CALENDAR YEAR PERFORMANCE (%)

| | 2021 | 2022 | 2023 | 2024 | 2025 |
|---------------------------|-------|--------|-------|-------|-------|
| Share Class | 17.10 | -38.01 | 52.80 | 31.06 | 12.78 |
| Benchmark | 27.60 | -29.14 | 42.68 | 33.36 | 18.56 |
| Morningstar Category Avg. | 20.45 | -29.91 | 36.74 | 28.96 | 16.10 |

ANNUALIZED PERFORMANCE (%)

| | 1y | 3y | 5y | 10y |
|---------------------------|-------|-------|-------|-------|
| Share Class | 12.78 | 31.20 | 10.39 | 15.66 |
| Benchmark | 18.56 | 31.15 | 15.32 | 18.13 |
| Morningstar Category Avg. | 16.10 | 27.59 | 11.28 | 15.25 |

Performance data shown represents past performance which is no guarantee of future results. Investment returns and principal values may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. All returns assume reinvestment of all dividend and capital gain distributions. Refer to blackrock.com for current month-end performance. Class K shares have limited availability. The performance information for periods prior to the inception date of the share class shows the performance of the Fund's Institutional Shares. The performance of this share class would be substantially similar to Institutional Shares because this share class and Institutional Shares invest in the same portfolio of securities and performance would only differ to the extent that this share class and Institutional Shares have different expenses. Please see the fund prospectus for more details.

MORNINGSTAR RANKINGS

| | 1y | 3y | 5y | 10y |
|---------------------|----------|----------|---------|-----|
| Morningstar Ranking | 802/1080 | 249/1004 | 606/936 | - |
| Quartile Rank | 3 | 2 | 3 | - |

Rankings based on total return excluding sales charges, independently calculated and not combined to create an overall ranking. For periods not shown, Morningstar does not provide rankings based on synthetic performance.

GLOSSARY

Alpha (3y): A measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a mutual fund and compares its risk-adjusted performance to a benchmark index. The excess return of the fund relative to the return of the benchmark index is a fund's alpha.

P/B Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.

P/E Ratio - Forward: The forward price-to-earnings ratio is used to assess a company's valuation. To compute this ratio, the latest closing price is divided by the company's consensus mean EPS estimate for the next unreported fiscal year. The ratio represents a weighted harmonic mean of the forward price-to-earnings ratios of its holdings with negative values being excluded from the calculation.

Standard Deviation (3y): Standard deviation is applied to the annual rate of return of an investment to measure the investment's volatility. Standard deviation is also known as historical volatility and is used by investors as a gauge for the amount of expected volatility.

Beta (3y): Beta measures the funds sensitivity to market movements beta greater than 1 is more volatile than the market beta less than 1 is less volatile than the market.

R-Squared (3y): R-Squared reflects the percentage of a funds movements that are explained by movements in its benchmark, showing the degree of correlation between the fund and benchmark. This figure is helpful in assessing how likely it is that beta is statistically significant.

Active Share: measures the percentage of fund holdings that is different from the benchmark holdings at a point in time. It is calculated by taking the sum of the absolute value of the differences of the weight of each holding in a fund's portfolio versus the weight of each holding in a benchmark index and dividing by two. A fund that has no holdings in common with the benchmark will have an Active Share of 100%, and a fund that has exactly the same holdings as the benchmark considered will have an Active Share of 0%. Active Share levels can vary depending on the underlying benchmark and investment universe. Funds with more concentrated benchmarks or smaller investment universes will typically have lower Active Share. Active Share is not indicative of future performance or a measure of expected return deviation from the benchmark.

Number of Holdings: The number of holdings in the fund excluding cash positions and derivatives such as futures and currency forwards.

IMPORTANT INFORMATION:

Source: BlackRock, unless otherwise noted.

You should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. The prospectus and, if available, the summary prospectus contain this and other information about the fund and are available, along with information on other BlackRock funds, by calling 800-882-0052 or from your financial professional. The prospectus should be read carefully before investing. Investing involves risks including possible loss of principal.

% of net assets represents the Fund's exposure based on the economic value of securities and is adjusted for futures, options, swaps, and convertible bonds.

Key Risks: The fund is actively managed and its characteristics will vary. Stock values fluctuate in price so the value of your investment can go down depending on market conditions. Non-diversification of investments means that more assets are potentially invested in fewer securities than if investments were diversified, so risk is increased because each investment has a greater effect on performance. The fund may use derivatives to hedge its investments or to seek to enhance returns. Derivatives entail risks relating to liquidity, leverage and credit that may reduce returns and increase volatility. Short-selling entails special risks. If the fund makes short sales in securities that increase in value, the fund will lose value. Any loss on short positions may or may not be offset by investing short-sale proceeds in other investments.

Index returns are for illustrative purposes only. Index performance returns do not reflect any management fees or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance does not guarantee future results.

The Russell 1000 Growth Index measures performance of companies in the Russell 1000 Index with greater-than-average growth orientation.
