The Fund’s primary investment objective is to provide current income and current gains, with a secondary objective of long-term capital appreciation. The Fund seeks to achieve its investment objectives by investing in common stocks that pay dividends and have the potential for capital appreciation and by utilizing an option writing strategy to enhance distributions to its shareholders. Under normal market conditions, the Acquiring Fund invests substantially all of its total assets in dividend-paying equities and may invest up to 20% of its total assets in equity securities of issuers that do not pay dividends.

**GROWTH OF A HYPOTHETICAL $10,000**

The chart illustrates the growth of a hypothetical $10,000 investment in the fund's common shares based on market price beginning on the date noted with all distributions reinvested. Ending value as of the date at the top of this document. Performance does not reflect sales charges or fees that may be incurred. Past performance is no guarantee of future results.

**HISTORICAL PREMIUM/DISCOUNT**

Premium-discount graph illustrates the amount by which the market price trades above or below net asset value.

Returns for less than one year are not annualized. Performance data quoted represents past performance of common shares and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor’s shares may be worth more or less than the original cost. The fund’s market price and net asset value will fluctuate with market conditions. All return data assumes reinvestment of all distributions. Current performance may be lower or higher than the performance data quoted. For more information, please refer to www.blackrock.com. Returns are shown net of advisory fees paid by the fund and net of the fund’s operating fees and expenses. Investors who purchase shares of the fund through an investment adviser or other financial professional may separately pay a fee to that service provider. Past performance is not indicative of future results. If a Fund estimates that it has distributed more than its income and net realized capital gains in the current fiscal year, a portion of its distribution may be a return of capital. A return of capital may occur, for example, when some or all of a shareholder's investment is paid back to the shareholder. A return of capital distribution does not necessarily reflect a Fund's investment performance and should not be confused with 'yield' or 'income'. When distributions exceed total return performance, the difference will reduce the Fund's net asset value per share. Although the character of income will not be determined until the end of the fund's fiscal year, please refer to the 'Closed-End Fund Resources' section of the BlackRock website for Section 19 notices that provide estimated amounts and sources of the fund's distributions, which should not be relied upon for tax reporting purposes.
Average Market Cap: The average size of the securities the fund invests in.

Distribution Rate: Distribution Rate is calculated by dividing the last distribution per share (annualized) by market price.

Type of Options: Type of options written to enhance portfolio returns

Percentage Portfolio Overwritten: Under normal market conditions, the Trust intends to write options with respect to approximately 30% to 40% of its net assets, although this percentage may vary over time with market conditions.

You should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. The prospectus and, if available, the summary prospectus contain this and other information about the fund and are available, along with information on other BlackRock funds, by calling 800-882-0052 or from your financial professional. The prospectus should be read carefully before investing.

Investing involves risks including possible loss of principal. All information and data, including portfolio holdings and performance characteristics, is as of the date at the top of this document, unless otherwise noted, and is subject to change. Note that closed-end funds often trade at a discount to NAV but may trade at a premium.

SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics provide investors with specific non-traditional metrics. Alongside other metrics and information, these enable investors to evaluate funds on certain environmental, social and governance characteristics. Sustainability Characteristics do not provide an indication of current or future performance nor do they represent the potential risk and reward profile of a fund. They are provided for transparency and for information purposes only. Sustainability Characteristics should not be considered solely or in isolation, but instead are one type of information that investors may wish to consider when assessing a fund.

This fund does not seek to follow a sustainable, impact or ESG investment strategy. The metrics do not change the fund’s investment objective or constrain the fund’s investable universe, and there is no indication that a sustainable, impact or ESG investment strategy will be adopted by the fund. For more information regarding the fund’s investment strategy, please see the fund’s prospectus.

MSCI ESG Fund Rating (AAA-CCC) | AA | MSCI ESG Quality Score (0-10) | 7.67
--- | --- | --- | ---
MSCI ESG Quality Score - Peer Percentile | 87.80% | MSCI ESG % Coverage | 96.58%
Fund Lipper Global Classification | Alternative Other | MSCI Weighted Average | 132.44
Funds in Peer Group | 23 | Carbon Intensity (Tons CO2E/$M SALES) | -
MSCI ESG Quality Score - Peer Percentile: The fund’s ESG Percentile compared to its Lipper peer group.

All data is from MSCI ESG Fund Ratings as of 07-Sep-2021, based on holdings as of 31-May-2021. As such, the fund’s Sustainability Characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% of the fund’s gross weight must come from securities with ESG coverage by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund’s gross weight; the absolute values of short positions are included but treated as uncovered), the fund’s holdings date must be less than one year old, and the fund must have at least ten securities. For newly launched funds, Sustainability Characteristics are typically available 6 months after launch.

ESG GLOSSARY:

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score - Peer Percentile: The fund’s ESG Percentile compared to its Lipper peer group.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG Trending of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI ESG % Coverage: Percentage of the fund's holdings for which the MSCI ESG ratings data is available. The MSCI ESG Fund Rating, MSCI ESG Quality Score, and MSCI ESG Quality Score - Peer Percentile metrics are displayed for funds with at least 65% coverage.

MSCI Weighted Average Carbon Intensity (Tons CO2E/$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per $1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.

MSCI Weighted Average Carbon Intensity % Coverage: Percentage of the fund's holdings for which MSCI Carbon Intensity data is available. The MSCI Weighted Average Carbon Intensity metric is displayed for funds with any coverage. Funds with low coverage may not fully represent the fund’s carbon characteristics given the lack of coverage.
