OMM - Actively Managed Global Investment Grade Corporate Bond Fund

A sub-fund of BlackRock Solutions Funds ICAV

Class Q Distributing GBP Hedged

ISIN: IE000R3U28Q9

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund aims to outperform the Bloomberg MSCI Global Green Corp and Global Corp SRI Screened Composite Index (Euro Hedged) (the Benchmark Index) over a rolling three year period.
- ▶ The Fund invests at least 80% of its total assets in fixed income (FI) securities (such as bonds, notes, debentures) issued in global developed markets and emerging markets by corporate issuers or government-related issuers (including governments, foreign agencies, supranational bodies (e.g. the International Bank for Reconstruction and Development) and local authorities) which are investment grade (i.e. meet a specified level of credit worthiness) and instruments related to such FI securities, including financial derivative instruments (FDI) (i.e. investments the prices of which are based on one or more underlying assets). The Fund may invest up to 25% of its total assets in emerging markets and up to 5% in asset backed and mortgage backed securities (i.e. financial securities backed by cash flows from debt). The Fund may also invest in FI securities which are high yield (i.e. non-investment grade) and instruments related to such FI securities, money market instruments (i.e. debt securities with short term maturities), deposits and cash.
- ▶ The investment manager (IM) will seek to take into account certain environmental, social and governance (ESG) related characteristics when determining whether an investment is appropriate for the Fund (although ESG is not the sole consideration). The IM will do this by investing in sustainable investments and by seeking to limit and/or exclude direct investment (as applicable) in issuers which are identified using available data from an external ESG research provider as being involved in certain activities including but not limited to issuers engaged in, or are otherwise exposed to, the production of weapons, issuers deriving a portion of their revenue from thermal coal extraction and issuers deriving a portion of their revenue from oil and gas production. Such activities are set out in full in the prospectus supplement and at [https://www.blackrock.com]. The Fund may obtain indirect exposure (e.g. through certain FDIs) to securities considered not to satisfy these ESG criteria.
- ▶ The Fund is actively managed. The IM has discretion to select the Fund's investments by allocating the Fund's assets to one or more Sub-Investment Managers (Sub-IM). In doing so, the IM and/or such Sub-IM will refer to the Benchmark Index when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Benchmark Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IM is not bound to the components or weighting of the Benchmark Index when selecting investments. The IM may also use its discretion to invest in securities not included in the Benchmark Index in order to take advantage of specific investment opportunities. The Fund is designed to provide investors with a relative gross return in excess of the Benchmark Index by typically taking a conservative level of active risk relative to the Benchmark Index in order to seek a commensurate return with respect to management fees over the medium term (i.e. 3 years or more). The Benchmark Index should be used by investors to compare the performance of the Fund.
- ▶ The IM may use FDIs to help achieve the Fund's investment objective and to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund is expected, via FDIs, to generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be distributing shares (i.e. dividend income will be paid on the shares quarterly based on the income received on the Fund's assets).
- ▶ The Fund's base currency is Euro. Shares for this class are bought and sold in Sterling. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the Fund's underlying portfolio currencies. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is £200,000,000.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - Asset backed securities and mortgage backed securities are subject to the same risks described for fixed income securities. These instruments may be subject to 'Liquidity Risk', have high levels of borrowing and may not fully reflect the value of underlying assets.
 - Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
 - The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure shown here is an estimate of the annualised charges. An estimate is being used because the Fund (or share class) was newly launched or it has been launched within the reported period. The Fund's annual report for each financial year will include detail on the exact charges made.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	0.24%

Charges taken from the Fund under certain conditions	
Performance Fee	None

Past Performance

Past performance is not a guide to future performance.

The Fund was launched in 2024. The share class was launched in 2024.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

This chart has been left intentionally blank as there is less than one year's performance data.
