

New York Municipal Opportunities Fund

BlackRock®

Inst: **MANKX** A: **MENKX** C: **MFNKX**

Commentary as of 06/30/21

- The fund posted returns of 2.46% (Institutional shares) and 2.31% (Investor A shares, without sales charge) for the second quarter of 2021.
- The fund outperformed its benchmark over the quarter. The largest contributors to this outperformance were the fund's security selection and exposure to duration (interest rate sensitivity) in municipal bonds.
- The fund ended the quarter with an overweight position in longer-maturity bonds (15-20 years) and an overweight holding in securities with a credit quality of A and lower. The fund's net duration position was below the benchmark at the end of quarter.

Contributors	Detractors
The largest contributors to performance were the fund's security selection and municipal duration exposure. The municipal yield curve rallied and flattened during the quarter, which resulted in a strong contribution from longer-maturity holdings. Additionally, credit spreads continued to tighten, which was positive. The fund's security selection in the tax-backed states, utilities, and corporate sectors contributed the most. Within the tax-backed states and utilities sectors, the primary drivers were securities from Puerto Rico, which are also of a lower credit quality.	The fund's interest rate hedges (short U.S. Treasury futures) detracted from performance during the quarter as U.S. Treasury rates rallied and flattened. Sector allocation and security selection within the transportation sector also detracted.

Further insight

The municipal market performed well during the second quarter, but lost some ground on a relative basis to the U.S. Treasury market. Demand for municipal bonds was consistently strong, while supply was generally underwhelming. Credit spreads continued to improve (tighten) as market participants sought additional yield against a backdrop of strong economic growth and robust financial conditions for most municipal issuers. New York new issuance was relatively modest, which supported valuations of New York municipal bonds. Looking ahead, the municipal market should be well supported by particularly strong technical conditions over the next couple of months. Details of a forthcoming infrastructure deal may also be significant for the asset class.

★★★★★ Morningstar Overall™

Institutional shares rated against 50 Muni New York Intermediate Funds, as of 6/30/21, based on risk-adjusted total return. Ratings are determined monthly and subject to change. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics.††

Expenses for Institutional shares: Total **0.64%**; Net, Including Investment Related Expenses (dividend expense, interest expense, acquired fund fees and expenses and certain other fund expenses) **0.60%**. For Investor A shares: Total **0.89%**; Net, Including Investment Related Expenses **0.85%**. Institutional and Investor A shares have contractual waivers with an end date of 10/31/2021 terminable upon 90 days' notice. For certain share classes, BlackRock may voluntarily agree to waive certain fees and expenses in which the adviser may discontinue at any time without notice. Expenses stated as of the fund's most recent prospectus. Data represents past performance and is no guarantee of future results. Investment returns and principal values may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. All returns assume reinvestment of dividends and capital gains. Current performance may be lower or higher than that shown. Refer to blackrock.com for most recent month-end performance. Investment returns reflect total fund operating expenses, net of all fees, waivers and/or expense reimbursements. Index performance is shown for illustrative purposes only. It is not possible to invest directly in an unmanaged index. Share classes have different sales charges, fees and other features. Returns with sales charge reflect deduction of current maximum initial sales charge of 4.25% for Investor A shares. Institutional shares have no front- or back-end load. Institutional shares have limited availability and may be purchased at various minimums. See prospectus for details. Net Expenses Excluding Investment Related Expenses for Institutional shares: **0.50%**; for Investor A shares: **0.75%**.

Important Risks: The fund is actively managed and its characteristics will vary. Holdings shown should not be deemed as a recommendation to buy or sell securities. Bond values fluctuate in price so the value of your investment can go down depending on market conditions. Fixed income risks include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refers to the possibility that the bond issuer will not be able to make principal and interest payments. Non-investment-grade debt securities (high-yield/junk bonds) may be subject to greater market fluctuations, risk of default or loss of income and principal than higher-rated securities. The fund may use derivatives to hedge its investments or to seek to enhance returns. Derivatives entail risks relating to liquidity, leverage and credit that may reduce returns and increase volatility. There may be less information on the financial condition of municipal issuers than public corporations. The market for municipal bonds may be less liquid than taxable bonds. Some investors may be subject to Alternative Minimum Tax (AMT). Capital gains distributions are taxable. Concentrating in a single state is subject to greater risk of adverse economic conditions and regulatory changes.

The opinions expressed are those of the fund's portfolio management team as of June 30, 2021, and may change as subsequent conditions vary. Information and opinions are derived from proprietary and nonproprietary sources deemed by BlackRock to be reliable, are not necessarily all-inclusive and are not guaranteed as to accuracy.

1 The Standard & Poor's Municipal Bond Index measures the U.S. municipal market performance of bonds issued by states or municipalities. All bonds in the index are exempt from U.S. federal income taxes or subject to the alternative minimum tax. **2** The Standard & Poor's Custom New York Municipal Bond Index measures the performance of municipal bonds issued in New York and are exempt from federal income and alternative minimum tax. The state level municipal bond indices consist of bonds that have been issued by municipalities or municipal authorities within the 50 states, the District of Columbia, Puerto Rico and the US Virgin Islands. **†** The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The fund was rated against the following numbers of U.S.-domiciled Muni New York Intermediate funds over the following time periods: 50 in the last 3 years, 47 in the last 5 years and 42 in the last 10 years. With respect to these Muni New York Intermediate funds, the fund received a Morningstar Rating of 3, 5 and 5 stars for the 3-, 5- and 10-year periods, respectively. Other classes may have different performance characteristics.

You should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. The prospectus and, if available, the summary prospectus contain this and other information about the fund and are available, along with information on other BlackRock funds, by calling 800-882-0052 or from your financial professional.
