The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by visiting www.iShares.com or www.blackrock.com. Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Market returns are based upon the midpoint of the bid/ask spread at 4:00 p.m. eastern time (when NAV is normally determined for most ETFs), and do not represent the returns you would receive if you traded shares at other times.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by visiting www.iShares.com or www.blackrock.com. Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Market returns are based upon the midpoint of the bid/ask spread at 4:00 p.m. eastern time (when NAV is normally determined for most ETFs), and do not represent the returns you would receive if you traded shares at other times. Performance shown reflects fee waivers and/or expense reimbursements by the investment advisor to the fund for some or all of the periods shown. Performance would have been lower without such waivers.

iShares Fixed Income Product Overview

With a comprehensive suite of iShares bond ETFs, investors can build a fixed income allocation based on risk/return objectives, balancing yield, duration and credit quality.

Source: BlackRock, as of 04/30/19.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted.

©2019 Blackrock. All rights reserved.

Weighted Average Maturity: The average length of time to the repayment of principal for the securities in the fund. This metric considers the likelihood that bonds will be called or prepaid before the scheduled maturity date.

Effective Duration: Measures the responsiveness of a portfolio's price to change in interest rates. This calculation adjusts for changes in a bond's projected cash flows as a result of interest rate changes, considering the likelihood that bonds will be called or prepaid before the scheduled maturity date, and is based on proprietary BlackRock models. Where appropriate, Effective Duration has been adjusted for impacts associated with leverage, hedging transactions, and non-bond holdings, including derivatives.

Option Adjusted Spread: The weighted average incremental yield earned over similar duration US Treasuries, measured in basis points. This metric considers the likelihood that bonds will be called or prepaid before the scheduled maturity date.

30 Day SEC Yield: A standard calculation of yield introduced by the SEC in order to provide fairer comparison among funds. This yield reflects the interest earned after deducting the fund's expenses during the most recent 30-day period by the average investor in the fund. Negative 30-Day SEC Yield results when accrued expenses of the past 30 days exceed the income collected during the past 30 days.

Unsubsidized 30-Day SEC Yield: Represents what a fund's 30-Day SEC Yield would have been had no fee waiver or expense reimbursement been in place over the period.

Tax Equivalent SEC Yield: Tax equivalent yield (TEY) is used by investors to compare yields on taxable and tax-exempt securities after accounting for taxes. TEY represents the yield a taxable bond would have to earn in order to match, after taxes, the yield available on a tax-exempt municipal bond. The highest Federal individual income tax rates are assumed (43.4%, inclusive of Medicare Contribution Tax) with State rates applied to state-specific muni funds (CMF: 50.9%, NYF: 50.6%).

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure (excluding any applicable sales charges) that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Past performance does not guarantee future results.

The Morningstar Percentile Rank comparison universe includes ETFs and mutual funds in the Morningstar Category. It is based on total return, which represents changes to the NAV and accounts for distributions from the funds (excluding any applicable sales charges).

Investing involves risk, including possible loss of principal.

Fixed income risks include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refers to the possibility that the bond issuer will not be able to make principal and interest payments. Non-investment-grade debt securities (high-yield/junk bonds) may be subject to greater market fluctuations, risk of default or loss of income and principal than higher-rated securities.

Tax Equivalent Yields are calculated using the highest federal individual income tax rate of 39.6%.
