incurred by investors will differ during each period.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
 - Defined Term Fund: The Fund may be more concentrated in certain industries or sectors than a fund that tracks a broader index. The composition and risk and reward profile of the Fund will be different during its last year as the corporate bonds mature. The Fund may not be suitable for new investment in its final year or in the period approaching its final year.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
