The holdings listed in this document align with the reporting requirements of Rule 2a-7 under the Investment Company Act of 1940, as amended (the "1940 Act"). The information and categories of holdings may differ from holdings reports made pursuant to 6c-11 under the 1940 Act, which are available elsewhere on www.blackrock.com.

Holdings shown are unaudited and are based on the Fund's unofficial books and records, and may not be representative of current or future investments. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advise regarding particular securities.

PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS.

WAM, Dollar-Weighted Average Maturity: The average maturity of a Fund is the average amount of time until the organizations that issued the debt securities in the Fund's portfolio must pay off the principal amount of the debt. "Dollar-weighted" means the larger the dollar value of a debt security in the Fund, the more weight it gets in calculating this average. To calculate the dollar-weighted average maturity, the Fund may treat a variable or floating rate security as having a maturity equal to the time remaining to the security's next interest rate reset data rather than the security's actual maturity.

WAL, Dollar-Weighted Average Life: The dollar-weighted average maturity of a Fund's portfolio calculated without reference to the exceptions used for variable or floating rate securities regarding the use of the interest rate reset dates in lieu of the security's actual maturity data. "Dollar-weighted" means the larger of the dollar value of a debt security in the Fund, the more weight it gets in calculating this average. The "Geography" data point within this SOI represents BlackRock's view of each security's Geography risk.

The "Geography" data point within this SOI represents BlackRock's view of each security's Geography risk.

Carefully consider the Funds' investment objectives, risk factors, and changes and expenses before investing. This and other information can be found in the Funds' prospectuses or, if available, the summary prospectuses, which may be obtained by visiting the iShares Fund and BlackRock Fund prospectus pages. Read the prospectus carefully before investing.

iShares Government Money Market ETF: You could lose money by investing in the Fund. Although the Fund will seek to quality as a "government money market fund," it will not seek to maintain a stable net asset value ("NAV") per share using the amortized cost method of valuation. Instead, the Fund will calculate its NAV per share based on the market value of its investments. In addition, unlike a traditional money market fund, the Fund operates as an exchange traded fund ("ETF"). As an ETF, the Fund's shares will be traded on an exchange and will generally fluctuate in accordance with changes in net asset value ("NAV") per share as well as the relative supply of, and demand for, shares on the exchange. Because the share price and NAV of the Fund will fluctuate, when shares are sold (or redeemed, in the case of an Authorized Participant), they may be worth more or less than what was originally paid for them. An investment in the Fund is not a bank account and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor is not required to reimburse the Fund for losses, and you should not expect that the sponsor will provide financial support to the Fund at any time, including during periods of market stress.

The schedule of investments (SOI) represents certain information regarding the traded positions held within the portfolio as of the specified date. It does not include cash, accrued income and/or payables/receivables. The total assets reflected on the SOI will not match to the net asset value of the Fund as these items are excluded.
